

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
12 hours: Increasing fire activity due to Sea Breeze effect moving over fire area and unstable atmosphere.
24 hours: Projected fire spread to the North and Northwest with moderate fire activity due to projected higher relative humidities.
48 hours: Projected fire spread to the North and Northwest, with RH's dropping again.
72 hours: Same as above.
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
12 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines. 24 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines. 48 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines. 72 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines.

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
12 hours: N/A

24 hours: N/A
48 hours:
72 hours:
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Extremely dry fuels - ERC consistently running over the 95th percentile and setting ERC records locally. Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, mulitiple jurisdictions involved, wilderness area, and reburn happening over the entire fire area with spotting into the green.

32: Today's observed fire behavior (leave blank for non-fire events):
Numerous hot spots around the fire perimeter. Active fire spread interior from Division Z towards the North Northeast.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews continue to patrol and work hot spots around southern fires perimeter. Control line preperation continued today in the North Branch. Division M resources in the Northeast have completed burnout operations from King Fisher Landing to the South towards Mizell Road. This tied in the Sawfly Fire to the main Honey Prairie Fire.

| 34: Forecasted Weather for next Operational | 35: Estimated |  |  |
| :--- | :--- | :--- | :---: | :---: |
| Period |  | 36: Projected Final | 37: Estimated Final |
| Wind Speed (mph): $\mathbf{1 0}$ | Temperature: 96 | Cont: |  |
| Control | Size: |  |  |
| Wind Direction: SW | Relative Humidity: 40 |  |  |

38: Actions planned for next operational period:
Control the active line areas. Hold, improve line and Mop-up in all Branches. Conduct burnout operations as necessary.
39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - High
2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?
41: Projected demobilization start date:
42: Remarks:
The Sawfly Fire has been connected to the Honey Prairie Fire at the end of yesterday's shift. The Sawfly was removed from the complex acres in the 209 and added to the Honey Prairie total. Forcasted RH's for tomorrow's shift is expected to be higher with a minimum value of $\mathbf{4 0 \%}$. The Sea Breezes from yesterday and today have made it to the fires area around 1700 hrs each evening, dramiticaly increasing fire activity in the interior of Refuge. Unified Command with Georgia Forestry Commission, Florida Division of Forestry and SA Blue Team IC Mike Quisenberry.

44: Cooperating and Assisting Agencies Not Listed Above:
GEMA, GDOT, FLDOT, County EMA's, GOAL, FLDOF, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed.
