## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY</b>	
FY23 LICC FIRE SUPPORT	Date/Time From: 09/02/2023 0700      SAT	Date/Time To: 09/02/2023 2030      SAT
<b>3. Objective(s):</b>		
<p>Objectives</p> <ol style="list-style-type: none"> <li>1. Firefighter and Public safety will be the highest priority throughout all phases of operations.</li> <li>2. Manage risk to firefighters and the public by utilizing a risk-based approach to decision making.</li> <li>3. Support the local districts with initial and extended attack fires.</li> <li>4. Maintain and improve relationships with state, local and other cooperators.</li> <li>5. Minimize fire impacts to structures and infrastructure to reduce the potential for adverse health, social, financial and economic hardships.</li> </ol>		
<b>4. Operational Period Command Emphasis:</b>		
<b>General Situational Awareness:</b>		
<p>Local thresholds of fuels to be of concern:                  20-foot wind speed over 20mph                  RH less than 30%                  Temperature over 95F                  KBDI over 650</p> <p>Historically, large fires (over 80 acres) on the Kisatchie NF tends to increase when BI values are above 19 and 100-hour fuels are below 17%, especially in combination with other local thresholds listed above. KBDI is a good indicator of resistance to control. At KBDI values above 400, the litter and duff layers contribute to fire intensity and will burn actively. Be prepared to adjust tactics based on current and expected fire behavior.</p>		
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
<b>Approved Site Safety Plan(s) Located</b>

# Kisatchie East Weather

.DISCUSSION...

Rain chances and higher min RH values will return across the region from the southeast over the next several days. Although precipitation will be very beneficial and will stop Red Flag Warnings, it will likely not be enough to end our elevated fire conditions. Winds will veer from east to southeast between 5 to 10 mph over the weekend, with afternoon mixing heights over 5000 ft daily.

LAZ019>022-021045-

Winn-Grant-Caldwell-La Salle-

Including the cities of Winnfield, Colfax, Montgomery, Dry Prong, Clarks, Grayson, Columbia, Jena, Midway, and Olla

.FORECAST FOR DAYS 3 THROUGH 7...

.MONDAY...Partly cloudy. Showers likely and a chance of thunderstorms. Lows in the lower 70s. Highs in the mid 90s. South winds 5 to 10 mph.

.TUESDAY...Partly cloudy. A chance of showers. Lows in the lower 70s. Highs in the mid 90s. Southeast winds around 10 mph.

.WEDNESDAY...Mostly clear. Lows in the lower 70s. Highs in the mid 90s. Southeast winds 5 to 10 mph.

.THURSDAY...Mostly clear. Lows in the lower 70s. Highs in the upper 90s. Southwest winds 5 to 10 mph.

.FRIDAY...Mostly clear. Lows in the lower 70s. Highs in the upper 90s. Southwest winds around 5 mph.

# Ida Fire Kisatchie West Weather

**.DISCUSSION...**

Relative humidity values will gradually increase after sunrise through the afternoon Saturday. Southeast winds with scattered thunderstorms after noon. Elevated rain chances will linger through Sunday and Monday.

Higher minimum RH values beginning Saturday morning will not require a Red Flag Warning. However, despite increasing moisture, critical fire conditions remain in place across the region. Scattered thunderstorms will develop during the day Saturday, Sunday, and Monday. While these storms will bring beneficial rainfall, they will also bring the risk of frequent lightning and gusty, erratic winds that could initialize new wildfires while exacerbating ongoing ones.

**.SATURDAY...**

Sky/weather.....Mostly sunny (25-35 percent). Slight chance of showers early in the afternoon. Chance of showers and thunderstorms in the afternoon.  
 Max temperature.....Around 98.  
 Min humidity.....39 percent.  
 Eye level winds.....Northeast winds up to 3 mph increasing to east up to 5 mph in the late morning and afternoon.  
 Wind (20 ft).....Northeast winds 5 to 7 mph early in the morning becoming light, then becoming northeast 5 to 7 mph in the late morning and afternoon. Gusty and erratic winds expected near thunderstorms in the afternoon.

# FIRE BEHAVIOR OUTLOOK

<b>FIRE NAME:</b> Ida	<b>OUTLOOK PERIOD (valid time period):</b> 09/1-5/2023
<b>DATE ISSUED:</b> 8-31-2023	<b>TIME ISSUED:</b> 1700 central
<b>UNIT:</b> Kisatchie National Forest	<b>SIGNED:</b> ___/s/ Mark Hale _____
	<b>Typed/printed:</b> Mark Hale – FBAN

## WEATHER/CLIMATOLOGY DISCUSSION:

**RED FLAG WARNING IN EFFECT FROM 10 AM TO 8 PM CDT FRIDAY.** Critical fire weather conditions will continue for parts of SWLA on Friday. High pressure to the north will keep winds out of the N-NE. This dry air will keep minimum RH values in the 20 to 25% range north of Lake Charles and west of hwy 165. This weekend, moisture levels will start to increase with minimum RH in the 50% range and even a chance for some rain.

The 6- to 10 day outlooks is calling for above normal temperatures, leaning towards below normal precipitation.

## FIRE BEHAVIOR DISCUSSION:

**Short Range (Friday and Saturday):** ERC(Y): 42      KDBI(Y): 758      BI(Y): 25 (Vernon RAWs)

A Fire and Fuels behavior Advisory has been issued for portions of the south including Louisiana. Very hot temperatures are forecast to dry out fuels and increase ERC values in the areas of concern during much of the first half of September. **Fire weather thresholds required to produce crown fire in high-risk timber and brush fuels are much lower with the fuel dryness indicated by 90th-percentile-or-greater ERCs. Current ERCs at the Vernon RAWs near the fire are above the 97<sup>th</sup> percentile, and forecast to stay above the 97<sup>th</sup> percentile into early September.**

**Extreme conditions forecasted for Friday, with thunderstorms moving into the area on Saturday.** Hotspots or new ignitions could become very active as temperatures and RHs reach critical levels on Friday. Potential for spotting, torching and active crown fire. Thunderstorms are possible on Saturday as the weather pattern transitions with gusty outflow winds near thunderstorms. Mopup may be an issue in areas missed by moisture with elevated ERCs and BIs

### Expected Fire Behavior for Friday/Saturday;

**Grass:** ROS 20 to 40 CPH, FL 4-8 feet. Expect FL in excess of 10 feet and ROS exceeding 40 cph in areas of denser grass fuels.

**Brush and Timber:** ROS 2 to 12 CPH, expect passive to active crown fire. Active crown fire possible especially where terrain and wind align and from outflow winds near thunderstorms.

### Medium Range (Sunday through Tuesday):

Conditions should begin to moderate Sunday through Tuesday with increases in RH. Areas that receive moisture will also see reduced fire behavior and spread.

### Reassessment Criteria:

In the event conditions change forecasts may need to be revised. Major changes may include,

- 1) Major change in weather forecast,
- 2) Widespread rains
- 3) Observed fire behavior is not well represented by the forecast

In the event reassessment criteria is met, request a spot weather forecast and an updated fire behavior forecast.

## SAFETY

- 1) **Critical Fire behavior occurs** with combinations of any of the following factors: temperatures approach 95 degrees, RHs values less than 30, 20 foot wind speeds over 20 mph and KDBI over 650.
- 2) **Typical barriers to fire spread**, like roadways, rivers, and hardwood river bottoms **cannot be relied upon to stop fire progression.**
- 3) **Spotting up to ¼ of a mile away** has routinely been reported on majority of recent fires, including small initial attack Fires
- 4) **Reburn of scorched needle cast in pine** is now common during the days or weeks after suppression of small initial attack fires.
- 5) **Roots burning underground may result in green trees falling.**

## LICC FIRE SUPPORT & IDA INCIDENT

### FINANCE PROCEDURES

Resources assigned to LICC Fire Support and the Ida fire are requested to submit all finance documents electronically to the email listed below.

Finance Email: [2023.lalic.support.finance@firenet.gov](mailto:2023.lalic.support.finance@firenet.gov)

Please email electronic copies of the following documents as applicable:

- Contract/Agreement/State Cooperative Agreement
- Casual Hire Form (ADs)
- Resource Order
- Crew Manifest

The preferred method of turning in CTR's, Shift Tickets, or other associated time documents is direct to our Finance email. Electronic copies can include PDF, scanned copies of documents, or pictures of documents. QR codes and links are below to fillable PDF time documents.

- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- VIPR Resources should submit lodging receipts periodically rather than all at the time of demob.
- Include your cell phone number on CTR and/or Shift Tickets in remarks.
- Our Finance email does not have an auto reply.

#### Coding Time

Please ensure to include correct incident code on CTRs and/or Shift Tickets based on the information below.

FY23 LICC Fire Support – P8EK6V23 0806

Code to LALIC Support when not assigned to a wildfire during staging.

ABC Misc. – P8EK2123 0806

Code hours working fires less than 300 acres on USFS lands, and all fires in the initial response/mutual aid zone that do not exceed 1 operational period. **VIPR Resources:** code full work shift for day to this code when responding to an IA fire.

Fire Codes – Fires that exceed 300 acres and/or 1 operational period will have to have a new fire code generated that will be provided to code to. Notate on CTRs and Shift Tickets when responding to initial attack fires, include fire name if known.

# **SAFETY MESSAGE**

<b><i>Incident:</i></b> <b>LICC Fire Support</b>	<b><i>Date:</i></b> <b>Sept 2, 2023</b>	<b><i>Shift:</i></b> <b>Day</b>
---	--	------------------------------------

## **Happy Labor Day Weekend**

It will be a very busy weekend this holiday. Drive defensively, slow down, make sure your windshield is clean and watch out for pedestrians. Let's make sure we all go home to our families.

### **Dozers/tractor Plow Operations**

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety. (See Fireline Handbook, Appendix A, for hand signals.)
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications. Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.

### IWI IC Responsibilities – Division Group Supervisor or Point of Contact

- Take charge of the scene and identify/determine who is in charge of assessing and treating the patient.
- Use the Medical Incident Report (in IRPG or IAP) to relay critical information regarding patient assessment, transportation, and resource needs.
- Coordinate the request for transportation and/or other resources based on patient assessment.
- Ensure that information about patient assessment, transportation or other resource needs is transmitted directly over the radio on command and by phone (911). **Note that dispatch may be closed at night.** If you are on a fire at night, your first option for medical assistance may be 911. Make sure someone has cell phone coverage at all times.
- The Incident Commander, Medical Unit Leader, Safety Officer and Communications unit will be notified promptly. The IC will ensure that all remaining command and general staff are notified.
- All incident personnel will be instructed by the appropriate chain of command position to clear the designated radio channel for “emergency traffic” related only to the emergency situation. If the chain of command individuals are not available, the highest qualified person on scene will broadcast “emergency radio traffic.”
