29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.						
30: Observed Weather for Current Operational Period Peak Gusts (mph): 13 Max.			31: Fuels/Materials Involved: 7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,

---	----------------------

32: Today's observed fire behavior (leave blank for non-fire events):
Significant areas of creeping and smoldering due east of Suwannee Creek Road inside the refuge boundary.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews continued to patrol, monitor, and mop up the Honey Prairie Fire. Crews are also continuing to identify rehab needs around the swamp perimeter.

38: Actions planned for next operational period:
Crews will continue to patrol, monitor, and mop up the Honey Prairie Fire. Rehab needs will continue to be identified

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.
