HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU

If you SEE SOMETHING, SAY SOMETHING

INCIDENT: Linville Complex	DATE: 6/19/2007	TIME: 0730
<p>Major Hazards and Risks:</p> <ul style="list-style-type: none">*Hazard Trees - Large areas and numbers of dead trees. Mitigate by identifying & chainsaw felling or staying away. Strong shifting winds associated with thunderstorms can bring these trees down from any direction.*Hydration & Fatigue - Drink at least 16 oz. of water every two hours. To replace electrolytes, mix one part Gatorade (or other sports drink) with two parts water. Set the right pace for the days work ahead. Follow the 2:1 work/rest guidelines.*Steep and Rocky Terrain - Watch your footing and be aware of rolling rocks. Take your time. Due to remote terrain, a medi-vac could be slow and hazardous. Stay off cliffs.*Driving - Watch out for the other driver. Drive defensively. Everyone in vehicle will wear seatbelts before vehicle moves every time. Give the weekend warriors plenty of room.*Complacency - Don't let the low fire activity lull you into complacency. A couple of days of drying can bring this fire back to extreme conditions. Maintain a watchful eye to changing conditions and let others know what you are seeing.		
<p>Transition time are when a Watchout Situation. Everyone needs to understand the organization of the team in place. If you have any questions about fire supervision or assignments, be sure to have them answered prior to beginning the daily assignment.</p>		
<p><i>The Mix of Resources</i></p> <p>Ask yourself these questions multiple times during each day.</p> <ul style="list-style-type: none">❖ Am I informed about the IAP?❖ Do I know what steps to take in a medical emergency?❖ Am I communicating clearly?❖ Do I know the hazards I will encounter?❖ Do I know when aircraft are in the area?❖ Am I reporting changes in weather?❖ Do I know who is in charge?❖ Current and predicted weather known?❖ Am I wearing all my PPE?❖ Did I ask <u>my</u> questions during the safety briefing?	<p>Escape Route/Safety Zone Checklist</p> <p>Escape Routes:</p> <ul style="list-style-type: none">*More than one escape route*Scouted – soils, vegetation, slope*Timed – slowest person, fatigue, dozer speed*Marked – flagged for day and night use <p>Safety Zones:</p> <ul style="list-style-type: none">*Survivable without a shelter*Natural – clean burn, water, bare soil/rock*Manmade – constructed sites, roads*Scouted for size and hazards*Close enough considering escape time needed <p>Remember and Follow:</p> <ul style="list-style-type: none">*The 10 Standard Fire Orders*The 18 Situations That Shout Watch Out*The Common Denominators of Fire Behavior on Tragedy Fires*The Downhill Line Construction Guidelines	

Incident Safety Officer: Jack Muncy
