- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Little movement to the NNE on Honey Prairie and little to no movement on the 260 fire.
- 24 hours: Little movement to the NNE on Honey Prairie and little to no movement on the 260 fire.
- 48 hours: Little movement to the NNE on Honey Prairie and little to no movement on the 260 fire.
- 72 hours: Little movement to the NNE on Honey Prairie and little to no movement on the 260 fire.
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge and cultural resources. CSX railroad, Suwannee Chapel Community.
- 24 hours: Same as above.
- 48 hours: Same as above.
- 72 hours: Same as above.
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: None
- 24 hours: **None**
- 48 hours: **None**
- 72 hours: None
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the

ICS-209 Form Page 2 of 3

entire fire area. Needle cast	and re-sprouted palmetto reburn concerns.
30: Observed Weather for Current	
Operational Period	at The same at
Peak Gusts (mph): 14 Max.	31: Fuels/Materials Involved: 7 Southern Rough

Temperature: 96

Wind Direction: **ESE** Min.

Relative Humidity: 37

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Honey Prairie continues to creep and smolder with occasional flare ups on the west side of the refuge. The 260 fire continues to smolder.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews continued to patrol and monitor the Honey Prairie and 260 fires. Rehab work is continuing in Division V.

34: Forecasted Weather for next Operational 35: Estimated Period 36: Projected Final 37: Estimated Final Control Wind Speed (mph): 6 Temperature: 96 Size: Cost: Date and Time: Wind Direction: SE Relative Humidity: 41

38: Actions planned for next operational period:

Crews will continue to patrol and monitor the Honey Prairie and 260 fires. Rehab work will also continue on the western refuge boundary.

- 39: For fire incidents, describe resistance to control in terms of:
- 1. Growth Potential Medium
- 2. Difficulty of Terrain High
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:
- 42: Remarks:

Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.

III I	Suppression	Size	MMA	Cost To
Name	Strategy	Size	IVIIVIA	Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	303,594	70%	\$48,226,102
Moniac	Full Suppression/Perimeter Control	43	100%	
Road 22	Full Suppression/Perimeter Control	8	100%	
Murry Road	Full Suppression/Perimeter Control	2	100%	
Boone	Full Suppression/Perimeter Control	3	100%	
Whites Flat	Full Suppression/Perimeter Control	3	100%	
Secret	Full Suppression/Perimeter Control	2	100%	
Moccasin	Full Suppression/Perimeter Control	14	100%	
260 Fire	Full Suppression/Perimeter Control	19	95%

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed.
