26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
12 hours: Fire activity is limited to the northwestern area of the fire and it will continue to smolder, with flanking and increased fire progression along the uncontrolled fire edge in the refuge wilderness wetlands.
24 hours: Progression of the uncontrolled fire line will increase inside the refuge wilderness wetlands with lower humidity and stronger Northwest winds. Conditions will increase the threat to the Southern control lines in Division Z.
48 hours: Progression of the uncontrolled fire line will increase inside the refuge wilderness wetlands with lower humidity and stronger North winds. Conditions will increase the threat to the Southern control lines in Division Z.
72 hours: Progression of the uncontrolled fire line will increase inside the refuge wilderness wetlands with lower humidity and stronger Northeast winds. Conditions will increase the threat to the Southern control lines in Division Z.

27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
12 hours: High value commercial timberlands, the Okefenokee National Wildlife Refuge (OKR) and cultural resources, CSX railroads, and Suwanee Chapel Community.
24 hours: Same as Above
48 hours: Same as Above
72 hours: Same as Above
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
12 hours: None
24 hours: None
48 hours: None
72 hours: None

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Timber logging activity within the burned area. Bear season, archery season and muzzleloader hunting is open increasing hunter activity in the area. Extended drought exists making breakouts possible in the western portion of the fire.
30: Observed Weather for Current Operational Period
Peak Gusts (mph): 13 Max. Temperature: 86

31: Fuels/Materials Involved: 7 Southern Rough
Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,
Wind Direction: WNW Min. 3+ year rough
Relative Humidity: 48
32: Today's observed fire behavior (leave blank for non-fire events):
Honey Prairie fire continues to creep and smolder on the west side of the Refuge.
33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews continue to mop up, patrol for new starts, and monitor for heat on the west side of the Refuge.

38: Actions planned for next operational period:
Continue to patrol for new starts and monitor the west side of the Refuge for heat. Continue to mop-up containment lines and maintain readiness for initial attack.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - Medium
2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?
41: Projected demobilization start date:
42: Remarks:
Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. Weather forecasts over the next few days will exceed 4 of the 5 critical fire behavior thresholdss.

| Incident Name | Suppression Strategy | Size | MMA | Cost To Date |
| :---: | :---: | :---: | :---: | :---: |
| Honey Prairie | Point or Zone Protection/Limited Perimeter Control | 309,079 | 76\% | \$51,694,325 |
| Moniac | Full Suppression/Perimeter Control | 43 | 100\% |  |
| Road 22 | Full Suppression/Perimeter Control | 8 | 100\% |  |
| Murry Road | Full Suppression/Perimeter Control | 3 | 100\% |  |
| Boone | Full Suppression/Perimeter Control | 2 | 100\% |  |
| Whites Flat | Full Suppression/Perimeter Control | 2 | 100\% |  |
| Secret | Full Suppression/Perimeter Control | 3 | 100\% |  |

Total personnel by agency are listed in the first section of committed resources.

44: Cooperating and Assisting Agencies Not Listed Above:
GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed. Also, 2-PVT excavators, 1-PVT skidder, and 1-FWS and 1-PVT roadgraders.
