26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: <b>The northwestern area of the fire will continue to smolder, with little flanking and backing fire progression in the refuge wilderness wetlands.</b> 24 hours: <b>This same progression in the northwestern area of the fire will continue if expected rainfall is received.</b> 48 hours: <b>This same progression in the northwestern area of the fire will continue if expected rainfall is received.</b> 72 hours: <b>This same progression in the northwestern area of the fire will continue if expected rainfall is received.</b>						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: <b>High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, and Suwanee Chapel Community.</b> 24 hours: <b>Same as Above</b> 48 hours: <b>Same as Above</b> 72 hours: <b>Same as Above</b>						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: <b>None</b> 24 hours: <b>None</b> 48 hours: <b>None</b> 72 hours: <b>None</b>						
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. <b>Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground</b>						

**equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Extended drought exists making breakouts possible in the western portion of the fire.**

30: Observed Weather for Current Operational Period  
Peak Gusts (mph): **10** Max.  
Temperature: **87**  
Wind Direction: **SE** Min.  
Relative Humidity: **57**

31: Fuels/Materials Involved: **7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough**

32: Today's observed fire behavior (leave blank for non-fire events):

**Honey Prairie fire continues to creep and smolder on the west side of the Refuge.**

33: Significant events today (closures, evacuations, significant progress made, etc.):

**Crews continue to mop up, patrol for new starts, and monitor for heat on the west side of the Refuge.**

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **6** Temperature: **86**  
Wind Direction: **SE** Relative Humidity: **55**

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

**Continue to patrol for new starts and monitor the west side of the Refuge for heat. Continue to mop-up containment lines and maintain readiness for initial attack.**

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

**Portions of the fire received rainfall from 1/2 inch to 1 1/2 inches of rainfall. Fire activity will subside over the next few days but become active again as the weather dries out. Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem.**
