INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	DAY SHIFT 0730-193	0	
WEST MIMS	Date/Time From:		Date/Time To:	
	05/24/2017 0730	WED	05/24/2017 1930	WED

3. Objective(s):

• Provide for the safety and security of incident personnel and public in all incident operations through sound risk assessment and hazard mitigations.

• Maintain a positive working relationship with all adjacent landowners, cooperators State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.

• Confine all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. Aggressively suppress all fire outside the swamp edge boundary.

• In cooperation with local timberland owners, use full suppression strategies and tactics to minimize damage to private timberlands and improvements and to prevent fires outside the Refuge from entering the Refuge.

• Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Unified Incident Commanders.

- Protect all cultural and archeological sites and structures within the refuge.
- Manage the fires cost-effectively consistent with the values at risk.
- Implement structure protection as necessary for at-risk facilities and communities.
- Coordinate suppression actions with assigned Refuge Resource Advisors.

• Conduct all operations in a harassment-free environment. There will be a no tolerance atmosphere for harassment, alcohol,

- or illegal drug use. Everyone will be treated with dignity and respect.
- Identify and initiate suppression repair on all Divisions.

4. Operational Period Command Emphasis:

Branch IV Keep fire East of the North Prong of St Mary's River; West of Nassau county Florida; and North of Baker county Florida

Branch III Keep fire North of Rayonier Road 10, West of St Mary's River, and South of Stokes Road

Keep fire within the Okefenokee Refuge Swamp Edge Break Boundary. Respond to initial attack fires on new starts within: *South of Suwannee Canal

*Within the Okefenokee jurisdictional boundaries

*Within state properties inside Perimeter Road

General Situational Awareness:

Utilize confine, contain, and point source protection strategies and tactics that commit operations personnel only where and when they can be successful, under conditions where important values at risk are protected with the least exposure.

To: All Incident Personnel, West Mims Fire 2017

As the Unified Command Incident Commanders, we have a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of "NO ALCOHOL" from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places "Safety First, every time on every Incident." We expect nothing less.

/s/ Keith Mousel /s/ Mike Quesinberry Incident Commanders

Fire Weather Forecast

FORECAST NO: 47 **PREDICTION FOR: Wednesday** SHIFT DATE: May 24, 2017 FORECAST ISSUED: 1800 May 23, 2017

NAME OF FIRE: West Mims Fire UNIT: Okefenokee National Wildlife Refuge Incident Meteorologist: Joe Goudsward 240-778-5279

Widespread showers and thunderstorms expected today and tonight. DISCUSSION:

A strong storm system will continue to make its way across the region today and tonight. As the system passes, several waves of heavy rain are expected. The atmosphere is very moist and unstable and several of the storms will be strong to possibly severe, especially during the afternoon. In this environment, strong gusty winds, lightning and heavy rain is possible with any thunderstorm. Breezy conditions are still expected outside of thunderstorm activity. Much drier conditions return Thursday and beyond. Breezy conditions will continue Thursday.

WEDNESDAY:

- WEATHER: Cloudy. Showers and thunderstorms likely. Some storms may be strong with gusty winds and locally heavy rain.
- WIND (20 FT): SW 12 to 20 mph with gusts near 25 mph.

٠	MAX TEMPERATURES: 80-8	5	MIN RH: 59-64%
٠	LAL: 4	CHANCE RAIN: 90%	DISPERSION (MAX): 70
٠	MIXING HEIGHT: 3200	RAINFALL: 1.00" to 1.50"	TRANSPORT WINDS: SW 40 mph

WEDNESDAY NIGHT:

- WEATHER: Showers and Thunderstorms likely in the evening, precipitation chances decreasing towards morning. Gusty SW winds will continue through the night.
- WIND (20 FT): SW 10 to 15 mph with gusts near 20 mph, decreasing towards morning.
- MIN TEMPERATURES: 60 to 65 MAX RH: 95-100% MAX LVORI: 10
- LAL: 3 CHANCE OF RAIN: 90% early RAINFALL: .50 to .75"

HOURLY WEATHER FORECAST (LST) Wednesday 1000 through Thursday 0800

HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU

Every person must have a briefing prior to going on line

INCIDENT: West Mims Fire	DATE: Wednesday Day/Swing, May 24, 2017
---------------------------------	--

- ➢ SITUATIONAL AWARENESS
- ➢ FATIGUE
- > DRIVING & TRAFFIC
- SEVERE WEATHER
- ➢ RISK MANAGEMENT

The fire is much quieter now but one of the common denominators of tragedy fires is "... deceptively quiet areas of large fires". Keep situational awareness in place throughout the entire operational period as your location changes.

Fatigue starts to affect an individual after only a few days. Follow the work/rest guidelines and mitigate longer shifts as soon as possible.

We are driving many miles on this incident. Non-fire traffic won't pay sufficient attention to us so drive defensively with lights and seatbelts on at all times.

When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm.

Practice intentional risk management: assess hazards, identify consequences and the risk of occurrence, develop and implement controls....review your IRPG, Green Section, Page 1.

Say Hump Day One More Times

Happy Wednesday

INCIDENT SAFETY ANALYSIS 215a

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Train Traffic	 Observe warning signs when crossing tracks. If no warning lights are posted, bring vehicle to a complete stop and check for incoming trains before crossing. Use caution when crossing tracks with low vehicles or trailers. Contact CSX to ensure awareness to fire resource locations.
ALL	Helicopter Operations	 Helicopter operations should be used for priority missions. Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Pilots or air supervisor ensure ground resources are clear before bucket drops. Monitor A-G communications. Follow aviation safety guidelines in IRPG and IHOG. Ground resources advise pilot of local power lines and local visibility issues.
A, B, C, D, O, Z, Contingency, IA	Power Utilities	 Notify all personnel of down electrical lines. Refer to the IRPG page 24 for Power Line Safety. Always treat downed wires as energized. Identify and avoid high tension transmission lines. In high winds or areas of dense smoke, avoid areas under power lines. Be aware of utility restoration in your work area.
ALL	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Ensure positive communication with all air resources. Ensure communications are established with operators. During airtanker operations clear the drop zone before approach of the lead plane.
ALL	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 13-15. Follow "HAZMAT Incident Operations" on pages 34-36 in IRPG. Identify and avoid damaged gas service near structures.
ALL & ICPs	Tornado	 Take shelter immediately. ~Go to a pre-designated area such as a safe room, basement, storm cellar, or the lowest building level. ~Most injuries associated with high winds are from flying debris, so remember to protect your head. ~Wear your PPE. ~If shelter is unavailable or there is no time to get indoors, lie in a ditch or low-lying area or crouch near a strong building. ~get out of the vehicle and lie in a ditch or low-lying area away from the vehicle. ~Stay alert to the potential for flooding
B, C, O, Y	Logging Operations	 Stay clear of active cutting operations. If re-burns occur, stop cutting operations before entering the area. Use caution when logging equipment is in the area or traveling on the roads. Maintain communication with logging operation during operational period. Logging operations have the potential to create new fire starts.
ALL & ICPs	Driving & Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Always use spotters when backing. Honk horn to alert personnel when backing. Keep clutter off dash and inside cab. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. Always use headlights. Yield to pedestrians and bicycles. Observe posted speed limits. Use the 3 second rule for following distance when driving. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, radio). Ensure that windshields are kept clean of dust and bugs. Use caution when traveling on roads that are impacted by smoke or dusty conditions. When feasible, coordinate travel to and from the hotels to ensure two or more personnel travel together to mitigate long distances.
ALL	Cold Front Passage	 Watch for wind shifts during the frontal passage. Be prepared for heavy rains associated with a wet cold front. Cold fronts generally move from northwest to southeast. The air behind a cold front is noticeably colder and drier than the air ahead of it.
ALL	Personal Hygiene	 Don't share personal items such as water bottles communication devices and utensils. Wash hands before meals, and after use of rest room facilities.
ALL	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. When working in bay areas, be aware of cypress trees. There are reports of them beginning to fall, due to burned out root systems.

INCIDENT SAFETY ANALYSIS 215a

		Mointoin high visibility is work area and wassured while is reaching.
ALL	Swing Shift	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards that are readily visible. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazards.
ALL	Fireline Hazards	 Establish and continue to validate LCES. Avoid radiant heat by wearing appropriate PPE correctly. Use correct tool for task assigned. Follow power line safety protocol as outlined on page 24 in IRPG. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations on pages 10-11 in IRPG.
ALL	Injury & Medical Emergency	 Assist injured employee and provide appropriate medical care. Use EMT's on Division for initial care. Follow medical protocol as outlined in ICS-206 (IWI) & IRPG Pgs 99-108
ALL	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Use clear terminology, ask questions and ensure good understanding, especially with new resources. Utilize the ICS 205. Utilize the ICS 205. Utilize human repeaters when working in dead spots. Know who to contact in case of an emergency and practice the IWI protocol and 9 Line Add Boom for Divisions E & F is necessary to improve commucations.
ALL	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing.
ALL	Poisonous Plants	~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.
ALL	Indirect Fire line	 Post lookouts, identify escape routes and safety zones (IRPG pg. 6). Review "Strategy/Indirect Attack" (IRPG pg. 77).
ALL	Severe Weather	 Review and follow Thunderstorm Safety guidelines in IRPG page 21. Observe 30/30 Rule for lightning safetypage 21, IRPG. Establish "Trigger Points" to withdraw, and ensure all know rally site. Use "Risk Management" process to determine retreat criteria and actions. Carry rain gear and extra food and water if weather limits retreat to ICP. `Adhere to direction found in Tornadoe Safety and Evacuation Plan
ALL	Wildlife	 Watch out for wildlife inside fire area and along roadways including bears, alligators, snakes, hogs, and deer. Clean up all debris and trash during each operational period. Don't feed or harass the animals.
ALL	Fatigue & Over Exertion	 Drink 1 quart of water/sports drink each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines. Mitigate before next shift.
ALL	ATV/UTV use	 Ensure equipment is inspected and safe to use Restrict UTV's to max width of 50" on ATV trails due to width and severe outsloped conditions. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Red Book. At a minimum a hardhat with chin strap secured should be worn at all times. If your agency requires more advanced helmets and protection, follow your agency policy.
ALL	Fog	 Obey posted speed limits at all times. Visibility may be limited to 1/2 mile in areas. If driving in a convoy, maintain a safe distance between vehicles for emergency stops and distance. Don't use high beam lights while driving, it can impair the vision of the driver and oncoming traffic.
ALL	Bees, Ticks, Mosquitoes, Spiders, Chiggers	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection Keep affected area clean and bandaged. Be extra careful wen eating and/or drinkiing to avoid stings to mouth and throat.

IWI IC Responsibilities:

-Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications -Assign or begin patient assessment (9 Line) and first aid.

-Determine patient transportation through consultation with line medical personnel and Medical Unit Leader.

-Order transportation resources through Communications as early as possible.

-Notify Communications as resources arrive and any patient status changes.

-Names of injured or deceased individuals will not be transmitted on the radio.

-Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation.

-Conduct an After Action Review to determine successes, areas to improve and lessons learned.
