26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:  12 hours: Minimal spread overnight with backing in the West Branch.													

- 12 hours: Minimal spread overnight with backing in the West Branch.
- 24 hours: West and North Branch to continue backing to the North and Northwest.
- 48 hours: Potential Spread to the North and Northwest.
- 72 hours:
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: Davis Community, Crawford Community, Town of Fargo, Spanish Creek Community, Harper Hammock Community, Kingfisher Boat House, Stephen Foster State Park Facilities, High Value Commercial Timberlands, Okefenokee National Wildlife Refuge and cultural resources, CSX Railroad, Norfolk Southern Railroad and powerlines.
- 24 hours: **Same as above.**48 hours: **Same as above.**72 hours: **Same as above.**
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **N/A**24 hours: **N/A**48 hours: **N/A**72 hours: **N/A** 

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, mulitiple jurisdictions involved, wilderness area, and reburn potential over the entire fire area.

30: Observed Weather for Current Operational Period

Peak Gusts (mph): 13 Max. 31: Fuels/Materials Involved: 7 Southern Rough

Temperature: 98
Wind Direction: SW
Relative Humidity: 35

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,
3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

West flank of fires edge continues to smolder and hold heat along a 9 mile stretch running to the Northeast from Rowells Island to Long Island inside Refuge Boundary. Remaining portion of fire showed minimal activity today.

33: Significant events today (closures, evacuations, significant progress made, etc.):

## 2 T1 Helocopters assisted State of GA resources with IA on new starts from lightening strikes to the North of Fargo ICP.

34: Forecasted Weather for next Operational Period
Wind Speed (mph): SW Temperature: 97
Wind Direction: SW Relative Humidity: 39

35: Estimated Control Date and Time:

36: Projected Final Size:
37: Estimated Final Cost:

38: Actions planned for next operational period:

Control the active line areas. Hold, improve line and Mop-up in all Branches. Conduct burnout operations as necessary.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential **High**
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:

## 42: Remarks:

Localized storms developed once again this afternoon with varying amounts of rainfall to the fire area, SW portion recieved around 2 inches, while the SE portion averaged around 1.5 inches of rainfall with little to no rain in between. Unified Command with Georgia Forestry Commission, Florida Division of Forestry and SA Blue Team IC Mike Ouisenberry.

Incident Name	Suppression Strategy	Size	IIVIIVI AI	Cost To Date
