29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Moderate to heavy fuel loads in the swamp and uplands, limited accessibility for ground equipment, lack of water resources for sustained attack, multiple jurisdictions involved, wilderness area, and reburn potential over the entire fire area.						
30: Observed Weather for Current Operational Period		31: Fuels/Materials Involved: 7 Southern Rough				

Peak Gusts (mph): 15 Max. Temperature: 97 Wind Direction: W Min. Relative Humidity: 38	Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough
---	--

32: Today's observed fire behavior (leave blank for non-fire events):
West flank of fires edge continues to smolder and hold heat along a 9 mile stretch running to the Northeast from Rowells Island to Long Island inside Refuge Boundary. Remaining portion of fire showed minimal activity today with the exception of small pockets of reburn due to needle cast on SW portion of fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Crews have completed containment line construction around Okefenokee NWR and swamp edge break. Approximate length of constructed and improved line is 200 miles. Resources assisted GFC with IA on new start located approximately 1 mile south of fire perimeter. Fire was contained today and acreage is unknown at this time.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 5-8 Temperature: 99 Wind Direction: SW Relative Humidity: 35	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost:
---	--------------------------------------	---------------------------	---------------------------

38: Actions planned for next operational period:
Control the active line areas. Hold, improve line and Mop-up in all Branches. Conduct burnout operations as necessary.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Localized storms developed once again this afternoon with varying amounts of rainfall to the fire area, a line of thunderstorms developed from Fargo to Swamp Park producing localized heavy downpours. Western edge of fire received only a trace from this system. Unified Command with Georgia Forestry Commission, Florida Division of Forestry and SA Blue Team IC Mike Quisenberry.
