29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.  
**Extremely dry fuels - ERC consistently running over the 95th percentile and setting ERC records locally. Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, multiple jurisdictions involved, wilderness area, and reburn happening over the entire fire area with spotting into the green.**

30: Observed Weather for Current Operational Period Peak Gusts (mph): <b>14</b> Max. Temperature: <b>95</b> Wind Direction: <b>SW</b> Min. Relative Humidity: <b>39</b>	31: Fuels/Materials Involved: <b>7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough</b>
---	---

32: Today's observed fire behavior (leave blank for non-fire events):  
**Numerous hot spots around the fire perimeter. Moderate spread in Divisions A, B, N and J with active burning in the interior.**

33: Significant events today (closures, evacuations, significant progress made, etc.):  
**Burnout in Division A around Stephen Foster State Park facilities. Continuing to mop-up the spots in Division J after the 1500 acre run outside the swamp edge break. Line around all active fire spots outside swamp edge break. Reburn continues causing control problems.**

34: Forecasted Weather for next Operational Period Wind Speed (mph): <b>12</b> Temperature: <b>98</b> Wind Direction: <b>W</b> Relative Humidity: <b>34</b>	35: Estimated Control Date and Time:	36: Projected Final Size: <b>386000</b>	37: Estimated Final Cost:
---	--------------------------------------	---	---------------------------

38: Actions planned for next operational period:  
**Control the active line areas. Hold and mop-up in all Branches.**

- 39: For fire incidents, describe resistance to control in terms of:
1. Growth Potential - **High**
  2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:  
**Other resources on the Complex include 3 Excavators, 5 Feller-bunchers, and 6 Graders. Transition today with Southern Area Type 1 Blue Team (IC-Quesinberry). Transfer of command from Wilder's Type 1 team to Quesinberry planned for 0800 tomorrow (6/18/2011). Unified command with Georgia Forestry Commission, Florida Division of Forestry and US Fish and Wildlife Service will continue.**
