

Incident Status Summary (ICS-209)

1: Date 09/23/2011		2: Time 1940		3: Initial Update Final XX		4: Incident Number GA-OKR-000001		5: Incident Name Honey Prairie					
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)				7: Start Date Time 04/30/2011 0900		8: Cause Lightning		9: Incident Commander Rick Dolan/Bryce Thomas(T)		10: Incident Command Organization Type 3 Team		11: State- Unit GA- OKR	
12: County Charlton		13: Latitude and Longitude Lat: 30° 43' 47" Long: 82° 22' 7" Ownership: GA-OKR				14: Short Location Description (in reference to nearest town): Okefenokee NWR, 5 miles NE of Fargo, GA							
15: Size/Area Involved 309,173 ACRES		16: % Contained or MMA 76 Percent		17: Expected Containment Date:		18: Line to Build		19: Estimated Costs to Date \$51,170,848		20: Declared Controlled Date: Time:			
21: Injuries this Reporting Period:		22: Injuries to Date:		23: Fatalities		24: Structure Information							
0		1		0		Type of Structure		# Threatened		# Damaged		# Destroyed	
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- No evacuation(s) imminent -- Potential future threat ----- No likely threat -----						Residence		90					
						Commercial Property		25					
						Outbuilding/Other		196				1	
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: The northwestern area of the fire will continue to smolder, with flanking and backing fire progression along the uncontrolled fire edge in the refuge wilderness wetlands. 24 hours: This same progression in the northwestern area of the fire will continue. 48 hours: Progression of the uncontrolled fire edge in the northwestern area of the fire could increase due to South winds. 72 hours: The northwestern area of the fire will continue to smolder, with flanking and backing fire progression along the uncontrolled fire edge in the refuge wilderness wetlands.													
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, and Suwanee Chapel Community. 24 hours: Same as Above 48 hours: Same as Above 72 hours: Same as Above													
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: None 24 hours: None 48 hours: None 72 hours: None													
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitple jurisdictions involved; wilderness area; and reburn potential over the													

entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Extended drought exists making breakouts possible in the western portion of the fire.

30: Observed Weather for Current Operational Period
Peak Gusts (mph): **10** Max.
Temperature: **89**
Wind Direction: **NW** Min.
Relative Humidity: **62**

31: Fuels/Materials Involved: **7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough**

32: Today's observed fire behavior (leave blank for non-fire events):

Honey Prairie fire continues to creep and smolder on the west side of the Refuge.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Crews continue to mop up, patrol for new starts, and monitor for heat on the west side of the Refuge.

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **6** Temperature: **91**
Wind Direction: **NW** Relative Humidity:
50

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to patrol for new starts and monitor the west side of the Refuge for heat. Continue to mop-up containment lines and maintain readiness for initial attack.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Fire activity should be increase over the next few days as the fuels dry out. Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. There was a reduction of assigned resource numbers due to more accurate tracking.

Incident Name	Suppression Strategy	Size	MMA	Cost To Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	309,079	76%	\$51,170,848
Moniac	Full Suppression/Perimeter Control	43	100%	
Road 22	Full Suppression/Perimeter Control	8	100%	
Murry Road	Full Suppression/Perimeter Control	2	100%	
Boone	Full Suppression/Perimeter Control	3	100%	
Whites Flat	Full Suppression/Perimeter Control	3	100%	
Secret	Full Suppression/Perimeter Control	2	100%	
Moccasin	Full Suppression/Perimeter Control	14	100%	
260 Fire	Full Suppression/Perimeter Control	19	100%

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed. Also, 2-PVT excavators, 1-PVT skidder, 1-FWS and 1-PVT roadgraders, and 1-State Service truck.
