| 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Honey Prairie Fire will continue to smolder with occasional flare ups. Predicted southwesterly winds could threaten containment lines. 24 hours: Weather outlook is for continued clear days and low RHs. 48 hours: 72 hours: | | | | | | |
| 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge and cultural resources, CSX railroads, and Suwanee chapel Community. 24 hours: Same as above 48 hours: Same as above 72 hours: Same as above | | | | | | |
| 28: Critical Resource Needs (amount, type, kind and number of operational periods ()) in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: none 24 hours: 1-EMT 48 hours: none 72 hours: none | | | | | | |
| 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Extended drought exist, combined with low RHs and high wind gust, makes breakouts likely along the extensive fire line. | | | | | | |

|---|---|
| 30: Observed Weather for Current Operational Period Peak Gusts (mph): 9 Max. Temperature: 93 Wind Direction: S Min. Relative Humidity: 40 | 31: Fuels/Materials Involved: 7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough |
|---|---|

32: Today's observed fire behavior (leave blank for non-fire events):
Honey Prairie fire continues to creep and smolder with occasional flare-ups on the west side of the Refuge. Due to continued droughty weather, fire activity increased.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews continued to patrol for new starts, from recent lightning activity, and monitor for significant heat on the west side of the Refuge. Completed an approximate 100-acre burn-out to keep fire within the Refuge.

| 34: Forecasted Weather for next Operational Period Wind Speed (mph): 9 Temperature: 92 Wind Direction: N Relative Humidity: 35 | 35: Estimated Control Date and Time: | 36: Projected Final Size: | 37: Estimated Final Cost: |
|--|--------------------------------------|---------------------------|---------------------------|

38: Actions planned for next operational period:
Continue to patrol for new starts and monitor the west side of the Refuge for significant heat.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem.

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed. Also, 1-Peirce excavator, 1-Hughes excavator, 1-Timberline skidder, and 1-FWS roadgrader.
