Evacuation(s) in properties No evacuation(s) in	Commercial Propert			perty	25								
Potential future thr No likely threat	Outbuilding/Other			er		196				1			

- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Fire activity is limited to the northwestern area of the fire and it will continue to smolder, with flanking and increased fire progression along the uncontrolled fire edge in the refuge wilderness wetlands.
- 24 hours: Progression of the uncontrolled fire line will increase inside the refuge wilderness wetlands with lower humidity and stronger North/Northwest winds. Conditions will increase the threat to the Southern control lines in Division Z.
- 48 hours: Progression of the uncontrolled fire line will increase inside the refuge wilderness wetlands with lower humidity and stronger North to Northwest winds. Conditions will increase the threat to the Southern control lines in Division Z.

72 hours:

- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, and Suwanee Chapel Community.

24 hours: **Same as Above** 48 hours: **Same as Above** 72 hours: **Same as Above**

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **none**24 hours: **none**48 hours: **none**72 hours: **none**

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

ICS-209 Form Page 2 of 3

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Timber logging activity within the burned area. Bear season, archery season and muzzleloader hunting is open increasing hunter activity in the area. Extended drought exists making breakouts possible in the western portion of the fire.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): **18** Max.

Temperature: **76**

Wind Direction: **NNW** Min.

Relative Humidity: 33

31: Fuels/Materials Involved: **7 Southern Rough**

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Honey Prairie fire continues to creep and smolder on the west side of the Refuge.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews continue to mop up, patrol for new starts, and monitor for heat on the west side of the Refuge.

34: Forecasted Weather for next Operational Period

Wind Speed (mph): 12 Temperature: 74 Wind Direction: NW Relative Humidity:

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to patrol for new starts and monitor the west side of the Refuge for heat. Continue to mop-up containment lines and maintain readiness for initial attack.

- 39: For fire incidents, describe resistance to control in terms of:
- 1. Growth Potential Medium
- 2. Difficulty of Terrain High
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:
- 42: Remarks

Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. Weather forecasts for Saturday will will exceed the threshold of all 5 indicators of increased fire behavior.

III I	Suppression Strategy	Size	MMA	Cost To Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	309,079	76%	\$51,845,679
Moniac	Full Suppression/Perimeter Control	43	100%	
Road 22	Full Suppression/Perimeter Control	8	100%	
Murry Road	Full Suppression/Perimeter Control	3	100%	
Boone	Full Suppression/Perimeter Control	2	100%	
Whites Flat	Full Suppression/Perimeter Control	2	100%	
Secret	Full Suppression/Perimeter Control	3	100%	
Moccasin	Full Suppression/Perimeter Control	14	100%

44: Cooperating and Assisting Agencies Not Listed Above:

lli

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed. Also, 2-PVT excavators, 1-PVT skidder, and 1-FWS and 1-PVT roadgraders.
