

Incident Status Summary (ICS-209)

1: Date 06/30/2011	2: Time 1600	3: Initial Update Final XX	4: Incident Number GA-GAS-011032	5: Incident Name SWEAT FARM AGAIN		
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)		7: Start Date Time 06/15/2011 1400	8: Cause Human	9: Incident Commander Schenk/Harvey	10: Incident Command Organization Type 2 Team	11: State-Unit GA-GAS
12: County WARE	13: Latitude and Longitude Lat: 31° 11' 52" Long: 82° 30' 59" Ownership: GA-GAS		14: Short Location Description (in reference to nearest town): 12 MILES W OF WAYCROSS			
15: Size/Area Involved 19,169 ACRES	16: % Contained or MMA 75 Percent	17: Expected Containment Date:	18: Line to Build 10 Miles	19: Estimated Costs to Date \$1,845,456	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period: 0	22: Injuries to Date: 0	23: Fatalities 0	24: Structure Information			
			Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- No evacuation(s) imminent -- Potential future threat ----- XX No likely threat -----			Residence	200	1	2
			Commercial Property			
			Outbuilding/Other	300		11
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Reburn potential increasing as conditions become hotter and drier. Burning will be interior of firebreaks but have the potential to cause spotting across containment lines. 24 hours: Reburn potential increasing as conditions become hotter and drier. Burning will be interior of firebreaks but have the potential to cause spotting across containment lines. 48 hours: Reburn potential increasing as conditions become hotter and drier. Burning will be interior of firebreaks but have the potential to cause spotting across containment lines. 72 hours: Reburn potential increasing as conditions become hotter and drier. Burning will be interior of firebreaks but have the potential to cause spotting across containment lines.						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 24 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 48 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines. 72 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing						

Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **2 DIVS**

24 hours: **2 DIVS**

48 hours: **2 DIVS**

72 hours: **2 DIVS**

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Concern for new starts in the area due to frequent lightning from previous thunderstorms. Firefighter fatigue. Once drying out occurs after the next few days, reburning due to needle fall in areas that were previously burned and still have some interior burning. The communities of Manor, Millwood and Waresboro are threatened. The Ruskin School is threatened. Heavy fuel loads in unburned stands and bays. Logging operations within the area is a concern for firefighter safety. Logging operations within the fire area are causing increase in fire activitie within the fire perimeter. Afternoon thunderstorms are blowing pine needles into the dozer line creating a potential for burning across the line. Personnel are having to continually clean the control lines where the straw has fallen.

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **16** Max.

Temperature: **94**

Wind Direction: **E** Min.

Relative Humidity: **44**

31: Fuels/Materials Involved: **7 Southern Rough Palmetto, gallberry, titi, pine straw, ladder fuel, hardwood understory**

32: Today's observed fire behavior (leave blank for non-fire events):

Fire behavior decreased today due to rainfall in the area on the night of 6/29/11. Smoldering in heavy fuels continues in heavy fuels.

33: Significant events today (closures, evacuations, significant progress made, etc.):

The NE Compact IMT (Schenk/Harvey) was transitioning with the GFC IMT (Floyd) today and will take control of the incident on 7/1/11 @ 0800

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **12** Temperature: **92**

Wind Direction: **E** Relative Humidity: **38**

35: Estimated Control Date and Time:

36: Projected Final Size:
19,169

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to mopup and monitor control lines and assist local district as needed.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

Sustained rain will be needed to meet the incident objectives.

41: Projected demobilization start date:

42: Remarks:

43: Committed Resources (Supplemental Committed Resources follow the first block)

CRW1	CRW2	HEL1	HEL2	HEL3	ENGS	DOZR	WTDR	OVHD	Camp	Total
