To: All Incident Personnel, West Mims Fire 2017

As the Unified Command Incident Commanders, we have a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of "NO ALCOHOL" from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places "Safety First, every time on every Incident." We expect nothing less.

/s/ Keith Mousel /s/ Mike Quesinberry Incident Commanders

FUEL ASSUMPTIONS: Fuel types include timber litter (reburn fuels), brush fuels that represent the organic swamp and bayhead fuels. The high risk fuel is the pine plantation overstory with the palmetto/gallberry brush understory commonly referred to as southern rough. Live canopy fuel moistures in pines and brush are below average and will support active crown fire when critical fire weather and above fuel dryness is present. Current fuel dryness as represented by KBDI and ERC G is above normal.

KBDI is 586 or 85th percentile and ERC G is 32 or 75th percentile.

Calculated 1 hour fine dead fuel moisture: 7%

10 hour fuel moisture 9%

100 hour fuel moisture: 16%

WEATHER SUMMARY: 20% chance for late afternoon thunderstorms.

Fire Environment Conditions present for large fire growth day on May 5th (run that threatened St. George)

Fuel dryness and fire weather combined to produce significant fire growth of 18,000 acres with an initial run that was 9 miles in length. This growth initiated in swamp brush fuels east of Soldier Camp and burned out of the refuge into high risk pine plantation fuels. Fuel dryness was extremely dry with KBDI over the 97th percentile at 720. ERC was at the 85th percentile at 37. Wind was the major weather driver of this fire growth. Windspeeds at Jacksonville Airport were sustained from the west at 28 mph with gusts to 40 mph. Max temperature was 75. Minimum RH was 30%. Burning index G was over the 97th percentile at 49. Average rate of spread was estimated at just over 1 mph. Active crown fire produced spotting out to 1 mile.

Specific: All Branches: Surface fuels will continue to dry out and become available to burn. Piles and muck fuels will continue to hold heat and smolder. Needle cast in previously burned areas will re-burn where ignitions occur. Today's combination of fuel dryness and fire weather will produce surface fires that are moderately resistant to control when in the high risk pine plantation fuels. Peak burning conditions are occurring late in the day between 1600 to 1800 hours.

| Fuel Type | Rates of Spread | Flame Length | Max Spot Distance | Probability of Ignition | Torching / Crowning Potential / Flame Lengths |
|---|-----------------|-----------------|----------------------|-------------------------|--|
| 20' winds @ 6-8 | | | | a substitution (i.e. | |
| Southern Rough(pine w/palmetto/gallberry) | 10-15 ch/hr. | 4-6 feet | 50 feet | 50% | Torching in brush canopy |
| Timber Litter (pine litter reburn) | 1-2 ch/hr. | 1 feet | 0 feet | 50% | No torching |
| Brush (Swamp SH3) | 1-2 ch/hr. | 2-3 feet | 50 feet | 50% | Torching in brush canopy |

AIR OPERATIONS: 20% probability for thunderstorm activity in fire area

FIRE BEHAVIOR SAFETY:

Taking weather observations during the afternoon will allow firefighters to make adjustments to fire behavior and fire weather forecasts if needed. For example....if temperatures are higher than forecast and RH is lower than forecast then fine dead fuel moisture will be lower than forecast. Lower fine dead fuel moisture will produce higher rate of spread and flame lengths than forecast and ultimately increase the fires resistance to control.

Purpose

• Keep fire north of GA 94/FL 2.

End State

• Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

7. Special Instructions:

Ensure LCES is in place before operations begin and stay hydrated. Drive defensively and with lights on at all times. Identify escape routes.

Use caution when working around logging operations.

6. Control Operations/Work Assignments:

Task

- Patrol and mop up fuels appropriate to fuel type and anticipated weather and fire behavior.
- Respond to any new starts within the division.
- Create or improve fireline around logging debris in coordination with logging operators.

Purpose

Keep fire east of swamp edge fire break.

End State

• Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

7. Special Instructions:

Ensure LCES is in place before operations begin and stay hydrated. Drive defensively and with lights on at all times. Identify escape routes. Logging operations are continuing. Stay clear of cutting areas. Please be mindful of logging operations that will be ongoing. Ensure that all personnel stay clear of felling operations. Pay attention for potential reburn in logging area. Work with Gilyard Logging foreman on any suppression actions within the logging area.

Use caution when working around logging operations.

6. Control Operations/Work Assignments:

Task

- Patrol and mop up fuels appropriate to fuel type and anticipated weather and fire behavior.
- · Respond to any new starts within the division.
- Monitor fire activity and location in the vicinity of Billies Island.

Purpose

• Keep fire south of the Suwannee Canal.

End State

- Fire activity north and west of Billy's Island has been detected and appropriate action has been initiated.
- Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

7. Special Instructions:

Ensure LCES is in place before operations begin and stay hydrated. Drive defensively and with lights on at all times. Identify escape routes.

Ensure all firefighters receive a safety breifing from Resource personnel and don PFDs before boarding the vessel.

All personnel must receive a briefing and don all PPE, including a PFD, prior to boarding a water vessel.

6. Control Operations/Work Assignments:

Task

• Assist private landowners and coordinate preparation of timberlands adjacent to the division.

ROB THORP (T); LUCAS MINTON (T) (T)

- Respond to any new starts within the division.
- Monitor fire activity and location within the swamp.
- Refresh Swamp Edge Break.

Purpose

Keep fire east of Swamp Edge Break.

End State

- · Fire activity that threatens Swamp Edge Break has been detected and appropriate action has been initiated.
- Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

7. Special Instructions:

Use caution when working around logging operations.

6. Control Operations/Work Assignments:

Task

- Respond to any new starts within the division.
- Patrol and mop up fuels appropriate to fuel type and anticipated weather and fire behavior.

Purpose

. Keep fire within established fire containment lines.

End State

• Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

7. Special Instructions:

Ensure LCES are in place before operations begin and stay hydrated. Drive defensively and with lights on at all times. Identify escape routes.

Use caution when working around logging operations.

6. Control Operations/Work Assignments:

Task

- Respond to any new starts within the division.
- Patrol and mop up fuels appropriate to fuel type and anticipated weather and fire behavior. Eliminate obvious smoke which will trigger unnecessary calls to 911 system.

Purpose

• Keep fire within established fire containment lines.

End State

• Fire is contained by adequate control line to reduce threat to escape; minimizing damage to private timberlands, private lands, and other resource values at risk.

HEALTH AND SAFETY MESSAGE

Safety Is a Choice You Make

INCIDENT: West Mims Fire DATE: Monday, May 29, 2017

Major Hazards & Risks Driving, Fire Behavior, Unburned Fuel

Driving: Driving is one of the most hazardous tasks that we perform when assigned to fires. Because of the fact that we perform the task literally hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause. Try and recognize your own driving habits and strive to constantly evaluate and improve your driving techniques.

Fire Behavior: Potential for <u>Significant Fire Behavior exists over the fire area today due to higher wind gusts, dry fuels, and lower relative humidity's. Make sure you have **LCES** in place before engaging. Set Management Action Points and be prepared to disengage early if necessary. Stay aware out there.</u>

UNBURNED FUEL BETWEEN YOU AND THE FIRE: It is important for firefighters to recognize "unburned fuel between you and the fire". Refer to Watch out Situation #11, sometimes it is not possible or practical for direct attack on a fire. Make sure before attempting indirect attack to assess unburned fuel between yourself and the fire.

Driving is one of the most hazardous tasks that we perform!!

CONDUCTING SAFE OPERATIONS NEAR HAZARD TREES

Personnel should carry out a hazard assessment of any fire site that has potential for hazard trees.

Things to consider when assessing the potential hazards of trees are:

- Area and trees have been burning for an extended period.
- High-risk tree species (those that are known for rot and shallow root systems) are in the area.
- Numerous downed trees
- Dead or broken tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark, or limbs
- Leaning or hung-up trees
- Over mature trees with heavy cone loads on the tops
- If the root system has been burned and/or exposed due to ground and surface fire.
- Ash pits spotted throughout the area.

Southern Area State IMT Safety Officers: Larry, Larry, Rob(t), Luke(t)

HUMAN RESOURCE MESSAGE

STOP, THINK, TALK before ACTING!

Many times we skip right past the STOP sign.

Ever had a "slip of the tongue," later thinking I wish I could have taken that back. I wish I could reel back those hurtful words.

Inappropriate comments are difficult to identify because what is offensive to one person may be humorous or neutral to another. The key word is "Offensive".

Keep in mind, behavior that is cruel, blatant, or potentially destructive should not be tolerated just because no one complained.

I'm here to listen and help. And if I can't help you, I'll help you find someone who can.

Trivia of the day: February 1865 is the only month in recorded history to not have a full moon.

Incident Human Resource Specialist: Larry Sandoval

WEST MIMS FIRE MEMORIAL DAY OBSERVATION

On Memorial Day we honor the more than one million men and women who died while serving in the US military.

In traditional observance, the flag is raised briskly to full-staff and then solemly lowered to the half-staff. At noon it is raised to full-staff and remains there until it is taken down at dusk.

The half-staff position remind us of those who gave their lives. At the noontime raising to full-staff in their memory, we resolve that their sacrifice not be in vain,

In December 2000, the US Congress passed and the president signed into law "The National Moment of Remembrance Act," which encourages all Americans to pause wherever they are at 3 pm local time on Memorial Day for a minute of silence to remember and honor those who have died serving the country.

Crosses line the main street of Fargo, GA, to honor local men and women who died serving the country.

The Southern States Type 1 Incident Management Team joins the residents of Fargo and surrounding communities in remembering and honoring the local residents who have given their lives in their country's service.
