- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Reburns are becoming more frequent and continue to increase with hotter and dry weather predictied.
- 24 hours: Reburns are becoming more frequent and continue to increase with hotter and dry weather predictied.
- 48 hours: Reburns are becoming more frequent and continue to increase with hotter and dry weather predictied.
- 72 hours: **Reburns are becoming more frequent and continue to increase with hotter and dry weather predictied.**
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: The communities of Manor, Waresboro, Millwood and Waycross. The Ruskin school on Hwy 84. Private and industrial timberlands, WGXA TV Tower (Channel 8) on the NW corner. Waresboro RR yard has several hundred empty (not clean) railcars containing Anhydrous Ammonia HAZMAT ID#10. CSX and Norfolk Southern Railroads. Powerlines.
- 24 hours:
- 48 hours:
- 72 hours:
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: STEN and DIVS, 3 ST ENG6
- 24 hours: STEN and DIVS, 3 ST ENG6
- 48 hours: STEN and DIVS, 3 ST ENG6
- 72 hours: STEN and DIVS, 3 ST ENG6
- 29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
- Reburns are becoming more frequent and intense threatening containment lines and are

ICS-209 Form Page 2 of 3

likely to continue with hottier and drier weather predicted. The communities of Manor, Millwood and Waresboro are threatened. The Ruskin School is threatened. Heavy fuel loads in unburned stands and bays. Logging operations within the area is a concern for firefighter safety. Afternoon thunderstorms are blowing pine needles into the dozer line creating a potential for burning across the line. Personnel are having to continually clean the control lines where the straw has fallen.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): **19** Max.

Temperature: **94** 

Wind Direction: **SE** Min.

Relative Humidity: **37** 

31: Fuels/Materials Involved: **7 Southern Rough** 

Palmetto, gallberry, titi, pine straw, ladder fuel, hardwood

understory

32: Today's observed fire behavior (leave blank for non-fire events):

Reburns were more frequent and intense threatening containment lines in several places.

33: Significant events today (closures, evacuations, significant progress made, etc.):

The GFC Satilla district responded to the Pine Island fire in Camden Co. which was previously contained.

34: Forecasted Weather for next Operational

Period

Wind Speed (mph): **15** Temperature: **94** 

Wind Direction: SE

Relative Humidity: **39** 

35: Estimated Control

Date and Time:

36: Projected Final Size:

19,169

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to mopup and monitor control lines and assist local district as needed.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential Medium
- 2. Difficulty of Terrain High

40: Given the current constraints, when will the chosen management strategy succeed?

Sustained rain will be needed to meet the incident objectives.

- 41: Projected demobilization start date:
- 42: Remarks:

43: Committed Resources (Su	pplemental Committed	Resources follow	the first block)
