## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY</b>	
FY23 LICC FIRE SUPPORT	Date/Time From: 08/31/2023 0700      THU	Date/Time To: 08/31/2023 2030      THU
<b>3. Objective(s):</b>		
<p>Objectives</p> <ol style="list-style-type: none"> <li>1. Firefighter and Public safety will be the highest priority throughout all phases of operations.</li> <li>2. Manage risk to firefighters and the public by utilizing a risk-based approach to decision making.</li> <li>3. Support the local districts with initial and extended attack fires.</li> <li>4. Maintain and improve relationships with state, local and other cooperators.</li> <li>5. Minimize fire impacts to structures and infrastructure to reduce the potential for adverse health, social, financial and economic hardships.</li> </ol>		
<b>4. Operational Period Command Emphasis:</b>		
<b>General Situational Awareness:</b>		
<p>Local thresholds of fuels to be of concern:                  20-foot wind speed over 20mph                  RH less than 30%                  Temperature over 95F                  KBDI over 650</p> <p>Historically, large fires (over 80 acres) on the Kisatchie NF tends to increase when BI values are above 19 and 100-hour fuels are below 17%, especially in combination with other local thresholds listed above. KBDI is a good indicator of resistance to control. At KBDI values above 400, the litter and duff layers contribute to fire intensity and will burn actively. Be prepared to adjust tactics based on current and expected fire behavior.</p>		
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
<b>Approved Site Safety Plan(s) Located</b>		
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan):

# Ida

Spot Forecast for Ida...BLM  
National Weather Service Lake Charles LA  
830 PM CDT Wed Aug 30, 2023

Forecast is based on forecast start time of 2000 CDT on August 30.  
If conditions become unrepresentative...contact the National Weather Service.

Please contact our office at (337) 477-5285, if you have questions or concerns with this forecast.

...RED FLAG WARNING IN EFFECT FROM 10 AM TO 8 PM CDT THURSDAY...

## .DISCUSSION

Dry weather will continue through Friday, with daily minimum relative humidity values falling to between 20 and 30 percent. Winds will diminish some but remain out of the north to northeast. By the weekend, winds will begin to shift more southeasterly, with a gradual increase in RH values as well as rain chances expected.

## .THURSDAY...

Sky/weather.....Sunny (5-15 percent).  
Max temperature.....Around 95.  
Min humidity.....28 percent.  
Eye level winds.....North winds up to 5 mph.  
Wind (20 ft).....Northeast winds 5 to 8 mph.

**The following message is from the Kisatchie National Forest Archeologist, regarding sensitive archaeological resources and endangered species in the area.**

**READ/ARCH**

- Kisatchie National Forest contains sensitive archaeological resources throughout the forest. There are 22 cultural resource sites located within the current perimeter of the Ida Fire, and more than 40 in a 0.5 mile radius around the fire with various levels of protection. Initial attack fire lines are exempt from avoidance measures; however, extended attack contingency fire lines should be cleared with Kisatchie Forest Archeologist Matthew Helmer (ph. 281-731-4900; [matthew.helmer@usda.gov](mailto:matthew.helmer@usda.gov)) prior to ground disturbance so that sites can be flagged and avoided. If any archaeological materials are uncovered during fire operations, please contact ARCH Helmer as soon as possible.
- The Kisatchie National Forest is home to the endangered Red-cockaded Woodpecker (RCW). The RCW is unique in that they create their cavities within living pine trees. The Vernon Unit consists of 197 active RCW clusters. The Ida fire negatively impacted 3 RCW clusters. Within 1 mile of the current Ida fire scar are 12 active RCW clusters. RCW trees are identified with double white bands around each tree. Yellow signs are posted around each cluster site. Typical protection measures for the trees during burning activities include raking and blowing down to mineral soil a circle with a 10-ft radius around each tree. Please coordinate with READ Matthew Pardue (ph. 318-450-8802; [thomas.pardue@usda.gov](mailto:thomas.pardue@usda.gov)) for any questions or concerns relating to RCW.

## LICC FIRE SUPPORT & IDA INCIDENT

### FINANCE PROCEDURES

Resources assigned to LICC Fire Support and the Ida fire are requested to submit all finance documents electronically to the email listed below.

**Finance Email:** [2023.lalic.support.finance@firenet.gov](mailto:2023.lalic.support.finance@firenet.gov)

Please email electronic copies of the following documents as applicable:

- Contract/Agreement/State Cooperative Agreement
- Casual Hire Form (ADs)
- Resource Order
- Crew Manifest

The preferred method of turning in CTR's, Shift Tickets, or other associated time documents is direct to our Finance email. Electronic copies can include PDF, scanned copies of documents, or pictures of documents. QR codes and links are below to fillable PDF time documents.

- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- VIPR Resources should submit lodging receipts periodically rather than all at the time of demob.
- Include your cell phone number on CTR and/or Shift Tickets in remarks.
- Our Finance email does not have an auto reply.

#### **Coding Time**

Please ensure to include correct incident code on CTRs and/or Shift Tickets based on the information below.

FY23 LICC Fire Support – P8EK6V23 0806

Code to LALIC Support when not assigned to a wildfire during staging.

ABC Misc. – P8EK2123 0820

Code hours working fires less than 300 acres on USFS lands, and all fires in the initial response/mutual aid zone that do not exceed 1 operational period. **VIPR Resources:** code full work shift for day to this code when responding to an IA fire.

Fire Codes – Fires that exceed 300 acres and/or 1 operational period will have to have a new fire code generated that will be provided to code to. Notate on CTRs and Shift Tickets when responding to initial attack fires, include fire name if known.

# SAFETY MESSAGE

<b>Incident:</b> LICC Fire Support	<b>Date:</b> August 31, 2023	<b>Shift:</b> Day
---------------------------------------	---------------------------------	----------------------

## Dehydration

Dehydration is loss of water and important blood salts like potassium (K+) and sodium (Na+). Vital organs like the kidneys, brain, and heart can't function without a certain minimum of water and salt. Fluid losses up to 5% are considered mild; up to 10% are considered moderate; and up to 15% are considered severe. Severe dehydration can result in cardiovascular collapse and death if not treated quickly.

Diuretics cause excessive urination and consequent dehydration. Keep in mind that diuretics are not complementary to work activity that spans a period exceeding 30 minutes at a moderate to high intensity of effort, especially in dry warm climates. Diuretics thicken the blood, diminish circulatory nutrient movement, results in dangerously increased body temperatures, and most commonly, stresses the heart muscle. At 2% dehydration, performance will fall off by 10-20%. Of course the use of diuretics are not the leading cause of most heat injuries, simple dehydration resulting from poor dietary habits (low fluid intake) and the use of certain medications, to include some blood pressure medicines, coupled with an extraordinary activity performance in a hot dry climate is likely the leading cause of heat stroke and heat exhaustion.

### Signs of Dehydration

#### **Mild**

Thirst  
Dry lips  
Slightly dry mouth membranes  
Lack of energy  
General weakness

#### **Moderate**

Very dry mouth membranes  
Sunken eyes  
Skin doesn't bounce back quickly when lightly pinched and released.  
Decreased or absent urine output  
Decreased tears

#### **Severe**

All signs of moderate dehydration  
Rapid, weak pulse (more than 100 at rest).  
Cold hands and feet  
Rapid breathing  
Blue lips  
Confusion, lethargy, difficult to arouse

**Rhabdomyolysis** damaged muscle tissue. Due to prolonged physical exertion, wildland firefighters are at increased risk for rhabdomyolysis. If not recognized and treated early, rhabdomyolysis can cause permanent disability and may be fatal.

What are the signs and symptoms of rhabdomyolysis?

- Muscle aches or pains out of proportion for the amount of exercise done
- Muscle cramping
- Tea-colored or cola-colored urine

Rhabdomyolysis is often mistaken for heat stress and dehydration. It can occur in well-conditioned athletes doing their usual workouts,

so **DO NOT ignore these symptoms.**

### IWI IC Responsibilities – Division Group Supervisor or Point of Contact

- Take charge of the scene and identify/determine who is in charge of assessing and treating the patient.
- Use the Medical Incident Report (in IRPG or IAP) to relay critical information regarding patient assessment, transportation, and resource needs.
- Coordinate the request for transportation and/or other resources based on patient assessment.
- Ensure that information about patient assessment, transportation or other resource needs is transmitted directly over the radio on command and by phone (911).
- The Incident Commander, Medical Unit Leader, Safety Officer and Communications unit will be notified promptly. The IC will ensure that all remaining command and general staff are notified.
- All incident personnel will be instructed by the appropriate chain of command position to clear the designated radio channel for “emergency traffic” related only to the emergency situation. If the chain of command individuals are not available, the highest qualified person on scene will broadcast “emergency radio traffic.”
