29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.

32: Today's observed fire behavior (leave blank for non-fire events):
Light fire behavior on Honey Prairie today with 2-3 foot flame lengths observed on the western side of the refuge. 260 fire continues to smolder.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews continued to patrol, monitor, and mop up the Honey Prairie and 260 fires. Crews also continued to identify rehab needs around the swamp perimeter.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 6 Temperature: 93 Wind Direction: E Relative Humidity: 43	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost:
--	--------------------------------------	---------------------------	---------------------------

38: Actions planned for next operational period:
Crews will continue to monitor and patrol the Honey Prairie and 260 fires. Dozers will begin rehab work on the western swamp perimeter.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.
