25: Threat to Human Life/Safety: Evacuation(s) in progress						Residence				200			2	2
No evacuation(s) imminent						Commercial Property				1				
Potential future threat XX No likely threat						Outbuilding/Other				0			1	

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:

- 12 hours: Projected spread to the East and Northeast.
- 24 hours: Projected spread to the East and Northeast.
- 48 hours: Projected spread to the East and Northeast.
- 72 hours: Projected spread to the East and Northeast.
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundredd empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.
- 24 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundredd empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.
- 48 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundredd empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.
- 72 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundredd empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads.

## Powerlines.

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **15 Engines, 3 TFLD, 1 DIVS**24 hours: **15 Engines, 3 TFLD, 1 DIVS**48 hours: **15 Engines, 3 TFLD, 1 DIVS**72 hours: **15 Engines, 3 TFLD, 1 DIVS** 

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Extremely dry conditions make control difficult, spotting, large area of uncontrolled fire line, Thunderstorm activity with little rain. Firefighter fatigue. Sea breezes pose difficulties in line containment. Reburning due to needle fall in areas that were previously burned. Intensity has increased along the edges of the breaks in the south end. The communities of Manor, Millwood and Waresboro are threatened. The Ruskin School is threatened. Sea breezes in the evening causing a shift in fire movement. Heavy fuel loads in unburned stands and bays.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): 8 Max.

Temperature: 100

Wind Direction: **W** Min. Relative Humidity: **35** 

31: Fuels/Materials Involved: 7 Southern Rough

Palmetto, gallberry, titi, pine straw, ladder fuel, hardwood understory

32: Today's observed fire behavior (leave blank for non-fire events):

Fire continues to intensify due to high temperatures and interior burning with flareups and smoldering in areas along the control line. Bays are beginning to reburn within the green area. Several lines in the southern end are threatened due to SW winds heating fuels up. Reburning due to needle and leaf fall in areas that were previously burned.

33: Significant events today (closures, evacuations, significant progress made, etc.):

One spotover was reported at 1845 in the southern end (Division B)

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **3-4** Temperature: **98** Wind Direction: **W** Relative Humidity:

35

Relative Humidity: **30-** Date and Time:

35: Estimated
Control
Date and Time

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Control the active lines. Continue to add new control line and improve existing ones. Mopup in both divisions.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - High

2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?

Without a significant rain event, control is unlikely in the near future.

41: Projected demobilization start date: 07/15/2011 1400

42: Remarks:

Forecasted weather continues to be hot and dry.

43: Committed Resources (Supplemental Committed Resources follow the first block)
