- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Minimal spread overnight to the W and SW.
- 24 hours: Minimal spread overnight to the W and SW.
- 48 hours: Minimal spread overnight to the W and SW.
- 72 hours: Minimal spread overnight to the W and SW.
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerline.
- 24 hours: **Same as above**
- 48 hours: Same as above
- 72 hours: Same as above
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: **None**
- 24 hours: None
- 48 hours: **None**
- 72 hours: None
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; lack of water resources for sustained attack; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast (up to 6" in depth) and re-sprouted palmetto

reburn concerns.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): 10 g17 Max.

Temperature: **88**

Wind Direction: **E** Min. Relative

Humidity: 64

31: Fuels/Materials Involved: **7 Southern Rough**

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ vear rough

32: Today's observed fire behavior (leave blank for non-fire events):

Areas of smoldering fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Continued unified coordination with Race Pond fire IMT in the Swamp Park area. Continued aerial recon of approximately 672 acre burnout in Division O. In the process of demobing excess resources.

34: Forecasted Weather for next Operational Period

Wind Speed (mph): 10 g17 Temperature: 93

Wind Direction: ENE

35: Estimated Control Date and Time: Relative Humidity: 52

36: Projected Final Size: 37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue aerial recon of burnout in Division O. Patrol and control reburn; mop up; improve line; flag access and escape routes; and recon rehab opportunities. Continue unified coordination with Race Pond fire IMT in the Swamp Park area.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential High
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:

42: Remarks:

Agency Administrator objectives are to contain all fires within the Okenfenokee NWR, using indirect tactics at the swamp edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems. Reduction in incident personnel resulting from demob and computer database corrections.

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed.
