- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Minimal spread overnight with backing to the NW in West Branch.
- 24 hours: Continued spread to the North and Northwest due to increased temperatures and lower RH.
- 48 hours: Continued spread to the North and Northwest due to increased temperatures and lower RH.
- 72 hours: Continued spread to the North and Northwest due to increased temperatures and lower RH.
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines.
- 24 hours: **Same as above**
- 48 hours: **Same as above**
- 72 hours: **Same as above**
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: None
- 24 hours: 7 type 3 tractor plows (6) with 2 DOZB (14) and 4 TFLD (14); 2 DIVS (14); 20 type 6 engines (14)
- 48 hours: 2 DIVS (14) to replace resources that are timing out
- 72 hours: 2 DIVS (14) to replace resources that are timing out
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate

ICS-209 Form Page 2 of 3

critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; lack of water resources for sustained attack; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast (up to 6" in depth) and re-sprouted palmetto reburn concerns. Fire in Y still has pathway to perimeter with mosaic burnout.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): **8g15** Max.

Temperature: 95

Wind Direction: ${f E}$ Min. Relative Humidity: 32

31: Fuels/Materials Involved: 7 Southern Rough

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Active areas of surface fire spread along the NW and northern flanks of the fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **7g13** Temperature: **94**

Wind Direction: **SE** Relative Humidity: 33

35: Estimated Control

36: Projected Final Size: Date and Time:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Prepare for potential burn-out operations in the NW. Patrol and control reburn; mop up; improve line; flag access and escape routes; and recon rehab opportunities.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Critical resources identified are needed to conduct burn-out and control actions along the NW perimeter; 30 miles of preparation required and 6 days of potential burning operations. Agency Administrator objectives are to contain all fires within the Okenfenokee NWR, using indirect tactics at the swamp edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.

·	<u> </u>				
	Suppression Strategy	Size	MMA	Cost To Date	
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	288,310	70%	\$32,050,157
