Inform, involve and communicate incident planning and operations with all partners. • Confine all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. Aggressively suppress all fire outside the swamp edge boundary. • In cooperation with local timberland owners, use full suppression strategies and tactics to minimize damage to private timberlands and improvements and to prevent fires outside the Refuge from entering the Refuge. • Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Unified Incident Commanders. • Protect all cultural and archeological sites and structures within the refuge. • Manage the fires cost-effectively consistent with the values at risk. • Implement structure protection as necessary for at-risk facilities and communities. • Coordinate suppression actions with assigned Refuge Resource Advisors, and/or adjoining landowners. • Conduct all operations in a harassment-free environment. There will be a no tolerance atmosphere for harassment, alcohol, or illegal drug use. Everyone will be treated with dignity and respect. • Identify and initiate suppression repair on all Divisions.

To: All Incident Personnel, West Mims Fire 2017

As the Unified Command Incident Commanders, we have a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #44	TYPE OF FIRE: Wildland
FIRE NAME: West Mims	OPERATIONAL PERIOD: 05/31/2017 Day Operational Period

FUEL ASSUMPTIONS: Fuel types include timber litter (reburn fuels), brush fuels that represent the pine flatwoods and the bayhead/drainage fuels. The high risk fuel is the pine plantation overstory with the palmetto/gallberry brush understory commonly referred to as southern rough. Live canopy fuel moistures in pines and brush are below average and will support active crown fire when critical fire weather and above fuel dryness is present. Current fuel dryness as represented by KBDI and ERC G is above normal.

KBDI is 603 or 90th percentile and ERC G is 34 or 75th percentile.

Calculated 1 hour fine dead fuel moisture: 7% 10 hour fuel moisture 8% 100 hour fuel moisture: 15%

WEATHER SUMMARY: 40% chance for afternoon thunderstorms.
 WIND (20 FT): Light Variable am, Becoming East 4-9 mph in afternoon.
 MAX TEMPERATURES: 91 MIN RH: 37-43%
 LAL: 3 CHANCE OF RAIN: 40 MAX DISPERSION: 30
 MIXING HEIGHT: 6500 TRANSPORT WINDS: WNW 15 mph

Fire Environment Conditions present for large fire growth day on May 5th (run that threatened St. George)

Fuel dryness and fire weather combined to produce significant fire growth of 18,000 acres with an initial run that was 9 miles in length. This growth initiated in swamp brush fuels east of Soldier Camp and burned out of the refuge into high risk pine plantation fuels. Fuel dryness was extremely dry with KBDI over the 97th percentile at 720. ERC G was at the 85th percentile at 37. Wind was the major weather driver of this fire growth. Peak windspeeds at Jacksonville Airport were sustained from the west at 28 mph with gusts to 40 mph. Max temperature was 75. Minimum RH was 30%. Burning index G was over the 97th percentile at 49. Average rate of spread was estimated at just over 1 mph. Active crown fire or running crown fire produced spotting out to 1 mile.

Specific: All Branches: Surface fuels will continue to dry out and become available to burn in areas that did not receive rainfall. Piles and muck fuels will continue to hold heat and smolder. Passing thunderstorms will influence surface fire behavior, particularly in young pine plantations, increasing the potential for torching and possible short crown runs in plantations. Erratic winds will cause head direction shifts during passage of thunderstorms.

Fuel Type	Rates of Spread	Flame Length	Max Spot Distance	Probability of Ignition	Torching / Crowning Potential / Flame Lengths
20' winds @ 6-8					
Southern Rough(pine w/palmetto/gallberry)	10-15 ch/hr.	4-6 feet	1000 feet	70%	Single Tree Torching
Timber Litter (pine litter reburn)	1-2 ch/hr.	1 feet	0 feet	70%	No Torching
Brush (Swamp SH3)	1-2 ch/hr.	2-3 feet	0 feet	70%	No Torching

AIR OPERATIONS: 40% probability for thunderstorm activity in fire area

FIRE BEHAVIOR SAFETY:

Thunderstorm safety: Firefighters should remain aware of developing thunderstorms in the area and seek shelter during storm passage. Be aware of potential for increased fire behavior and change of head direction due to strong shifting winds as storms pass.

HEALTH AND SAFETY MESSAGE

Be alert! Expect the unexpected.

INCIDENT: West Mims Fire

DATE: Wednesday, May 31, 2017

Major Hazards & Risks Snakes, Heavy Equipment, Severe Weather

Snake Safety in FL and GA: Most snake species in the Southeast are harmless and bite only in defense. Most bites are easily avoided with common sense and basic safety.

- Do not harass, capture, or attempt to kill snakes.
- If you are walking in long grass or thick brush, wear heavy boots.
- If you see a snake, maintain a safe distance (> 6 feet) – most snake bites occur when people try to provoke or capture them.
- Presume all snakes are poisonous if you do not know for sure.

Heavy Equipment: We have heavy equipment from many organizations and with a variety of abilities. Operators and equipment bosses should match the abilities to the job and be clear on mission assignments. Know your travel routes, both capacity and clearances, especially on bridges. Stay clear of equipment work areas.

THUNDERSTORM SAFETY: Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm.

Safety & Health Working Team

www.nvccg.gov/teams/shwt/index2.htm

Lightning Safety Tips:

1. Postpone outdoor activities if thunderstorms are imminent. Lightning can travel 5-10 miles away from the thunderstorm and strike the ground with blue sky overhead. The storm doesn't have to be overhead in order for you to be struck.
2. Move to a sturdy shelter or vehicle. Do not take shelter in a small shed, under isolated trees, or in a convertible-top vehicle. Stay away from tall objects such as trees or towers or poles.
3. If in your vehicle when lightning strikes – don't touch a metal surface. You are safer in a vehicle than being outdoors.
4. Remember that utility lines or pipes can carry the electrical current underground or through a building. Avoid electrical appliances, and use telephones or computers only in an emergency.
5. If you feel your hair standing on end – get down into a baseball catcher's position and plug your ears with your fingertips so if lightning does hit it will not blow your ear drums out. Do not lie flat!
6. 30/30 rule – if the time between lighting and thunder is 30 seconds or less, go to a safe shelter. Stay there until 30 minutes after the last rumble of thunder.

Human Resource Message

"Thoughts for Today!"

- **Keep skid chains on your tongue.** Say less than you'd like. Cultivate a soothing voice. How you say it often means more than what you say.
- **Make promises sparingly and keep them faithfully,** no matter what the cost.
- Never lose an opportunity to say a kind word to or about somebody. **Praise work well done no matter who did it.**
- **Be interested in others,** their pursuits, their homes and their families. Everyone you meet, make feel that you regard them as important.
- Be cheerful. **Keep the corners of your mouth turned up.** Hide your worries and disappointments under a smile.

Have a great day!
