| 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Fire will continue to creep and smolder in the heavier fuels. 24 hours: Same as above. 48 hours: Same as above. 72 hours: Same as above. | | | | | | |
| 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, and Suwannee Chapel Community. 24 hours: Same as above. 48 hours: Same as above. 72 hours: Same as above. | | | | | | |
| 28: Critical Resource Needs (amount, type, kind and number of operational periods ()) in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: None. 24 hours: None. 48 hours: None. 72 hours: None. | | | | | | |
| 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Timber logging activity within the burned area. Bear season, archery season and muzzleloader hunting is open increasing hunter activity in the area. Extended drought makes breakouts possible in the western portion of the fire. | | | | | | |

| 30: Observed Weather for Current Operational Period Peak Gusts (mph): 11 Max. Temperature: 86 Wind Direction: NW Min. Relative Humidity: 25 | 31: Fuels/Materials Involved: 7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough |
|---|---|

32: Today's observed fire behavior (leave blank for non-fire events):
Low fire behavior today, with creeping and smoldering on the western side of the refuge.

33: Significant events today (closures, evacuations, significant progress made, etc.):

| 34: Forecasted Weather for next Operational Period Wind Speed (mph): 10 Temperature: 86 Wind Direction: E Relative Humidity: 28 | 35: Estimated Control Date and Time: | 36: Projected Final Size: | 37: Estimated Final Cost: |
|---|--------------------------------------|---------------------------|---------------------------|

38: Actions planned for next operational period:
Crews will continue to patrol and monitor on the west side of the refuge. Will also continue to mop-up containment lines and maintain rediness for any breakouts.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. As drying out continues, increase in fire behavior is likely.
