3. Objective(s):		
<ol style="list-style-type: none"> 1. All operations will be conducted with safety of the public and firefighters in mind. Protection of life and property is your highest priority task. When in doubt, sacrifice acres rather than firefighter and public safety. 2. Provide public information regarding fire danger to maintain good awareness of the risk and hazards to the public. Coordinate with LDAF Public Information Officer at (225) 975-7532 or presssecretary@ldaf.la.gov and State Fire Marshall's Public Affairs Director at (225) 620-5115 or ashley.rodrique@la.gov. 3. The team will handle EEO complaints in consultation with LDAF Human Resources involving personnel attached to the team. 4. Continue partnership and coordination with the appropriate LDAF, State Fire Marshall, GOHSEP, and local public safety officials. 5. Manage incident in a cost effective manner. 		
4. Operational Period Command Emphasis:		
Stop, Think, Discuss then Act, and ensure LCES is in place prior to engaging the fires. The Tiger Island, Hwy. 113, Lions Camp Road and Elizabeth Fires receive a strategic, risk-based response, commensurate with the threats and opportunities, and uses the full spectrum of management actions, that consider fire and fuel conditions, weather, values at risk, and resources available.		
General Situational Awareness:		
Watch Out Situations: Extreme heat, dry fuels and fire behavior. Aviation use and possible long medivac times. Cumulative fatigue.

To: All Incident Personnel

As Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The Southern Area Red Team has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/Steve Parrish

Fire Weather Forecast

FORECAST NO: 07
PREDICTION FOR: Sunday and Sun Night
DATE: September 3rd, 2023
FORECAST ISSUED: 1800 September 2nd, 2023

Fires: Tiger Island - Highway 113
Lions Camp Road - Elizabeth
Incident Meteorologist: *Jeremy Michael*
Signed: JRM (304-886-2331)

WEATHER DISCUSSION: After excellent RH recovery this morning, isolated showers will be possible this morning. By afternoon, scattered to numerous showers/storms expected. The main threat will be gusty outflow winds, lightning, and heavy rain. If any of the fires take a direct hit, heavy rain could create muddy roads within and around the fire locations. Afternoon min RHs will not drop out of the 40% range, leading to another hot and muggy day. Heat indices could hit 105 degrees making it feel uncomfortable. By evening, the sea breeze could produce gusty winds, but could be disrupted by continued showers/storms in the region.

TODAY:

WEATHER: Partly cloudy becoming mostly cloudy with scattered to numerous showers and thunderstorms.
MAX TEMP: 96-99° **HEAT INDEX:** 101-105° **MIN RH:** 42-47%
PROBABILITY OF PRECIP: 50% **CHC WTG RAIN:** 30% **LAL:** 3
WINDS (20 feet): SE 4-8 mph with gusts up to 18 mph. Gusty and erratic outflows winds from variable directions from any storms.
MIXING HEIGHT: Weak morning inversion. 6,000-7,000 ft during the afternoon.
TRANSPORT WIND: SE 5-10 mph.

TONIGHT:

WEATHER: Scattered showers/storms evening; isolated showers/storms overnight.
MIN TEMP: 72-75° **MAX RH:** 90-100%
PROBABILITY OF PRECIP: 20% **CHC WTG RAIN:** 10% **LAL:** 3 evening; 2 overnight
WINDS (20 feet): S 2-6 mph. Sea breeze possible with gusty winds 15-25 mph between 2000-2200 hrs.
TRANSPORT WIND: S 5-10 mph.

MONDAY:

WEATHER: Partly cloudy becoming mostly cloudy with numerous showers and thunderstorms.
MAX TEMP: 93-96° **HEAT INDEX:** 101-105° **MIN RH:** 45-55%
PROBABILITY OF PRECIP: 65% **CHC WTG RAIN:** 50% **LAL:** 4
WINDS (20 feet): SE 4-9 mph with gusts up to 16 mph. Gusty and erratic outflows winds from variable directions from any storms.
MIXING HEIGHT: Weak morning inversion. 5,000-6,000 ft during the afternoon.
TRANSPORT WIND: S 10-15 mph.

EXTENDED OUTLOOK: TUESDAY- THURSDAY: The weak weather system continues to influence the regional weather on Tuesday with numerous showers/storms expected. Wetting rains are likely for many locations with continued excellent RH recovery. As the system moves away Wednesday and Thursday, daily chances for showers/storms will drop to 15-25% with warming/drying conditions. Onshore (southerly) flow will keep RH high leading to heat indices around 105 degrees each day.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: Wildland, Type 1
FIRE NAME: Tiger Island, Lions Camp Rd, Hwy 113, Elisabeth	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: Saturday, September 2, 2023 Time Issued: 1800	SHIFT DATE: Sunday, September 3, 2023
UNIT: Private Lands	SIGNED: Greg Titus, FBAN

WEATHER SUMMARY:

Local Thresholds – Watch Outs Temp >80°, Min RH < 35%, Winds > 20 mph	Forecast for Today Temp: 95°, Min RH: 46%, Winds: 6-8 mph Gust 12
---	---

FIRE BEHAVIOR:

Heavy fuels are critically dry. **KBDI and ERC values are at record levels.** Fuel conditions combined with wind have the potential to produce moderate fire behavior today. Be alert for thunderstorms that could cause strong erratic winds. The smallest heat source could transition into active flame.

One and ten hour fuels are less available today due to higher humidities and yesterday's rain fall. Live fuel moisture levels are at critically low levels (45-55%) and should be treated as fully cured/dead. The interiors of heavy fuels are dry and will burn to white ash.

Fire Behavior based on values for the fuel models shown. Max rate of spread at the head of the fire.

Vegetation	Fuel Model	Max Rate of Spread	Flame Length
Grass/Shrub	GS3	18 ch/hr ~ 0.2 miles/hr	6 feet
Southern Rough	7	15 ch/hr ~ 0.2 miles/hr	4 feet
Timber Litter and Understory	TU2 / TL6	6 ch/hr ~ 100 yards/hr	1 foot

Expect little to no spotting today.

Peak Probability of Ignition = **44%**

In **15 minutes** a new spot fire or ignition during peak burn conditions in receptive fuels could reach **1.25 acres**.

Specific Areas of Concern:

All Divisions: Yesterday's rainfall will put a damper on fire behavior today. This combined with the diminishing heat due to extensive mop-up will make fire movement minimal today. Sheltered heavies like stumps and logs will continue to hold heat. Lightning outside of any rain event could produce new ignitions.

Tiger Island: Areas of heat in divisions F & J are of concern due to the prevailing winds the next few days.

Hwy 113: Division G was holding heat, watch this area as conditions dry. Pockets of green exist throughout the fire; these areas have potential to ignite if nearby heat sources are not extinguished.

Elisabeth: Any heat remaining in the Tenmile Creek drainage on the southwestern side of the fire is of concern due to the heavy vegetation and poor access.

Lions Camp Road: No particular areas of concern.

Air Operations:

Generally good conditions. Rain and storms in the afternoon may affect air operations.

Fire Behavior Safety Message

Use the first three standard firefighting orders. Plan according to what is happening and what could happen. Today may be slower than previous days, but the extreme drought conditions are not over. We can and most likely will return to elevated fire danger and the potential for extreme fire behavior in the near future.

Take advantage of this downturn in fire behavior to snuff out as much heat as possible.

Mop-up while conditions are in our favor.

Training Message

The Tiger Island Fire has 37 trainees that have currently checked in with the Training Specialist. There are trainees representing all sections: Command, Operations, Air Operations, Logistics, Plans, and Finance.

If you are working as a trainee on the Tiger Island Fire, no matter the position, please check in with the Training Specialist. Bring your Task Book, your red card, your Order #, and your coach/evaluator to the Training Specialist at the Status Check-In table inside the front door in the ICP. This will take you less than 5 minutes. It will help us track numbers and positions and it will produce a good training packet that will be emailed to the person you designate to document your experience.

If you are a trainee on the Hwy 113 Fire, the Elizabeth Fire or the Lions Camp Road Fire, please contact me by phone (850.556.8623) or email (gseamon@talltimbers.org) to begin documenting your training assignment.

IWI IC Responsibilities – Division Group Supervisor or Point of Contact

- Take charge of the scene – inform the Division Supervisor and Tiger Island Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, etc.
- **For backup IWI communication, call the IWI phone: (208) 891-6743.**
- Assign or begin patient assessment (Medical Incident Report - MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. Unit Log, ICS 214, may be used for initial documentation, but a narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.
