## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY SHIFT 0830-2030</b>	
WEST MIMS	Date/Time From: 05/06/2017 0830 SAT	Date/Time To: 05/06/2017 2030 SAT
<b>3. Objective(s):</b>		
<ul style="list-style-type: none"> <li>• Provide for the safety and security of incident personnel and public in all incident operations through sound risk assessment and hazard mitigations.</li> <li>• Maintain a positive working relationship with all adjacent landowners, cooperators State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.</li> <li>• Confine all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible.</li> <li>• In cooperation with local timberland owners, use full suppression strategies and tactics to minimize damage to private timberlands and improvements and to prevent fires outside the Refuge from entering the Refuge.</li> <li>• Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Unified Incident Commanders.</li> <li>• Protect all cultural and archeological sites and structures within the refuge.</li> <li>• Manage the fires cost-effectively consistent with the values at risk.</li> <li>• Implement structure protection as necessary for at-risk facilities and communities.</li> <li>• Coordinate suppression actions with assigned Refuge Resource Advisors to protect endangered species.</li> <li>• Conduct all operations in a harassment-free environment. There will be a no tolerance atmosphere for harassment, alcohol, or illegal drug use. Everyone will be treated with dignity and respect.</li> </ul>		
<b>4. Operational Period Command Emphasis:</b>		
Keep fire within the Okefenokee Refuge Swamp Edge Break Boundary. Respond to initial attack fires on new starts within: *South of Suwannee Canal *Within the Okefenokee jurisdictional boundaries *Within state properties inside Perimeter Road *North of GA 94/FL 2		
<b>General Situational Awareness:</b>		
Utilize; confine, contain, and point source protection strategies and tactics that commit operations personnel only where and when they can be successful, under conditions where important values at risk are protected with the least exposure.

**To: All Incident Personnel, West Mims Fire 2017**

As the Unified Command Incident Commanders, we have a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: #17</b>	<b>TYPE OF FIRE: Wildland</b>
<b>FIRE NAME: West Mims</b>	<b>OPERATIONAL PERIOD: 05/06/2017</b>
<b>DATE ISSUED: 05/05/2017</b>	<b>TIME ISSUED: 1800</b>
<b>UNIT: Okfeenokee National Wildlife Refuge</b>	<b>SIGNED: Gary Jarvis FBAN 251.288.1084</b>

### FUEL ASSUMPTIONS:

Primary fuels consist of shrub, shrub with pine overstory and timber litter. Current fuel conditions are favorable for very active fire behavior within all fuel types. The current drought conditions have led to both live and dead fuel moistures to reach critical levels. Expect all fuels to burn readily, including those that appear green.

### The fuel moisture for today is:

Calculated 1 hr fuel 4%, 10 hr fuel 8%, 100 hr fuel 14%

### ERC levels have been above 97 Percentile

**Critical fire behavior thresholds:** 1 HR Fuel Moisture <6%, RHs below 40% and a Dispersion Index greater than 60.

WEATHER: Mostly sunny and drier. A little warmer. Gusty west winds.

WIND (20 FT): W 10-15 gusts to 20-25 mph.

MAX TEMPERATURES: 77-82 MIN RH: 23-27%

LAL: 1 CHANCE RAIN: 0%

DISPERSION (MAX): 85 MIXING HEIGHT: 5500 TRANSPORT WINDS: WNW 20-25 mph

### General Fire Behavior Forecast: ... Potential for large fire growth...

Active burning should be expected in all areas of the fire that have available fuel. If the fire gets established in pine plantations very high rates of spread should be expected. Short and long range spotting should be expected ahead of the fire.

### SPECIFIC:

**DIV A/O:** Fire will continue to burn between Soldier Island and the swamp edge break to the southeast where fuels will allow. On the west portion of DIV A, watch for re-burn along the perimeter. Be on the lookout for long range spotting from interior burning.

**DIV B/C:** Re-burn potential is very high today.

**DIV D/E:** Billy's Island will continue flanking and backing to the south at a moderate intensity.

**DIV M/N:** West wind will push smoke across containment lines. Expect spotting to occur when this happens. The control lines will be tested today due to high winds and low humidity.

### PREDICTIONS FOR MOST ACTIVE TIME OF PEAK BURNING PERIOD USING WEATHER FROM INCIDENT IMET

Fuel Model	Fire Behavior
Shrub (Swamp)	ROS 15 to 30 ch/hr (.2 to .4 mph), FL 4-6 ft.
Timber w/shrub (palmetto)	ROS 52 to 80 ch/hr (.6 to 1 mph) FL 8-11 ft
Timber Litter (Cypress)	ROS 2 to 6 ch/hr (<.1 mph), FL 1-2 ft
Spotting	.2 miles shrub and .5 miles torching pine
Probability of Ignition	76%

**AIR OPERATIONS:** High transport winds could cause turbulence above 2000 ft. It could be a bumpy ride up there today!

**FIRE BEHAVIOR SAFETY:** LCES. Have your lookouts posted, communications in place and tested, escape routes identified and tested and safety zones identified and clearly marked. It's a heads-up day!!!!

Task: Patrol and mop up within 50 ft of fire perimeter. Respond to any new starts within Div. Prep fireline as needed around logging debris. Determine and report contained line to Planning OSC1.						
End State: Confine fire perimeter to reduce threats and minimize damage to private timberlands and resources values at risk.						
<b>7. Special Instructions:</b>						
Ensure LCES are in place before operations begin & stay hydrated. Drive defensively and with lights on at all times. Identify escape routes. Logging operations have started. Stay clear of cutting areas. DOZ1 w/KG Blade Ware 76, E-138, Hilton Bennett is working with Gilyard Logging Operations on Fortner Property. Please be mindful of logging operations that will be ongoing. Ensure that all personnel stay clear of felling operations. Pay attention for potential reburn in logging area. Work with Gilyard Logging foreman on any suppression actions within the logging area.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

## HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team*

<b>INCIDENT:</b> West Mims Fire	<b>DATE:</b> Saturday, May 6, 2017
<b>Major Hazards &amp; Risks:</b> Fire Behavior, Driving, Heavy Equipment, Snags	
<p><b>Fire Behavior:</b> <i>Potential for <u>S</u>ignificant <u>F</u>ire <u>B</u>ehavior exists over the fire area today due to higher wind gusts and dry fuel and air conditions. Make sure you have <b>LCES</b> in place before engaging. Set Management Action Points and be prepared to disengage and reassess early if necessary.</i></p> <p><b>Driving:</b> <i>Distracted driving is the cause of many accidents. In fact -More than <b>45,000</b> crashes occurred by distracted drivers in Florida in 2015, resulting in more than <b>200</b> fatalities and more than <b>39,000</b> injuries. Avoid driving distracted.</i></p> <p><b>Heavy Equipment:</b> <i>A lot of equipment is working in and around this incident. Know your travel routes, both capacity and clearances. Fire equipment should have an equipment boss to assist in safe operations. <b>Stay clear of equipment work areas</b> – a minimum of 2.5 tree lengths. Use extra caution around logging equipment in the fire area.</i></p> <p><b>Snags:</b> <i>Heads-up for snags. Keep personnel out of the immediate area of snags and widow makers. Try to work away from the danger zone of potential falling snags. Flag or remove snags in work areas to mitigate the hazards.</i></p>	
 <p>16.GETTING FREQUENT SPOT FIRES ACROSS LINE</p>	<p><b>L.C.E.S.</b></p> <ul style="list-style-type: none"> <li>• Post lookouts with appropriate experience.</li> <li>• Maintain Communications with resources.</li> <li>• Mark Escape Routes and time for slowest resource.</li> <li>• Properly size and identify safety zones.</li> </ul>

**IWI IC Responsibilities:**

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment (9 Line) and first aid. Request additional medical resources on division/branch or across incident. Transmit 9 Line patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

## Why “RSB 1979” on all the sleeves?

Richard Simpson Bolt, Jr., age 48, a Biological Technician on Okefenokee National Wildlife Refuge from July 12, 1974 until February 28, 1979 was mortally burned while attempting to plow out a wildfire in “The Pocket” of Okefenokee National Wildlife Refuge on February 15, 1979. Richard was burned over 70% of his body and survived for 13 days while being treated at the Brooke Army Medical Center in Fort Sam Houston, Texas before succumbing to his injuries.

Richard began his U.S. Fish and Wildlife Service career on June 1, 1964 as a temporary bulldozer operator on Santee National Wildlife Refuge in South Carolina. He became a career employee while stationed at Eufaula National Wildlife Refuge, Alabama. Subsequently, Richard served in a highly commendable manner on Key Deer and Loxahatchee National Wildlife Refuge in Florida before coming to Okefenokee.

Richard was a truly dedicated refuge employee. He gave his all and ultimately, his life, to the profession of which he was so very proud. Richard will always be remembered as an example in his private and professional life. He will be missed by all who knew him, and those that never knew this man will be less than they might have been.

RICHARD S. BOLT, JR.  
1930 - 1979

Richard’s radio number, while he was stationed at Okefenokee, was “Unit 3”. From this time on, “Unit 3 is hereby retired as a memorial to a splendid human being.

John R. Eadie  
Refuge Manager  
March 14, 1979
