To: All Incident Personnel, West Mims Fire 2017

As the Unified Command Incident Commanders, we have a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #18	TYPE OF FIRE: Wildland
FIRE NAME: West Mims	OPERATIONAL PERIOD: 05/07/2017
DATE ISSUED: 05/06/2017	TIME ISSUED: 1800
UNIT: Okfenokee National Wildlife Refuge	SIGNED: Gary Jarvis FBAN 251.288.1084

FUEL ASSUMPTIONS:

Primary fuels consist of shrub, shrub with pine overstory and timber litter. Current fuel conditions are favorable for very active fire behavior within all fuel types. The current drought conditions have led to both live and dead fuel moistures to reach critical levels. Expect all fuels to burn readily, including those that appear green.

The fuel moisture for today is:

Calculated 1 hr fuel 3%, 10 hr fuel 8%, 100 hr fuel 14%

ERC levels have been above 97 Percentile KBDI 712

Critical fire behavior thresholds: 1 HR Fuel Moisture <6%, RHs below 40% and a Dispersion Index greater than 60.

WEATHER: Mostly sunny, continued dry and warmer
 WIND (20 FT): WNW 8-12 gusts up to 25 mph.
 MAX TEMPERATURES: 80-85 MIN RH: 24-29%
 LAL: 1 CHANCE RAIN: 0%
 DISPERSION (MAX): 85 • MIXING HEIGHT: 6000 TRANSPORT WINDS: WNW 20-25

General Fire Behavior Forecast: ... High Potential for large fire growth...EXTREME CONDITIONS

Active burning should be expected in all areas of the fire that have available fuel. If the fire gets established in pine plantations very high rates of spread should be expected. Short and long range spotting should be expected ahead of the fire.

SPECIFIC:

DIV A/O: Fire will continue to burn between Soldier Island Camp RD and the swamp edge break to the southeast where fuels will allow. The Fowls Roost area will continue to burn and create potential for spotting across the control lines. On the west portion of DIV A, watch for re-burn along the perimeter. Be on the lookout for long range spotting from interior burning.

DIV B/C: Re-burn potential is very high today.

DIV D/E: Billy's Island will continue flanking and backing to the south at a moderate intensity.

DIV M/N: This area will be very active today. Winds will push smoke across containment lines. Expect spotting to occur when this happens. The control lines will be tested today due to high winds and low humidity.

PREDICTIONS FOR MOST ACTIVE TIME OF PEAK BURNING PERIOD USING WEATHER FROM INCIDENT IMET

Fuel Model	Fire Behavior
Shrub (Swamp)	ROS 15 to 30 ch/hr (.2 to .4 mph), FL 4-6 ft.
Timber w/shrub (palmetto)	ROS 55 to 100 ch/hr, (.6 to 1.2 mph) FL 8-11 ft
Timber Litter (Cypress)	ROS 2 to 6 ch/hr (<.1 mph), FL 1-2 ft
Spotting	.2 miles shrub and .5 miles torching pine
Probability of Ignition	87%

AIR OPERATIONS: No issues for aviation. Clear Sky.

FIRE BEHAVIOR SAFETY: LCES. Have your lookouts posted, communications in place and tested, escape routes identified and tested and safety zones identified and clearly marked. It's a heads-up day!!!!

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team

INCIDENT: West Mims Fire	DATE: Sunday, May 7, 2017
Major Hazards & Risks: Extreme Fire Behavior, WUI, Heavy Equipment	
<p>Fire Behavior: More <u>Extreme Fire Behavior</u> expected over the fire area today due to, a dry cold front passage, high temps, wind gusts, and continued very dry fuel. Remember to have LCES in place before engaging. Set Management Action Points and be prepared to disengage and reassess early if necessary.</p> <p>WUI: Anticipate incident and public traffic. Avoid congestion and have an adequate escape route. Make sure the structure is defensible and there are adequate safety zones for personnel and equipment. Assure adequate water source. Identify and mitigate hazardous materials and fuel tanks. Be aware of and avoid powerlines. If you cannot address all of the above do not commit to stay and protect the structure.</p> <p>Heavy Equipment: There is lots of equipment working in and around the fire including very congested areas. Use spotters while backing. Park vehicles so transports, engines and water tenders can get past you on all roads. Know your travel routes, both capacity and clearances. Obey bridge rating signs. Equipment boss needed to assist in safe operations. Stay clear of equipment work areas – a minimum of 2.5 tree lengths.</p> <p>Speak Up: If you see something say something. Whether it is stopping an unsafe act, letting your co-worker know that they don’t look well, or maybe you’re not feeling well. Speak up and avoid a potentially dangerous or advanced medical situation.</p>

IWI IC Responsibilities:

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment (9 Line) and first aid. Request additional medical resources on division/branch or across incident. Transmit 9 Line patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

Media Interviews

We encourage you to talk to the media if you are approached by a reporter. Feel free to talk about what you are doing on the fires and refer the reporter to an information officer if you are asked questions that are not in your lane. Here are some media tips from the professionals. Find more on page 95 of your Incident Response Pocket Guide.

If a reporter approaches you, ask:

- What is the story about?
- Who else have you talked to?
- What did they say?
- Are you talking to anyone else?
- What is your deadline? (Buy time so you can prepare.)

To be persuasive, a message must:

- Be directed to an audience (the reporter is not the audience.)
- Communicate a benefit or relevance to the audience.
- Reinforce your “brand.”

A reporter interview is not a conversation.

Say only what you want to say.

- Know what the story is about before the interview.
- Prepare messages in advance.
- Anticipate likely questions.
- Give the headline first.
- Repeat your key messages.
- Keep it simple.
- Be brief. Say it with conviction.
- Tell the truth.
