Potential future threat <b>XX</b> No likely threat						ilding/Ot	her						
No likely threat       0         26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:         12 hours: Movement to the west is possible with the easterly wind         24 hours: same         48 hours: same         72 hours:         27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:         12 hours: Holly Shelter Gameland wildlife habitat, timber and T&E plant species         24 hours: Same         48 hours: Same         48 hours: Same         28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):         12 hours: FDUL         24 hours:         28 Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):         12 hours:         24 hours:         24 hours:         24 hours:         24 hours:         27 hours:         29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.         Deep organic soils continue to burn due to long term drying. Many fire danger indices are at extreme levels (Ignition Component-IC and Energy Release Component -ERC) with others setting new maximums (Spread Component-SC, Burning Index-B													
KBDI) for the day. Fuel moistures are also at extremely low levels.         30: Observed Weather for Current													
30: Observed Operational I Peak Gusts (1	31: Fuels/Mate	erials In	volved:	olved: 4 Chaparral (6 Feet)									

Peak Gusts (mph): 27S1: Tuess Matchais involved: 4 Chaparra (0 Feet)Max. Temperature: 87Pocosin fuels. Also fuel model 7-Southern RoughWind Direction: E

32: Today's observed fire behavior (leave blank for non-fire events):

Smoldering and creeping in the timber litter with torching in the tall brush. All activity is within the fire perimeter.

33: Significant events today (closures, evacuations, significant progress made, etc.):

34: Forecasted Weather for next Operational PeriodWind Speed (mph): 7-10Temperature: 86Wind Direction: ERelative Humidity: 47	35: Estimated Control Date and Time:	36: Projected Final Size: <b>Unknown</b>	37: Estimated Final Cost:
---	---	---	---------------------------

38: Actions planned for next operational period:

## Widening control lines on southern perimeter. Mopup and patrol all control lines. Rehab those portions of plow lines where fire is longer a threat.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - High

2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?

Unknown

41: Projected demobilization start date: 07/04/2011 0800

42: Remarks:
