26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: <b>Honey Prairie will continue to smolder with occasional flare ups. Predicted SW winds are expected to increase fire activity neat the Division break at Y/Z.</b> 24 hours: <b>Same as above</b> 48 hours: <b>Same as above</b> 72 hours: <b>Same as above</b>						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: <b>High value commercial timberlands, the Okefenokee National Wildlife Refuge and cultural resources, CSX railroad, Suwanee Chapel Community.</b> 24 hours: <b>Same as above</b> 48 hours: <b>Same as above</b> 72 hours: <b>Same as above</b>

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. <b>Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.</b>						
30: Observed Weather for Current						

Operational Period		31: Fuels/Materials Involved: <b>7 Southern Rough</b>													
Peak Gusts (mph): <b>18</b> Max.		<b>Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,</b>													
Temperature: <b>98</b>		<b>3+ year rough</b>													
Wind Direction: <b>SW</b> Min.															
Relative Humidity: <b>23</b>															
32: Today's observed fire behavior (leave blank for non-fire events): <b>Honey Prairie continues to creep and smolder with occasional flare ups on the west side of the refuge. Fire activity did increase in areas due to low RH's.</b>															
33: Significant events today (closures, evacuations, significant progress made, etc.): <b>Crews also continue to patrol for new starts and monitor for significant heat on the west side of the refuge.</b>															
34: Forecasted Weather for next Operational Period		35: Estimated Control Date and Time:	36: Projected Final Size:												
Wind Speed (mph): <b>14</b> Temperature: <b>97</b>															
Wind Direction: <b>SW</b> Relative Humidity: <b>28</b>			37: Estimated Final Cost:												
38: Actions planned for next operational period:															
39: For fire incidents, describe resistance to control in terms of:															
1. Growth Potential - <b>Medium</b>															
2. Difficulty of Terrain - <b>High</b>															
40: Given the current constraints, when will the chosen management strategy succeed?															
41: Projected demobilization start date:															
42: Remarks: <b>Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystem.</b>
