

PAINS BAY FIRE

NC-ALR-111006
PRF3FT (1502)

Incident Action Plan *MONDAY*

May 23, 2011
0730-1930 hrs

INCIDENT OBJECTIVES	1. Incident Name PAINS BAY FIRE	2. Date Prepared 5/22/2011	3. Time Prepared 2000 hrs
4. Operational Period Monday, May 23, 2011 0730 to 1930 hrs			
5. General Control Objectives For The Incident (Include Alternatives) 1. Provide for the safety of firefighters and general public by adherence to the 10 standard fire orders, 18 watch-out situations, in addition to maintaining direct and clear communications with all incident personnel and the general public. 2. Keep fire contained within established boundaries for indirect attack suppression strategy. Use burnout trigger points in event of fire escaping current containment lines. 3. Implement established evacuation plan to provide for safety of Stumpy Point Community, if trigger points are met. 4. Expedite the safe opening of US Hwy 264 by focusing suppression tactics and relocation of resources to Division Alpha as soon as operational objectives are met to minimize threat to Stumpy Point community 5. Keep general public & local officials in affected counties, as well as incident stake holders informed of fire status through situation updates and personal contacts at least every other day. 6. Provide for accurate cost tracking and documentation of incident in accordance with IBH (Incident Business Handbook) procedures. 7. Ensure that suppression & containment strategies on FWS property follow minimum impact suppression tactics. Escalation of tactics should consider amount of progress being made with current tactics, and the likelihood of those tactics being successful.			
6. Weather Forecast For Period See Attached Tailgate Safety Briefing Sheet.			
7. General Safety Message See Attached Tailgate Safety Briefing Sheet.

8. Medical Emergency Procedures					
<p>Report all injuries and illnesses to the closest DIVS. DIVS will notify the Line EMT and ICP Communications, and include the extent of the injury and transportation needed. Do not use patient's name on the radio. A medical emergency should be declared over the radio immediately. All radio traffic will be kept to a minimum so emergency procedures can proceed uninhibited. ICP Communications will notify Dare Central Dispatch (911) and MEDL. Safety will be notified. Dare County EMS will respond and determine the appropriate treatment, transportation and facility needed. If ground transportation is determined, if possible, assign personnel to meet the ambulance at a location that is easily accessible to lead them to the site of the injured. If patient is transported to meet EMS personnel needs to remain with patient until EMS has arrived. EMT is staged at NCDFR Maintenance Building to respond to injuries and stabilize patient until EMS personnel arrives.</p> <p>For Non emergencies contact the Medical Unit Leader located at ICP. Transportation and treatment will be arranged by MEDL at ICP.</p> <p>Nighttime Operations: Communicate all emergency medical needs directly to Dare County Emergency Communications via 800mhz radio furnished by NCDFR Dare County Ranger, and contact Safety Officers Mike Kretzschmar at 828-413-2588 or Tom White at 910-334-0029.</p>

Pains Bay Fire ICP Location Map

WEATHER DISCUSSION

High pressure will extend over the area from offshore today through Saturday. A weak upper level disturbance will move across north of area this afternoon. A cold front will approach from the west Sunday.

WEATHER FORECAST – MONDAY

Weather: Areas of smoke early, then partly cloudy. 20 percent chance of an afternoon shower or thunderstorm. Chance of wetting rain 10 percent.

LAL: 2

Temperatures: Maximum near 89 around 1300. Max Heat Index around 95.

Humidity: Minimum 45 to 50 percent around 1300.

20 FT winds: South around 15 mph gusting to 25 mph.

Haines Index: 4.

Stability/Inversion: Inversion burning off by 0900. Mixing height 7000 ft agl. Transport wind south 15 mph.

Max LVORI early: 5

Aviation operations: VFR prevailing.

Forecast for Monday night

Partly cloudy. 20 percent chance of an evening shower or thunderstorm. LAL: 2. Low temperature 65 to 70. Maximum RH 85 to 95 percent. Winds southwest around 10 mph. Max LVORI late: 5

OUTLOOK FOR TUESDAY

Partly cloudy. LAL: 1. High around 85. **Max heat index around 90.** Minimum RH 50 to 55 percent. Southwest winds 10 to 15 mph gusting to 22 mph.

EXTENDED FORECAST

Tuesday night through Sunday...Mostly clear through Friday, then partly cloudy with a chance of showers and thunderstorms Saturday and Sunday. Lows 65 to 70. Highs in the upper 80s Wednesday and Thursday, and lower 80s Friday through Sunday. Heat indices near 95 Wednesday and Thursday, and near 90 Friday through Sunday. Minimum RH around 50 percent. Good RH recovery at night. Southwest to south winds 5 to 15 mph, gusting to around 20 mph in afternoons.

Smoke impacts: Enough wind expected to prevent superfog events during period. Expected south to southwest winds will produce smoke impacts around Manns Harbor and Manteo, and along the northern Outer Banks from Nags Head to Southern Shores. Main stretch of highway impacted would be 264 between Stumpy Point and Manns Harbor.

FIRE BEHAVIOR- Monday 5/23/2011

Scott Ludlum – FBAN 252-903-8007

Previous Fire Behavior- Ground fire continues to be very active. Surface fire in the interior areas, was also observed yesterday.

Predicted Fire Behavior- The risk for reburning is still a threat but with all the pumping operations this has been dramatically reduced. Fuels remain dry and are readily available to burn. Watch for torching that could loft embers across control lines. During peak wind gust expect torching and rapid rates of spread, especially after the fire grows much larger than an acre. Be aware of the local sea breeze influence, this will increase rates of spread and can change the fire direction very suddenly.

Fuels/Fuel Model- Pocosin (Tall Brush) - FM sh9

Rates of Spread-	Flame Lengths-	Probability of Ignition-	Spotting-
60 ch/hr <i>2 ch. lower (24 hr trend)</i>	20 ft. <i>No Change (24 hr trend)</i>	44% <i>6% lower (24 hr trend)</i>	0.2 Miles <i>No Change (24 hr trend)</i>

Fuel Moisture- (* indicates new maximum indices may be set for this day)

1 HR (1/4" or less)	10 HR (1/4"-1")	100 HR (1-3")	1000 HR (3-8")	Live Woody
8% <i>1% higher (24 hr trend)</i>	9% <i>No Change (24 hr trend)</i>	16% <i>No Change (24 hr trend)</i>	18% <i>No Change (24 hr trend)</i>	70% <i>No Change (24 hr trend)</i>

Predicted Fire Danger Readings- Dare Bomb Range (* indicates new maximum indices may be set for this day)

Ignition Component	Spread Component	Energy Release Component	Burning Index	KBDI
22 <i>1 higher (24 hr trend)</i>	15 <i>4 higher (24 hr trend)</i>	24 <i>7 lower (24 hr trend)</i>	46 <i>2 higher (24 hr trend)</i>	*451 <i>10 higher (24 hr trend)</i>

Controllability- Indirect attack should be used if fires become established. Use of aircraft should always be utilized. Safety of firefighters is of critical concern.

SAFETY MESSAGE

TAILGATE BRIEFING SHEET

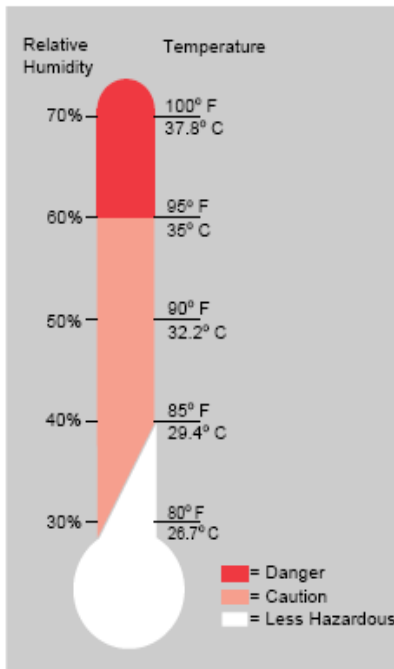

DATE: 5/23/11

Signature/Date

THE HEAT EQUATION

HIGH TEMPERATURE + HIGH HUMIDITY + PHYSICAL WORK = HEAT ILLNESS

When the body is unable to cool itself through sweating, **serious** heat illnesses may occur. The most severe heat-induced illnesses are **heat exhaustion** and **heat stroke**. If actions are not taken to treat heat exhaustion, the illness could progress to heat stroke and possible **death**.

OSHA 3154
1998

HEAT EXHAUSTION

What Happens to the Body:

HEADACHES, DIZZINESS/LIGHT HEADEDNESS, WEAKNESS, MOOD CHANGES (irritable, or confused/can't think straight), FEELING SICK TO YOUR STOMACH, VOMITING/THROWING UP, DECREASED and DARK COLORED URINE, FAINTING/PASSING OUT, and PALE CLAMMY SKIN.

What Should Be Done:

- Move the person to a cool shaded area to rest. Don't leave the person alone. If the person is dizzy or light headed, lay them on their back and raise their legs about 6-8 inches. If the person is sick to their stomach lay them on their side.
- Loosen and remove any heavy clothing.
- Have the person drink some cool water (a small cup every 15 minutes) if they are not feeling sick to their stomach.
- Try to cool the person by fanning them. Cool the skin with a cool spray mist of water or wet cloth.
- If the person does not feel better in a few minutes call for emergency help (Ambulance or Call 911).

(If heat exhaustion is not treated, the illness may advance to heat stroke.)

HEAT STROKE—A MEDICAL EMERGENCY

What Happens to the Body:

DRY PALE SKIN (no sweating), HOT RED SKIN (looks like a sunburn), MOOD CHANGES (irritable, confused/not making any sense), SEIZURES/FITS, and COLLAPSE/PASSED OUT (will not respond).

What Should Be Done:

- Call for emergency help (Ambulance or Call 911).
- Move the person to a cool shaded area. Don't leave the person alone. Lay them on their back and if the person is having seizures/fits remove any objects close to them so they won't strike against them. If the person is sick to their stomach lay them on their side.
- Remove any heavy and outer clothing.
- Have the person drink some cool water (a small cup every 15 minutes) if they are alert enough to drink anything and not feeling sick to their stomach.
- Try to cool the person by fanning them. Cool the skin with a cool spray mist of water, wet cloth, or wet sheet.
- If ice is available, place ice packs under the arm pits and groin area.

SAFETY OFFICERS: Mike Kretschmar, Tom White
LINE SAFETY OFFICERS: Dan Brassard, Keith Jenkins
