ICS-209 Form Page 1 of 3

Incident Status Summary (ICS-209)

1: Date 10/27/201	II II			tial Update Final				4: Incident Number GA-OKR-00001			5: Incident Name Honey Prairie				
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)					7: Start Date Time 04/30/2011 0900		II	cause Co		9: Incident Commander teve Abbott		10: Incident Command Organization Type 3 Tea		1	11: State- Unit GA- OKR
12: County Charlton 13: Latitude and Longitude Lat: 30° 43′ 47" Long: 82° 22 Ownership: GA-OKR					: 82° 22′	7''	14: Short Location Description (in reference to neare Okefenokee NWR, 5 miles NE of Fargo								
15: Size/Area Involved 309,199 ACRES 16: % Containe or MMA 76 Perce		ained IMA	(17: Expecte Containme Date:			19: Estine to Build 19: Estine to Cost to Da \$52,792		Contro te Date:						
21: Injuries this Reporting Period: 22: Injuries to Date: 23: Fatalities				Fatalities	24: Structure Information										
0	0 3				0	Ту	Γype of Structure			# Threatened		# Damaged		# I	Destroyed
25: Threat to Human Life/Safety:						Residence					90				
Evacuation(s) in progress No evacuation(s) imminent						Commercial Property				25					
Potential future threat XX No likely threat						Outbuilding/Other				196				1	
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:															

- 12 hours: Creeping and smoldering will likely increase as well as reburn potential as conditions become drier.
- 24 hours: Same as above.
- 48 hours: Same as above.
- 72 hours: Same as above.
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, the Suwannee Chapel Community.
- 24 hours: Same as above.
- 48 hours: Same as above.
- 72 hours: Same as above.
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: None.
- 24 hours: None.
- 48 hours: None.
- 72 hours: None.
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Timber logging activity within the burned area. Hunting season is open increasing public activity in the area. Extended drought makes breakouts possible in the western portion of the fire.

ICS-209 Form Page 2 of 3

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): **11** Max.

Temperature: 83

Wind Direction: **SW** Min.

Relative Humidity: 42

31: Fuels/Materials Involved: 7 Southern Rough

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,

3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Creeping and smoldering continues in the interior.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews continue to patrol, monitor and mop up around the Tatum Road area on the west side of the swamp.

34: Forecasted Weather for next Operational

43

Wind Speed (mph): 10 Temperature: 83 Wind Direction: **SSW**

Relative Humidity:

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Crews will continue to patrol, monitor, and mop up the fire.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential Medium
- 2. Difficulty of Terrain **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. As drying out continues, increase in fire behavior is likely.

	Suppression Strategy	Size	MMA	Cost To Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	309,199	76%	\$52,792,233
Moniac	Full Suppression/Perimeter Control		100%	
Road 22	Full Suppression/Perimeter Control		100%	
Murry Road	Full Suppression/Perimeter Control		100%	
Boone	Full Suppression/Perimeter Control		100%	
Whites Flat	Full Suppression/Perimeter Control		100%	
Secret	Full Suppression/Perimeter Control		100%	
Moccasin	Full Suppression/Perimeter Control		100%
