

# SATILLA SUMMER FIRES

---

## Sweat Farm Again • Race Pond

SATILLA DISTRICT, GEORGIA

### Incident Action Plan

MONDAY

---July 18, 2011---

*Sweat Farm# GA-GAS-011032, PNF-44L*  
420810932

*Racepond# GA-GAS-201103, PNF-41P*  
420810933

<b>INCIDENT OBJECTIVES</b>	1. Incident Name	2. Date Prepared	3. Time Prepared
	Satilla Summer Fires GA-GAS-011032 (Sweat Farm) GA-GAS-201103 (Racpond)	7/17/2011	1800
4. Operational Period 7/18/2011 0800 - 2000			
5. General Control Objectives For The Incident (Include Alternatives)			
<p>Provide for the safety of the public and local communities by working closely with local Fire, Emergency Mgt and Law Enforcement agencies. Keep these agencies and the public informed of current and expected condition as well as any impending evacuations.</p> <p>Upon request of the local unit, provide support and/or resources for any new starts.</p> <p>Promptly suppress any reburns near homes or structures. Suppress reburns near roadways and logging operations. Mop up perimeter to a distance that ensures the fire can not cross control lines. suppress any reburn within 100 ft of the perimeter.</p> <p>Provide and document training opportunities as appropriate within cost constraints. Consider trainees for any and all unfilled positions or replacements.</p> <p>As the weather allows and fire behavior moderates prepare to transfer command back to local jurisdictions by out planning for resources needs, completing all reporting requirements, after action reviews and closing out financial records. File all records as per standards and complete documentation package and boxes.</p> <p>Cost containment is an important aspect of any incident managed by this team. Resources will be released once they are excess to the incident regardless of time remaining. Track and report costs daily, ensure costs are commensurate with fire complexity.</p>

## Fire Weather Forecast

**FORECAST NO:** 28

**NAME OF FIRE:** Satilla Summer Fires

**PREDICTION FOR:** Day Operations

**UNIT:** Georgia Forestry Commission – Satilla District

**SHIFT DATE:** Monday 7/18/11

**SIGNED:** John Quagliariello

**FORECAST ISSUED:** 07/17/11 at 1800 hours

**Incident Meteorologist**

**WEATHER DISCUSSION:** The combination of high pressure to the west and low pressure off the Atlantic coast of Florida will pull drier air into the region through Tuesday. A weak inland trough of low pressure will approach on Wednesday.

---

### **FORECAST FOR TODAY:**

**WEATHER:** Mostly sunny.

**MAX TEMPERATURES:** 90 to 92 (24 hour trend ~ 3 degrees warmer).

**MIN HUMIDITY:** 38% to 42% (24 hour trend ~ 5% lower).

**20 FT WINDS:** East-northeast 5 to 8 mph with gusts to 14 mph, increasing to 10 to 13 mph with gusts to 20 mph in the afternoon.

**SEABREEZE PASSAGE:** N/A

**STABILITY/INVERSION:** Inversion lifting ~ 9 AM. Mixing heights around 6000'. Transport winds northeast 13 mph. Dispersion Index 68.

---

**TUESDAY:** Mostly sunny. Lows in the upper 60s. Highs in the mid 90s. Minimum humidity 33 to 37%. West-northwest winds 4 to 7 mph.

---

**WEDNESDAY:** Partly cloudy. Isolated showers and thunderstorms in the afternoon. Lows in the lower 70s. Highs in the upper 90s. Minimum humidity 43 to 47%. Southwest winds 5 to 9 mph.

**FIRE BEHAVIOR FORECAST**

<b>Fire: Honey Prairie Complex</b>	<b>Unit: GA-OKR-000001</b>	<b>Prediction for Day Shift</b>
<b>Forecast #71 Issued: 07/17/2011 1830 hrs</b>	<b>Signed: /S/John Kern</b>	<b>Shift Date: Monday 07/18/11</b>

**GENERAL FIRE BEHAVIOR**

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within the swamp.

**Indicators/Threshold for Increased Fire Activity**

- Relative humidity dropping below 45%
- Winds above 10 mph
- **Heavy fuel loadings**
- Fine dead fuel moisture 8% or less
- Dispersion above 70
- **\* Items in BOLD are predicted to occur today\***

**SPECIFIC FIRE BEHAVIOR**

- **Fire behavior will be influenced by past precipitation. All portions of the fire have received significant rainfall recently.**
- **Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths. Expect areas with high heat concentrations to increase fire intensity over the next few days. LAL 2**

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
<b>Winds at 5 - 12 G 20 mph</b>				
Shrub Fuels – SH4	2 - 7 ch/hr	1 - 2 feet	1/10 - 3/10 mile	38%
Heavy Southern Rough- SH8	4 – 17 ch/hr	4 -8 feet	1/10 -3/10 mile	38%
Timber Litter-Reburn TL8	1 - 5 ch/hr	1 - 3 feet	1/10 - 3/10 mile	37%
Small Pine Plantation w/grasses GR5	2 – 17 ch/hr	1 - 4 feet	1/10 – 3/10 mile	37%

**One hour fine dead fuel moisture is at 9% for Monday.** Moisture from repeated rains have reduced the fire threat. 1,000 hour fuels are no longer drier than normal for this time of year. There is reburn potential in all divisions due to the amount of needle cast. Should a winds become stronger than predicted, expect fire behavior to increase above predicted levels. Heavier firebrands can also be lifted higher and further increasing likelihood of spots to max predictions. **In areas where fuels have been herbicided, expect quick ignitions and extreme heat, quick rate-of –spread, and group tree torching producing spotting problems.**

**NOTE- FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.**

<b>West</b>	<b>A</b>	<i>Wetting rains have moistened fuels. Falling snags still pose a threat to fire personnel and the boardwalk. <b>20% chance of rain</b></i>	<b>West</b>	<b>T/V</b>	<i>Rains did fall in this area however fire will continue a slow spread to the North and west. Be heads-up for falling snags. <b>20% chance of rain</b></i>
	<b>B-G</b>	<i>Wetting rains have moistened fuels. Be heads-up for falling snags. <b>20% chance of rain</b></i>		<b>East</b>	<b>H, I J, K L, M N, O</b>
	<b>Y Z</b>	<i>Rains did fall in this area however areas of heat will remain near Div Y/Z perimeter with possible flare-ups in moderate to high fuel loadings. Be heads-up for falling snags. <b>20% chance of rain</b></i>	<b>Race Pond</b>		<b>Race Pond Fire</b> <i>Very limited fire potential exists due to minimal heat sources and significant rainfall over the past few days. <b>20% chance of rain</b></i>

**Night Ops – No Night Operations are Planned.** Scattered showers and thunderstorms will continue with patchy fog developing after midnight.

**Air Operations:** Expect possible areas of heavy smoke especially on the west side of the fire.

**SAFETY:**

**WINDS –** Stay abreast of changing wx conditions throughout the entire shift. **THUNDERSTORMS -** these severe winds can create extreme fire behavior, with winds gusting over 30 mph. **SNAGS – Snags are falling in all Divisions – will be influenced by Thunderstorm outflow winds. FUELS:** Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. Stay focused, and put LCES in place before starting operations. Watch for standing burning snags that can fall without warning. *Energy Release Component (ERC) has dropped below the 50<sup>th</sup> percentile as rain fall is recorded.*

# ***SAFETY MESSAGE***

*Incident:*

Satilla Summer fires

*Date:* July 18, 2011

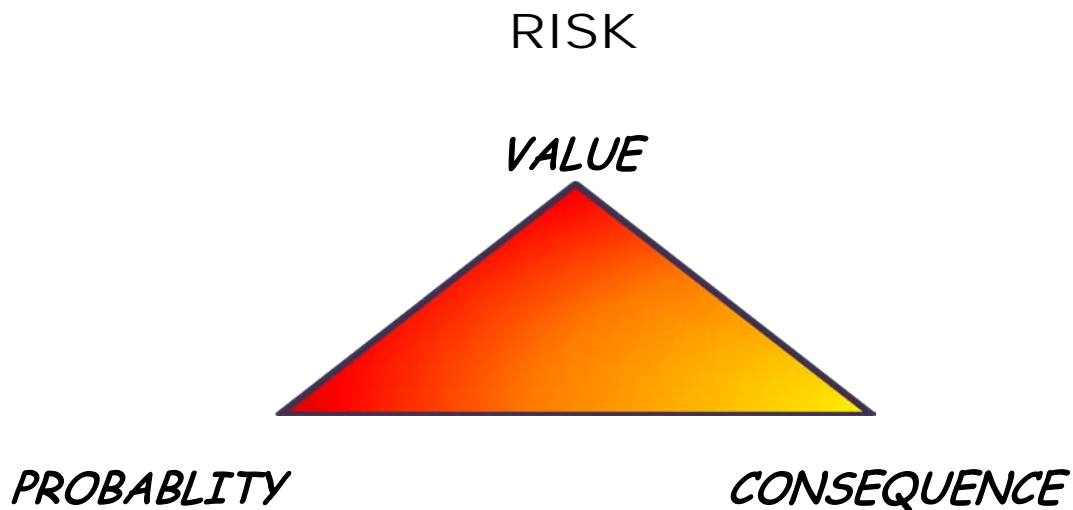

*Time:* 0700 - 1900 Hours

## ***Major Hazard and Risks - Risk Assessment:***

- **Salvage Operations in & Visitors to Park Area**
- **Vehicle Operations**
- **Demob**

## ***Narrative:***

- **Be alert for park visitors. Folks are starting to show up more frequently to visit park (by car & bike). Also, a timber salvage operation is expected to start this week on a tract alongside Park road. Be prepared to share the road with both groups.**
- **Check over your vehicles to make them road worthy before leaving here. Clean windows, mirrors, check & replace wipers, if necessary; inspect tires and make sure you give your ride a good once over. Follow the 10 hr/10 pm guidelines on driving back.**
- **A**

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

Prepared by (Communications Unit) Claude Gilleland – (678) 316-4615 Incident Dispatcher: 912-536-8047					<b>Cloning at ICP communications, briefings, and East Message Center.</b>						

The convention calls for frequency lists to show four digits after the decimal place, followed by either an “N” or a “W”, depending on whether the frequency is narrow or wide band. **Mode** refers to either “A” or “D” indicating analog or digital (e.g. Project 25) or “M” indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.
