25: Threat to Human Life/Safety: Evacuation(s) in progress						Residence			200			1	2
No evacuati		Commercial Property											
Potential fut No likely th		at <b>XX</b> 			Outbu	ıildin	g/Other		300	0			11

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:

12 hours: **E/NE**24 hours: **E/NE**48 hours: **E/NE**72 hours: **E/NE** 

27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:

12 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 24 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 48 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR vard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 72 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: 1 ST Type 6 Eng, 2 ST Type 5 Tractor/Plows with straight or 6 way blades, 3 DIVS

ICS-209 Form Page 2 of 3

24 hours: 1 ST Type 6 Eng, 2 ST Type 5 Tractor/Plows with straight or 6 way blades, 3 DIVS 48 hours: 1 ST Type 6 Eng, 2 ST Type 5 Tractor/Plows with straight or 6 way blades, 3 DIVS 72 hours: 1 ST Type 6 Eng, 2 ST Type 5 Tractor/Plows with straight or 6 way blades, 3 DIVS

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

30% chance of thunderstorms predicted tomorrow. Concern for new starts in the area due to frequent lightning. Firefighter fatigue. Once drying out occurs after the next few days, reburning due to needle fall in areas that were previously burned and still have some interior burning. The communities of Manor, Millwood and Waresboro are threatened. The Ruskin School is threatened. Heavy fuel loads in unburned stands and bays. Logging operations within the area is a concern for firefighter safety. Logging operations within the fire area are causing increase in fire activitie within the fire perimeter. Afternoon thunderstorms are blowing pine needles into the dozer line creating a potential for burning across the line. Personnel are having to continually clean the control lines where the straw has fallen.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): **12** Max.

Temperature: 92

Wind Direction: **NW** 

Relative Humidity: **50** 

31: Fuels/Materials Involved: 7 Southern Rough

Palmetto, gallberry, titi, pine straw, ladder fuel, hardwood understory

32: Today's observed fire behavior (leave blank for non-fire events):

Min.

#### Smoldering, Reburning

33: Significant events today (closures, evacuations, significant progress made, etc.):

# GA IMT2 began working with NE IMT in preparation for transition that will begin Thursday and Friday.

34: Forecasted Weather for next Operational			
	35: Estimated	26: Projected Finel	37: Estimated Final
Wind Speed (mph): <b>4-</b> Temperature: <b>92</b>	Control	36: Projected Final Size:	Cost:
Wind Direction: <b>W/NW</b> Relative Humidity:	Date and Time:	Size.	Cost.
49			

38: Actions planned for next operational period:

### Continue to mopup and monitor control lines and assist local district as needed.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential High
- 2. Difficulty of Terrain High

40: Given the current constraints, when will the chosen management strategy succeed?

Sustained rain will be needed to meet the incident objectives.

- 41: Projected demobilization start date: 07/15/2011 1400
- 42: Remarks:

.25 inches of rain was recieved overnight on the Sweat Farm Again Fire. An order for an infrared flight has been requested.

### 43: Committed Resources (Supplemental Committed Resources follow the first block)
