3. Objective(s):		
<ol style="list-style-type: none"> 1. All operations will be conducted with safety of the public and firefighters in mind. Protection of life and property is your highest priority task. When in doubt, sacrifice acres rather than firefighter and public safety. 2. Provide public information regarding fire danger to maintain good awareness of the risk and hazards to the public. Coordinate with LDAF Public Information Officer at (225) 975-7532 or presssecretary@ldaf.la.gov and State Fire Marshall's Public Affairs Director at (225) 620-5115 or ashley.rodrique@la.gov. 3. The team will handle EEO complaints in consultation with LDAF Human Resources involving personnel attached to the team. 4. Continue partnership and coordination with the appropriate LDAF, State Fire Marshall, GOHSEP, and local public safety officials. 5. Manage incident in a cost effective manner. 		
4. Operational Period Command Emphasis:		
<p>Stop, Think, Discuss then Act, and ensure LCES is in place prior to engaging the fires. The Tiger Island, Hwy 113, Lions Camp Rd and Elizabeth Fires receive a strategic, risk-based response, commensurate with the threats and opportunities, and uses the full spectrum of management actions, that consider fire and fuel conditions, weather, values at risk, and resources available.</p>

To: All Incident Personnel

As Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The Southern Area Red Team has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/Steve Parrish

Fire Weather Forecast

FORECAST NO: 10
PREDICTION FOR: Wednesday and Wed Night
DATE: September 6th, 2023
FORECAST ISSUED: 1800 hr September 5th, 2023

Fires: Tiger Island - Highway 113
Lions Camp Road - Elizabeth
Incident Meteorologist: *Jeremy Michael*
Signed: JRM (304-886-2331)

WEATHER DISCUSSION: Expect a warmer and drier afternoon compared to past days with heat indices possibly rising to 107 degrees. While coverage of storms will be less today, an isolated shower or thunderstorm cannot be ruled out. Main risks would be lightning, gusty outflow winds, and brief heavy rain. The winds this afternoon will be variable with occasional wind gusts around 15 mph during peak heating. Any showers and storms will gradually diminish through the evening with clearing overnight.

TODAY:

WEATHER: Partly cloudy with isolated showers and thunderstorms.
MAX TEMP: 96-99° **HEAT INDEX:** 103-107° **MIN RH:** 37-47%
PROBABILITY OF PRECIP: 20% **CHC WTG RAIN:** 5% **LAL:** 3
WINDS (20 feet): Variable 2-5 mph. Gusty/erratic outflows from variable directions with any storms.
MIXING HEIGHT: Weak morning inversion. 7,000-8,000 ft during the afternoon.
TRANSPORT WIND: Variable 5-8 mph.

TONIGHT:

WEATHER: Isolated showers/storms during the early evening; clearing overnight.
MIN TEMP: 74-77° **MAX RH:** 90-100%
PROBABILITY OF PRECIP: 10% **CHC WTG RAIN:** 5% **LAL:** 2 evening; 1 overnight
WINDS (20 feet): Variable 2-5 mph.
TRANSPORT WIND: W 5-10 mph.

THURSDAY:

WEATHER: Partly cloudy. Isolated showers and thunderstorms possible during the afternoon.
MAX TEMP: 100-103° **HEAT INDEX:** 105-110° **MIN RH:** 30-40%
PROBABILITY OF PRECIP: 15% **CHC WTG RAIN:** 7% **LAL:** 2
WINDS (20 feet): N 4-9 mph; gusts 15 mph. Gusty/erratic outflows from variable directions with any storms.
MIXING HEIGHT: Weak morning inversion. 9,000-10,000 ft during the afternoon.
TRANSPORT WIND: NW 6-11 mph.

EXTENDED OUTLOOK: FRIDAY - SUNDAY: A frontal boundary will push through the region Friday and Saturday with showers/storms becoming increasingly likely. Generally scattered storms are anticipated, but the probability could certainly rise over the coming days. Rain chances decrease on Sunday, but isolated activity remains possible. While the afternoons may briefly dry to 30-40% RH, overnight RH recoveries will remain above 85%. Afternoon winds will also continue to be light and variable, with occasional wind gusts to 15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 13	TYPE OF FIRE: Wildland, Type 1
FIRE NAMES: Tiger Island/Lions Camp Road/Hwy 113/Elizabeth	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: Tuesday, September 5, 2023 Time Issued: 1800	SHIFT DATE: Wednesday, September 6, 2023
UNIT: Private Lands	SIGNED: Alison Coons, FBAN

WEATHER SUMMARY:

Local Thresholds – Watch Outs Temp >80°, Min RH < 35%, Winds > 20 mph	Forecast for Today: Temp: 98°, Min RH: 40%, Winds: 4-8 mph Gust to 15
---	---

FIRE BEHAVIOR:

Fuels are critically dry. **KBDI and ERC values are at record levels.** Fuel conditions combined with gusty erratic winds, especially during the afternoon, have the potential to produce active fire behavior. Be alert for thunderstorms in the fire area during the afternoon that could cause strong erratic winds. Isolated heat points displayed on IR maps could transition into active flame as drying continues.

Live fuel moisture samples from the fire area range from **49 to 65** percent moisture, MEANING they are well into the transition of live fuels contributing to fire intensity and spread as if they were dead fuels.

Fire Behavior based on values for the fuel models shown.

Vegetation	Fuel Model	Max Rate of Spread	Flame Length
Grass/Shrub	GS3	14-34 chains/hour	5-8 feet
Southern Rough	7	12-28 chains/hour	4-6 feet
Timber Litter and Understory	TU2 / TL6	2-10 chains/hour	1-4 feet

During peak heating expect **Spotting** distances up to **0.1 miles** from wind driven ground fire and slightly less from torching trees.

Probability of Ignition Day = **58%**

A new spot fire or ignition without suppression in the afternoon would be less than 0.1 **acres** in 15 minutes in sheltered timber and less than 1 **acre** where grass/shrub and southern rough fuels are continuous.

Specific Areas of Concern:

All Fires: Live fuels are dry enough to act as dead fuels and support fire spread in the same way. Afternoon heating and drying will be enough to support ignition and spread in needle cast and ladder fuels. Sunday's rainfall affects will be diminished today with areas that have been quiet for several days experiencing reburn that could support torching and spotting in the late afternoon. Possibility of torching increases in the afternoon as green pockets of fuel remain.

Tiger Island: Northern portions of the fire have the most potential for unburned fuels to ignite and carry. Maintaining control lines by removing needle cast will reduce potential for spotting. Most of the 55 miles of perimeter lines have potential for needle cast to build up on or adjacent to them.

Hwy 113: Hot spots sheltered from rain will start to reignite and spread as unburned fuel dry and become available. Most of the 25 miles of perimeter lines have potential for needle cast to build up on or adjacent to them.

Lions Camp Road: Rains have exposed additional areas of heat across the fire. Nearly half of the 8 mile perimeter has potential for needle cast on control lines.

Elizabeth: Expect fire behavior to increase in areas where there is a mosaic of burn severity. Nearly a third of the 9+ miles of perimeter lines could be impacted by needle cast.

Air Operations:

Generally good conditions for air operations. Gusting winds from isolated thunderstorms may cause some issues in the afternoon.

Fire Behavior Safety Message

Southern rough and pine plantations can be an impenetrable wall when trying to figure out where things are heating up. If you can't see it, find an open area like a field or young plantation with a wide view to help get your bearings before taking action.

IWI IC Responsibilities – Division Group Supervisor or Point of Contact

- Take charge of the scene – inform the Division Supervisor and Tiger Island Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, etc.
- **For backup IWI communication, call the IWI phone: (208) 891-6743.**
- Assign or begin patient assessment (Medical Incident Report - MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. Unit Log, ICS 214, may be used for initial documentation, but a narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.
