<b>3. Objective(s):</b>		
<ul style="list-style-type: none"> <li>• Provide for the safety and security of incident personnel and public in all incident operations through sound risk assessment and hazard mitigations.</li> <li>• Confine all new fires (new starts or breakouts) within the Okefenokee National Wildlife Refuge and/or inside the swamp edge break. Fight fire aggressively and suppress all fire outside the swamp edge boundary, preventing fires from outside the break from entering the refuge while minimizing damage to private timberlands and improvements.</li> <li>• Maintain a positive working relationship with all adjacent landowners, cooperators and State and Federal partners. Inform, involve and communicate incident planning and operations with all including the Refuge Resource Advisors.</li> <li>• Protect all cultural and archeological sites and structures within the refuge.</li> <li>• Manage the fires cost-effectively, consistent with the values at risk.</li> <li>• Implement structure protection as necessary for at-risk facilities and communities.</li> <li>• Conduct all operations in a harassment-free environment.</li> <li>• Identify and initiate suppression repair on all Divisions.</li> </ul>

**To: All Incident Personnel, West Mims Fire 2017**

As the Unified Command Incident Commanders, we have a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

We are particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

**FIRE BEHAVIOR FORECAST**

<b>FORECAST NUMBER: #50</b>	<b>TYPE OF FIRE: Wildland</b>
<b>FIRE NAME: West Mims</b>	<b>OPERATIONAL PERIOD: 06/06/2017 Day Operational Period</b>
<b>DATE ISSUED: 06/05/2017</b>	<b>TIME ISSUED: 1700</b>
<b>UNIT: Okfe诺基 National Wildlife Refuge</b>	<b>Prepared By: Bart Hoag FBAN</b>

**FUEL ASSUMPTIONS:** Fuel types include mixed grass, brush and timber types. The high risk fuel type is grass/palmetto/gallberry brush understory, particularly in the early/mid rotation pine plantations.

Fuels are beginning to recover moisture in most areas of the fire due to recent rains. Current fuel conditions are not favorable for active fire behavior without a significant wind event. Active crown fire in brush and pine canopy is not expected over the next two operational periods.

KBDI: 551 (down 11 from yesterday; 79<sup>th</sup> percentile), ERC-G: 27 (52<sup>nd</sup> percentile).

Fuel Moistures: 1hr= 8% 10hr= 9% 100 hr= 15%

**WEATHER SUMMARY:** Showers and thunderstorms, heavy at times.

WIND (20 FT): SW 10-12, gusting to 20 mph in afternoon.

MAX TEMPERATURES: 83-87 MIN RH: 60-65%

LAL: 4 CHANCE OF RAIN: 100% MAX DISPERSION: 30

MIXING HEIGHT: 2000 TRANSPORT WINDS: SW 15-25 mph

**LARGE FIRE GROWTH FIRE ENVIRONMENT CONDITIONS PRESENT DURING FIRE RUN THAT THREATENED ST GEORGE.**

Fuel dryness and fire weather combined to produce significant fire growth of 18,000 acres with an initial run that was 9 miles in length. Growth initiated in swamp brush fuels east of Soldier Camp Island and burned out of the refuge into pine plantation fuels.

Fuel Moistures: 1hr FM= 5% 10 hr. FM= 7% 100 hr. FM= 14% Live Woody= 101% Herbaceous= 119%

Indices: KBDI=720 (97<sup>th</sup> percentile) ERC G=37 (85<sup>th</sup> percentile) BI G=49 (97<sup>th</sup> percentile)

Weather Conditions: Max Temp=77 Min RH=27% Winds= 12 sustained with gusts to 20

Fire Behavior: ROS= >80 ch/hr. (1mile) Active crown fire Max spotting distance=1 mile

**SPECIFIC: All Branches:** The current fire weather forecast is not favorable for active fire behavior, and no significant fire spread events are expected during the current operational period. Surface fuels are recovering moisture from recent rains but have the potential to burn only under critical fire weather events (high winds). Piles and organic soil fuels continue to smolder and creep and could initiate surface fire spread should fine fuels dry. Lightning from passing thunder storms could cause new fire starts in receptive fuels.

Fuel Type	Rates of Spread	Flame Length	Max Spot Distance	Probability of Ignition	Torching / Crowning Potential / Flame Lengths
Southern Rough(pine w/palmetto/gallberry)	1-2 ch/hr.	1-2 feet	50 feet	26%	Limited Torching possible in young pine regeneration.
Timber Litter (pine litter reburn)	<1 ch/hr.	1 foot	<50 feet	26%	No Torching
Grass/Shrub (Young Plantations/Swamp GS3)	1-2 ch/hr.	2-3 feet	50 feet	26%	Limited Torching possible in pine regeneration.

**AIR OPERATIONS:** Continued chances of afternoon and evening thunderstorms bringing lightning and gusty and erratic winds to the fire area.

**FIRE BEHAVIOR SAFETY:**

As ground fuels continue to burn out be cognizant of where you walk to avoid burns and other injuries. Continued burning in tree roots will increase potential hazards associated with them falling.

Reference: 1 chain = 66 feet, 20 chains = .25 mile, 40 chains = .50 mile, 60 chains = .75 mile, 80 chains = 1 Mile

## Suppression Repair General Information

Suppression repair is underway in some areas of the Fire. While conducting suppression repair activities, please consider the following:

**General Description:** Repair of suppression constructed “fire breaks” is necessary to avoid excessive soil erosion and restore natural landscape surface water flows. While some fire breaks were created in previously undisturbed areas, most fire breaks were created by blading and/or widening existing roads or fire breaks.

**Location (Suitable) Sites:** All Divisions will have some level of suppression repair. Fire personnel are currently mapping repair needs. Branch and Division Supervisors will be provided with maps detailing suppression repair needs.

**Ownership Type:** Suppression repair may be needed on Okefenokee NWR, John M. Bethea State Forest, Osceola National Forest, and Georgia Private Lands. It is important to know where you are working as ***repair specifications may vary by landowner type.***

**Coordination of Repair with READs:** Suppression repair work should be done under the direction of Branch or Division Supervisors and done in coordination with Resource Advisors to assure cultural and natural resource concerns have been addressed.

**Completion of Repair:** When specific suppression repairs are completed a READ should be contacted for final verification and documentation in Arc Collector.

\*\*\*\*\*SEE SUPPRESSION REPAIR STANDARDS ON NEXT PAGE\*\*\*\*\*

\*\*\*\*\*

If any type of **cultural resources or artifacts** are discovered during suppression repair activities, **stop work immediately** and contact a READ.

## Suppression Repair Standards

1. **Permanent Firebreaks:** Berms and other excess soil displaced by firebreak construction should be pulled back into the disturbed area and returned to the original contour or pre-suppression grade. These lines will be identified by the appropriate landowner.

**Firebreaks Constructed In Previously Undisturbed Areas:** Repair of suppression constructed firebreaks is necessary to avoid excessive soil erosion, restore pre-fire landscape surface water flow patterns, and to facilitate movement of wildlife where necessary. Berms, vegetation and other excess soil displaced by firebreak construction should be pulled back into the disturbed area and returned to the original contour. Logs and other debris that are near the firebreak should be placed on the repaired firebreak to deter vehicle traffic.

**Intermittent Stream Crossings:** Firebreaks which cross drainages will be identified and inventoried for necessary repairs. Large debris piles located in these areas will be removed or spread away from wetlands or streams. Where fire lines cross stream channels, it is important to minimize soil movement into the stream and to prevent the stream from cutting a new channel in the firebreak. Use no more than 12-inch-high berms to keep the stream in its banks and direct soil movement away from the channel at crossings and approaches.

**Perennial Stream or Canal Crossings:** Guidance for repair will be provided by Resource Specialists.

2. **Point Locations:**

- a) Incident Facilities: Site specific restoration will be needed
- b) Previously Undisturbed Areas: Pull soil and vegetation from berms back onto the disturbed area. Some areas may require disposal or scattering excess piled vegetation in adjacent areas.

3. **Roads:** Roads identified for repair will need to be graded or reshaped to be brought back to pre-suppression condition.

- a) Clean out, repair or replace damaged road culverts. Old damaged culverts should be removed from site and disposed of properly.
- b) Repair damage to chip sealed roads and paved roads
- c) Repair or replace damaged closure gates and locks.
- d) Repair or replace damaged signs damaged by fire suppression activities.
- e) Cut and fell trees identified as hazards along public access roads or trails.
- f) Large piles of vegetative debris on or near roads should be broken up, mulched, or chipped as appropriate.

## HEALTH AND SAFETY MESSAGE

# Safety – A small investment for a rich future

**INCIDENT:** West Mims Fire

**DATE:** Saturday, June 6, 2017

### Major Hazards & Risks Driving and Initial Attack

**Driving:** *Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Because driving is such a common component of our lives, it is difficult to realize that it requires 100% of our attention. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on the task at hand, operating a motor vehicle safely. There are many forms of inattentive driving; fatigue, telematics, daydreaming, eating, drinking, reading, writing, and talking. Clear your dash for better visibility, clear your floor for better braking and clear your mind for better driving. Identification of important, public roads that may be impacted by Logging Traffic.*

**Initial Attack:** *Make sure to **get a good size-up and thorough briefing**. Determine travel routes, communications and rally points before you depart. Upon arrival, take time to adequately evaluate fire hazards, values at risk, and sound tactics before engaging. Is the suppression method adequate? Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.*

Stress isn't working 15 hours at a job you like;  
stress is working 15 minutes in a job you dislike.

—Kathleen Lane

## LCES/10&18

### LCES/10&18:

We are putting to the test all of the knowledge and training we have learned. Make sure all of our rules of engagement are in place prior to taking action. **Supervisors**, Watch over your firefighters; provide strong leadership and **Keep your Crew Informed and Updated** as the day progresses

*Southern Area State IMT Safety Officers: Larry, Larry, Luke(t)*

## Human Resource Message

### "Thoughts for Today"

- **Keep an open mind on all debatable questions.** Discuss, don't argue. It is the mark of a superior mind to disagree and remain friendly.
- Let your virtues speak for themselves, and refuse to discuss the shortcomings of others. **Discourage gossip by changing the subject.**
- Have respect for the feelings of others. **Wit and humor at the expense of a friend are never worth it.**
- Pay no attention to negative remarks and personal opinions of you. Live so that no one will believe them. **Remember, a common cause of backbiting is dissatisfaction with oneself.**
- Don't be concerned about your "just due". Do a good turn for the sake of being helpful. **For those who seek gratitude, look in the dictionary.**

**Have a positive day!**
