To: All Incident Personnel, West Mims Fire 2017

As the Unified Command Incident Commanders, we have a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #27	TYPE OF FIRE: Wildland
FIRE NAME: West Mims	OPERATIONAL PERIOD: 05/16/2017
DATE ISSUED: 05/15/2017	TIME ISSUED: 1800
UNIT: Okefenokee National Wildlife Refuge	Written: Kelly Cagle FBAN (t) Signed: Gary Jarvis FBAN

FUEL ASSUMPTIONS: Timber with shrub understory (pine plantation) will be the most active fuel type. Current fuel conditions are favorable for very active fire behavior within all fuel types. Expect all fuels to burn readily, including those that appear green. Re-burn potential is very high. Recent moisture is fading quickly.

The fuel moisture for today is:

Calculated 1 hr fuel 3%, 10 hr fuel 8%, 100 hr fuel 15%

ERC levels have fallen with recent rain, but will quickly rebound with return of dry weather.

Critical fire behavior thresholds: 1 HR Fuel Moisture <6%, RHs below 40% and a Dispersion Index greater than 60.

- **WEATHER:** Patchy fog early. Otherwise mainly clear skies. Wind (20ft): ESE 6 to 10. Gusts to 15 mph during the afternoon. Max temp: 92-96 Min RH: 23-28% LAL 1
- **Chance of Rain: 0 %** Amount: 0 Mixing Ht: 6700 Transport Wind Speed: SE at 15 mph
- **Dispersion: 80**

General Fire Behavior Forecast: Fuels have dried sufficiently to ignite and burn readily -especially in open stands of pine w/palmetto understory. Remember – these fuels were extremely conditioned from weeks of dry weather. Do not underestimate their potential. Significant activity is possible, with spotting and sustained runs. Initial attack is high probability. New starts could organize quickly and begin to move. Dispersion of 80 is a watchout! Today could potentially be a very active fire day!

SPECIFICS: All divisions- Smoldering and Creeping in previously burned areas. Potential for re-burn returns. Unburned pockets of interior fuels could begin to consume as well.

Major fire activity in Okefenokee Swamp is not expected today, but some activity quite possible.

Initial Attack should plan for activity. Reference lightning map. New fires have potential to develop deceptively quickly.

PREDICTIONS FOR MOST ACTIVE TIME OF PEAK BURNING PERIOD USING WEATHER FROM INCIDENT IMET

Fuel Model	Fire Behavior
SH 3 (shrub in the swamp)	ROS 4 to 9 ch/hr (less than .1 mph) FL 2 to 4 feet average
7 (Timber w/shrub palmetto)	ROS 32 to 54 ch/hr (.35 to .65 mph) FL 6 to 9 feet average
8 Timber Litter (Pine needles in re-burn areas)	ROS 2 to 3 ch/hr (less than .1 mph) FL 1 to 2 ft. (higher Flame lengths could be expected where shrub component remains and consumes)
Spotting	.25 miles is likely. .5 miles could not be ruled out.
Probability of Ignition	91%

AIR OPERATIONS: Patchy clouds early. Will likely burn off between 9 and 10 am.

FIRE BEHAVIOR SAFETY: Okefenokee Swamp is famous for producing fires that come alive after substantial rainfall. In fact – that is almost the norm. Do not be complacent about this particular fire. It has enormous potential.

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team

INCIDENT: West Mims Fire	DATE: Tuesday, May 16, 2017
Major Hazards & Risks: Driving, Fire Behavior, WUI, Aviation, Heat	
<p>Driving: <i>Be sure your lights are on, especially if you are driving a strange vehicle. Defensive driving begins with the right attitude. On the drive to your motel tonight and back to briefing in the morning, watch out for wildlife and pedestrians. If you drive on dirt roads, clean your air filter and radiator to prevent over heating of your engine.</i></p> <p>Fire Behavior: <i>Today’s fire behavior will be active, but not extreme. Active fire can still present a hazard. A tractor plow operator was caught in a burn-over situation on a wildfire south of our incident the day after rain. Don’t be fooled into thinking conditions are not hazardous. Before engaging on initial attack fires, complete your risk management and conduct a thorough briefing.</i></p> <p>Wildland Urban Interface: <i>Wildland Urban Interface presents special hazards to fire fighters. Utilities, tanks, hazardous materials, people and pets are often found. Look closely, especially on new fires. Take the time to read the IRPG pages 12-16.</i></p> <p>Aviation: <i>With increasing fire behavior, there will likely be more aircraft missions. Keep your eyes open for aircraft hazards and be prepared to speak up quickly.</i></p> <p>Heat: <i>Temperatures will be very warm so drink plenty of fluids and pace yourself.</i></p>	

WATCHOUT

- *Distraction from primary task*
- *Fatigue*
- *Stress Reactions*
- *Hazardous Attitudes*

Red Team Safety Officers: Brad, Mike, Tony, Larry & Ivan

IWI IC Responsibilities:

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment (9 Line) and first aid. Request additional medical resources on division/branch or across incident. Transmit 9 Line patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

Spanish Moss

Spanish moss is one of the first things newcomers will notice here. It appears to hang everywhere! What is this scary, beautiful, intriguing, and perhaps annoying plant? Spanish moss is a bromeliad - it is in the same taxonomic family as pineapples.

This rootless plant prefers to grow on trees, used simply as a support. The moss is not a parasite. It thrives on rain, fog, sunlight, dust and debris. The outer layer of Spanish moss is covered by tiny scales that trap water until it is absorbed. In dry periods, it can go dormant.

Native Americans had many uses for Spanish moss. Later, it was used as padding in automobile seats, furniture, mattresses and, even insulation in homes. Bats, reptiles and, amphibians use moss clumps for shelter. Song birds often use it to build nests. Las Vegas tend to get creative with it.

Chiggers are often found in Spanish moss.

Finance Notes

The following resources need to see equipment time:

E-569.3 – Need mileage

E-470.3; E-484; E-569.4 – Need start and stop time

E-401; E-671 – Missing signature(s)

Notes for All Resources:

- **Submit** CTRs and/or shift tickets **daily**. Ensure that each is dated, signed by the incident supervisor, and includes your name (or the identification information for your equipment).
- **Include** your request number (i.e., E-1, O-1, C-1) on CTRs and shift tickets. For shift tickets, put the number in the upper right hand corner.
- **Record** meal breaks taken during your operational period, with a minimum of one during each shift. If no meal break is recorded, justification must be included in remarks.
- **Document** the reason for Hazard Pay or other differential (i.e., Environmental Pay) in remarks. The most common reasons for Hazard Pay are:
 - Helicopter ground operations under hovering helicopter (attaching slingloads)
 - Uncontrolled fireline duty (line construction, patrol, mop up, felling, etc).
*(This **does not** include non-suppression activities, e.g., media tours, incident personnel driving to the fire to observe activities, and drivers delivering tools or personnel.)*
 - Limited control flights
- **Document and mitigate excessive shifts:** If you must work more than 16 hours in an operational period, record why in remarks. In succeeding shifts, show that you mitigated the fatigue by taking off one hour for each two that you worked over 16.

If you respond to **Initial Attack**, please note on the CTR or Shift Ticket.

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.
