Fire Weather Planning Forecast for Northeast Florida and Southeast Georgia
National Weather Service Jacksonville FL
112 PM EDT Mon Oct 7 2024

.DISCUSSION...

Elevated northeasterly winds will continue through Wednesday morning, allowing for good dispersion. By Wednesday late morning to afternoon, tropical storm to hurricane force winds will fill in associated with Hurricane Milton. The worst wind and rainfall impacts will be Wednesday into Thursday for northeast Florida and southeast Georgia. There is a threat for heavy rainfall causing flooding, a Flood Watch has been issued for most of northeast Florida and coastal southeast Georgia.

Interests should continue to monitor the latest forecasts from the National Hurricane Center regarding Hurricane Milton.

FOG POTENTIAL AND OTHER REMARKS...Significant fog is not expected. Thunderstorm chances Today and Tuesday, mainly for NE FL, with chances across the area Wednesday through Thursday.

7. Task	8. Hazard	9. Hazard Probability	10. Severity	11. RAC	12. Identify hazard mitigations & controls (press [alt + enter] to add a line)	13. Hazard Probability	14. Severity	15. RAC	16. Task Necessary?	17. Hazard Control Assigned to:
Driving to site	Weather, road conditions, Post storm hazards	Likely	Catastrophic	Extremely High	Check weather and road conditions. Situational awareness of changing weather and conditions. Do not drive through standing water. Look for downed power lines and downed trees.	Possible	Catastrophic	Extremely High	YES	ic and all team members
Chainsaw operations	Cuts, severe injury. Traffic	Likely	Critical	Extremely High	Sawyer and swamper look out for each other. Have a lookout or someone to block traffic while engaged in cutting operation on roadways.	Possible	Critical	High	YES	Saw Crews
Working with non agency cooperators and other agency personnel who may not have agency issued devices for communication	Working with or around local authorities and other agency personnel who may not have the same communication capabilities.	Possible	Catastrophic	Extremely High	Brief with cooperators and non agency personnel upon arrival on scene. Get briefing and establish a communication method with all resources and assign areas and task to be performed by different resources	Unlikely	Catastrophic	High	YES	ic and all team members
Fork lift operations	collisions and accidents	Possible	Critical	High	Fork lifts should be operated by qualified personnel only. Establish procedures for loading and unloading trucks and trailers at pick up and drop off sites. Watch out for the public when loading and unloading supplies.	Possible	Moderate	Moderate	YES	IMT and all logistical personnel.
Communications	Unable to communicate with other resources because of no phone, radio or internet service	Likely	Catastrophic	Extremely High	Identify locations in each of the work zones where service is available and identify and assign resources as runners to visit these areas and communicate vital information as needed. Use human repeaters as needed	Possible	Critical	High	YES	IMT and crews
fatigue	may become disengaged and complacent. Loss of focus on task	Likely	Catastrophic	Extremely High	Take regular breaks. Ensure resources get good sleep. Stay hydrated and watch out for your team mates. If you see something, say something.	Possible	Critical	High	YES	All team members
Aircraft, Flight operations	Unfamiliar with flight procedures, weights and safety protocols	Possible	Catastrophic	Extremely High	Know your flight intentions, targets and weight limits. Receive briefings from aircraft personnel. Stay clear of rotor wash and line loads	Unlikely	Critical	Moderate	YES	all team members

Health and Safety Message

Incident: Hurricane Helene Response

Date: October 8, 2024

Hazards and Risks:

**Heavy Equipment, Chainsaw safety,
Driving, Hydration**

Working around Heavy Equipment:

Equipment: Always use a spotter when backing up. Stay clear of heavy equipment as the line of sight is limited for the operator. When working around equipment at night, be sure to utilize head lamps and high visibility vest.

Chainsaw safety:

Always use a swamper when using the saw. Full PPE including hard hats, chaps, gloves, ear and eye protection must be worn when operating a saw or working as a swamper. Conduct frequent, scheduled briefings to ensure situational awareness.

Operating Heavy Equipment In Heavy Debris Areas :

When Operating equipment in heavy debris areas, slow down, stay situationally aware of the debris load you are pushing, move smaller amounts of debris instead of large loads. Put most experienced operators on equipment.

Safety officer: Danny Gore

Field Map for Hurricane Helene Incident Response

This map is yours. Please contact Plans with any needs.

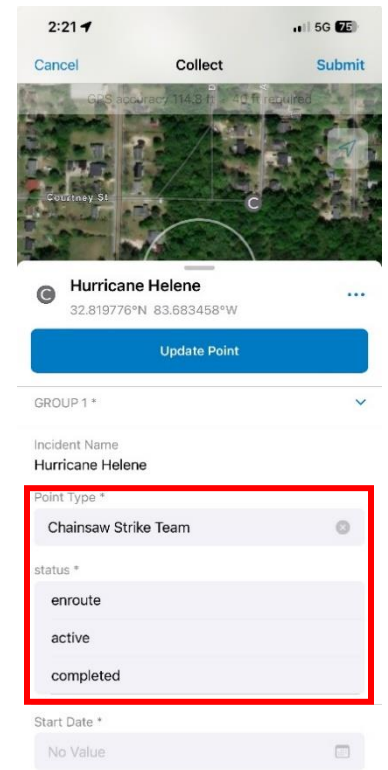

Log in with your GFC ArcGIS account (either the designed County account or the old Area account).

Within the map, mark features such as chainsaw strike team locations and road debris, and fill in their attributes.

WE KNOW CELL SERVICE IS QUESTIONABLE. There is an offline map on the main page. Click on the download button to the right of the map name. Download it when you have service or WiFi.

Click to download offline.

This is your map. Add things that will help you, your crew, or adjacent resources.

Incident within an Incident Plan (Updated 9/14/15)

The **Incident Commander** is responsible for overall action in case of a serious accident.

ON SCENE

Upon occurrence of a “**SERIOUS**” incident involving significant injury or fatality within the incident, the highest qualified person on scene shall take control of the situation until the nearest **Division /Group Supervisor** arrives to assume control. Immediate and clear communication must be established between Operations and Division/Group Supervisors to determine who can arrive at the scene quickest and assume control of the situation. In the event of such an incident in camp or on incident roads, on-site personnel shall take control until an **Operations Chief** or **Division/Group Supervisor** arrive or **Local Law Enforcement** and/or **Medical personnel** have assumed control as the **On-Scene Incident Commander**.

Incident Communications or the **On-Scene Incident Commander** will take immediate action to clear all radio traffic on the incident “Command Channel” by broadcasting “**Emergency Traffic Only**”, so that quick and proper coordination for handling the accident can take place.

At no time during the incident will the name of the subject(s) be used over the radio.

Upon arrival at the incident scene, whoever has been designated to manage the incident (Operations Section Chief or Division/Group Supervisor) should take immediate actions to:

- Identify and mobilize medical personnel to the scene – notify them you are in charge.
- Coordinate appropriate transportation for injured personnel.
- Restrict unnecessary personnel from the accident scene.
- Secure the scene area and identify witnesses for investigation.

The nearest **Line Safety Officer** will respond immediately to the scene to assist the **On-Scene Incident Commander** and shall be responsible for initiating the proper investigation and documentation by qualified personnel.

ICP

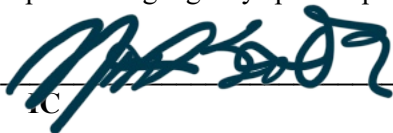

Immediately upon notification of a serious incident requiring emergency action, the **Incident Commander**, **Medical Unit Leader**, **Planning Operations**, **Safety Officer**, and **Air Operations** shall respond to the incident communications facility in order to support the incident. The **Medical Unit Leader** will normally physically operate the radio during the patient assessment/care portion of the incident. In the absence of the **Incident Commander**, The **Planning Section Chief** will assume the supervisory role.

Planning Section Chief, **Logistics Section Chief**, **Finance Section Chief** and **Public Information Officer** shall be notified and may be requested to respond to incident communications as dictated by specific emergency needs.

Public Information Officer is responsible for managing external communication. All information released from the incident shall be through the **Public Information Officer** with the approval of the **Incident Commander**.

The **Incident Commander** will make contact with the **Agency Administrator** who will in turn contact appropriate officials of the agency. If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols for dealing with the incident.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location *(if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
