29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

**Extremely dry fuels - ERC consistently running over the 95th percentile and setting ERC records locally. Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, multiple jurisdictions involved, wilderness area, and reburn happening over the entire fire area with spotting into the green.**

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **17** Max.

Temperature: **97**

Wind Direction: **W** Min.

Relative Humidity: **33**

31: Fuels/Materials Involved: **7 Southern Rough**

**Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough**

32: Today's observed fire behavior (leave blank for non-fire events):

**Numerous hot spots around the fire perimeter. Moderate spread in Divisions A, D, E, and M with active burning in the interior of Refuge.**

33: Significant events today (closures, evacuations, significant progress made, etc.):

**Burnout in Division A in West Branch around Stephen Foster State Park facilities and Burnout operations were conducted in the southwestern perimeter in Divisions D/E. Continuing to mop-up spots in Division J in area of fire run to the southwest outside the swamp edge break which occurred on 6/14. Reburn continues to cause control problems for resources.**

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **9** Temperature: **97**

Wind Direction: **W** Relative Humidity: **33**

35: Estimated Control Date and Time:

36: Projected Final Size:  
**386000**

37: Estimated Final Cost:

38: Actions planned for next operational period:

**Control the active line areas. Hold and Mop-up in all Branches, and conduct burnout operations as necessary.**

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

**Northern 1/3 of Okefenokee NWR recieved light precipitation last night (.2-.3) Increase of Complex Acres by 23,782 since last gps flight from morning of 6/17/11. Other resources on the Complex include 3 Excavators, 5 Feller-Bunchers, and 6 Graders. Unified command with Georgia Forestry Commission, Florida Division of Forestry and US Fish and Wildlife Service.**
