

Incident Status Summary (ICS-209)

1: Date 09/02/2011	2: Time 1730	3: Initial Update Final XX	4: Incident Number GA-OKR-000001	5: Incident Name Honey Prairie		
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)		7: Start Date Time 04/30/2011 0900	8: Cause Lightning	9: Incident Commander Trent Ingram/Kris Butler(T)	10: Incident Command Organization Type 3 Team	11: State- Unit GA- OKR
12: County Charlton	13: Latitude and Longitude Lat: 30° 43' 47" Long: 82° 22' 7" Ownership: GA-OKR		14: Short Location Description (in reference to nearest town): Okefenokee NWR, 5 miles NE of Fargo, GA			
15: Size/Area Involved 306,226 ACRES	16: % Contained or MMA 76 Percent	17: Expected Containment Date:	18: Line to Build	19: Estimated Costs to Date \$49,230,941	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period: 0	22: Injuries to Date: 1	23: Fatalities 0	24: Structure Information			
			Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- No evacuation(s) imminent -- Potential future threat ----- XX No likely threat -----			Residence	90		
			Commercial Property	25		
			Outbuilding/Other	196		1
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Honey Prairie will continue to smolder with occasional flare ups. Predicted east winds could threaten containment lines in Divisions Y & Z 24 hours: Same as above 48 hours: Same as above 72 hours: Same as above						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: High value commercial timberlands, the Okefenokee National Wilflike Refuge and cultural resources, CCSX railroad, Suwanee Chapel Community 24 hours: Same as above 48 hours: Same as above 72 hours: Same as above						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: none 24 hours: Replacement crews for 2 ENG6 48 hours: none 72 hours: none						
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.						
30: Observed Weather for Current						

Operational Period		31: Fuels/Materials Involved: 7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough																																																											
Peak Gusts (mph): 20 mph Max. Temperature: 93																																																													
Wind Direction: ENE Min. Relative Humidity: 32																																																													
32: Today's observed fire behavior (leave blank for non-fire events): Honey Prairie Fire continues to creep and smolder with occasional flare ups on the west side of the refuge. Due to weather, fire activity increased.																																																													
33: Significant events today (closures, evacuations, significant progress made, etc.): Crews continued to patrol for new starts from recent lightning activity and monitor for significant heat on the west side of the refuge.																																																													
34: Forecasted Weather for next Operational Period Wind Speed (mph): 22 Temperature: 93 Wind Direction: ESE Relative Humidity: 35				35: Estimated Control Date and Time:			36: Projected Final Size:			37: Estimated Final Cost:																																																			
38: Actions planned for next operational period: Crews continued to patrol for new starts from recent lightning activity and monitor for significant heat on the west side of the refuge.																																																													
39: For fire incidents, describe resistance to control in terms of:																																																													
1. Growth Potential - Medium																																																													
2. Difficulty of Terrain - High																																																													
40: Given the current constraints, when will the chosen management strategy succeed?																																																													
41: Projected demobilization start date:																																																													
42: Remarks: Agency Administrator objectives are to contain all fires within the Okefenokee NWR using indirect tactics at the swamp's edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystem.
