Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,
3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Significant areas of creeping and backing fire due east of Suwannee Creek Road inside the regfuge boundary.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews continued to patrol, rehab, and mop up the Honey Prairie Fire. Crews also monitored and mopped up new fires within the refuge response zone.

38: Actions planned for next operational period:

Crews will continue to patrol, rehab, and mop up the Honey Prairie Fire, and new starts.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential **Medium**
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:
- 42: Remarks:

Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.
