29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Extremely dry fuels - ERC consistently running over the 95th percentile and setting ERC records locally. Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, multiple jurisdictions involved, wilderness area, and reburn happening over the entire fire area with spotting into the green.

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **19** Max.

Temperature: **100**

Wind Direction: **W** Min.

Relative Humidity: **31**

31: Fuels/Materials Involved: **7 Southern Rough**

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Numerous hot spots around the fire perimeter. Active fire spread interior from Division Z towards the Northeast.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Slop overs occurred today with reburn in needle cast in Division C, resources were able to line the spots and hold. Line preparation continued in East and West Branches of fire. Burnout operations continued as conditions allowed. Two new fires were detected approximately 5 miles SW of Honey Prairie in Florida, air support and 5 tractor plow units were provided from incident to assist on new starts.

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **8** Temperature: **102**

Wind Direction: **w** Relative Humidity: **27**

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Control the active line areas. Hold, improve line and Mop-up in all Branches. Conduct burnout operations as necessary.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Forecasted weather continues to be hot and dry. Interior burning and smoke drift to the East limited GPS flight data on the East Branch this afternoon. Other resources on the Complex include 3 Excavators, 5 Feller-Bunchers, and 6 Graders. Unified command with Georgia Forestry Commission, Florida Division of Forestry and US Fish and Wildlife Service.
