- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Some movement to the Southwest on Honey Prairie
- 24 hours: Moderate movement to the Southwest on Honey Prairie
- 48 hours: Moderate movement to high movements to the Southwest and Southeast on Honey

Prairie

- 72 hours: Moderate to high movement to the East on Honey Prairie
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge and cultural resources, CSX railroad, Suwanee Chapel Community.
- 24 hours: **Same as above** 48 hours: **Same as above** 72 hours: **Same as above**
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: **none** 24 hours: **none**
- 48 hours: **Type 1 helicopter** 72 hours: **Type 1 helicopter**
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.

30: Observed Weather for Current

ICS-209 Form Page 2 of 3

Operational Period

Peak Gusts (mph): 20 Max.

Temperature: 92

Wind Direction: **E** Min. Relative Humidity: **48**

31: Fuels/Materials Involved: 7 Southern Rough

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,

3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Honey prairie continues to creep and smolder with occasional flare ups on the west side of the refuge.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews monitored and mopped up new start outside refuge boundary in Division N. Crews also continued to patrol and monitor for new starts and significant heat on the west side of the refuge.

34: Forecasted Weather for next Operational

Period

Wind Speed (mph): **20** Temperature: **93** Wind Direction: **E** Relative Humidity: **48**

35: Estimated Control

Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential Medium
- 2. Difficulty of Terrain **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reeduce negative impacts to the ecosystem.

	Suppression Strategy	Size	MMA	Cost To Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	304,331	70%	\$48,639,465
Moniac	Full Suppression/Perimeter Control	43	100%	
Road 22	Full Suppression/Perimeter Control	8	100%	
Murry Road	Full Suppression/Perimeter Control	2	100%	
Boone	Full Suppression/Perimeter Control	3	100%	
Whites Flat	Full Suppression/Perimeter Control	3	100%	
Secret	Full Suppression/Perimeter Control	2	100%	
Moccasin	Full Suppression/Perimeter Control	14	100%	
260 Fire	Full Suppression/Perimeter Control	19	100%

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed.
