

# PAINS BAY FIRE

NC-ALR-111006  
PRF3FT (1502)

## Incident Action Plan

**Saturday**

**June 11, 2011**

**0700-1900 hrs**

<b>INCIDENT OBJECTIVES</b>	1. INCIDENT NAME <b>PAINS BAY FIRE</b>	2. DATE PREPARED <b>6/10/2011</b>	3. TIME PREPARED <b>2130</b>									
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> <p style="text-align: center;"><b>Saturday, June 11, 2011 0700 to 1900 hrs</b></p>												
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)</b>												
<p><b><u>Control Objectives</u></b></p> <ol style="list-style-type: none"> <li>1. Provide for the safety of firefighters and general public by adherence to the 10 standard fire orders, 18 watch-out situations, in addition to maintaining direct and clear communications with all incident personnel and the general public.</li> <li>2. Coordinate with Dare Emergency Management Coordinator to initiate evacuation if fire threatens the village of Stumpy Point.</li> <li>3. Continue to monitor traffic conditions on US Hwy 264. Maintain 24 hours LE presence at designated areas to provide for immediate closure through proper notification, if needed, for escaped fire, dense smoke, or fog conditions.</li> <li>4. Keep fire contained west of US Highway 264, south of US Highway 64 and east of the Milltail Rd / Alligator Rd / Poplar Ridge Rd corridor.</li> <li>5. Provide for initial attack in areas as designated in the Delegation of Authority.</li> <li>6. Continue to implement written Water Handling Plan.</li> <li>7. Ensure that suppression &amp; containment strategies on FWS property follow minimum impact suppression tactics. Escalation of tactics should consider amount of progress being made with current tactics, and the likelihood of those tactics being successful.</li> <li>8. Provide for the protection of infrastructure devices, experimental tree plantations, and soil and water monitoring stations throughout affected areas on USFWS property.</li> <li>9. Coordinate the identification of potential suppression rehabilitation needs.</li> </ol> <p><b><u>Management Objectives</u></b></p> <ol style="list-style-type: none"> <li>1. Keep general public &amp; local officials in affected counties, as well as incident stakeholders informed of fire status through situation updates and personal contacts.</li> <li>2. Provide for accurate cost tracking and documentation of incident in accordance with IBH (Incident Business Handbook) procedures.</li> <li>3. Emphasize cost containment through continual assessment of personnel and resource needs to provide correct staffing of incident.</li> </ol>												
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b>												
<p style="text-align: center;">Sunny, Max. Temp. 88, Min. RH 55%, Winds S 11, Mixing Ht. 5000', Transport Winds S 18-20 MPH</p>												
<b>7. GENERAL SAFETY MESSAGE</b>												
<p style="text-align: center;"><b>See Attached Tailgate Safety Briefing Sheet. Supervisors sign after completing &amp; return to Documentation Unit.</b></p>												
<b>8. ATTACHMENTS (X IF ATTACHED)</b>

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 32</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Pains Bay</b>	<b>OPERATIONAL PERIOD: 6/11/2011 Days</b>
<b>DATE ISSUED: 6/10/2011</b>	<b>TIME ISSUED: 1800</b>
<b>UNIT: Alligator River NWF</b>	<b>SIGNED: /s/ David Greathouse</b>

## INPUTS

### WEATHER SUMMARY:

**High Pressure still dominates the weather pattern...**

Today: Sunny, Max Temp – 88, Min RH – 55% Winds – South 11mph  
Mixing Height – 5000', Transport Winds – South 18-20mph, Haines – 3 (4 after 1600)

Tonight: Mostly Clear, Min Temp – 73, Max RH – 87, Winds – Southwest 9-12mph

**A Cold front will cross over the area Sunday night, bringing about a marked wind shift to the North**

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

This fire is burning in Pocosin fuels with a Pond Pine overstory. Lack of rainfall and consistent ERC-G's in the 90<sup>th</sup>-97<sup>th</sup> percentile have made this fuel type very responsive to fire. Yesterday, active fire behavior was seen in unburned areas inside the control lines, re-burning, as well as active smoldering in organic soils. Today, expect any established fire to have rates of spread of 18 - 30 chains per hour with 11-14 flame lengths. . Be aware that fuels without Pine overstory will exhibit faster rates of spread and longer flame lengths.

Local thresholds that shout watch out; Temp above 90 degrees, RH's below 25%, Winds greater than 15mph

#### SPECIFIC:

**All Divisions:** Expect active burning in remaining green fuel and re-burn in browned and cured fuel as well as continued active smoldering in organic soils.

**Divisions C, M, N:** Heads up while working these divisions today. With the predicted wind direction and speed, any torching near the fire line could loft embers across the fire line causing spot fires. Spotting can be up to .1 miles and the probability of ignition is 40%

#### NFDRS Indices (Fuel Model G)

	<b>ERC-G</b>	<b>Burning Index</b>
<b>Yesterday</b>	<b>41</b>	<b>39</b>
<b>Today</b>	<b>39</b>	<b>38</b>

**\*\*The current KBDI is 561\*\***

#### AIR OPERATIONS:

MVFR conditions may be present in the fire area due to smoke.  
IFR conditions may be present at the Manteo Airport this afternoon

## SAFETY

**Complacency Kills!**

# Safety Message

6/11/2011

**Tailgate Safety Briefings are required before starting work on your Division or fire assignment!**

**Hazards:**

<i>Complacency</i>	<i>Air Operations</i>	<i>Snags</i>	<i>Explosive Munitions</i>
<i>Driving</i>	<i>Hydration</i>	<i>Wildlife</i>	<i>Thunderstorms</i>
<i>Firing Operations</i>	<i>Fire Behavior</i>	<i>Heavy Equipment</i>	

**DRIVING** - Drive defensively. Use passenger as a lookout, navigator, and backing guide. Obey speed limits. Use headlights and seatbelts. 10 MPH in very dusty road conditions. Clean your windows. Watch out for Bears!

**FIRING OPERATIONS** – Ensure all resources are briefed prior to starting firing operation. LCES should be in place and reevaluated during operation.

**AIR OPERATIONS**- Stay away from bucket and retardant drop areas. Use air to ground frequency when communicating with aircraft. Stay safe distance from drop zones of tankers and helicopters.

**HYDRATION/HEAT STRESS** - Temperatures are on the rise. The body shuts down the thirst mechanism when you're dehydrated, therefore, be sure to drink a lot, before you get thirsty. 4:1 water to Powerade or Gatorade.

**FIRE BEHAVIOR** – Maintain situational awareness, follow 10 Standard Orders, recognize / mitigate the 18 Watch Out Situations, and apply LCES. Know the fire weather forecast. Monitor conditions. **Pumps** - Operators and Mechanics should be the only personnel near pumps. PTOs and exposed drive belts can injure you. Canal banks can collapse. Noise levels can be high. Shut down pumps to service.

**SNAGS** – Stay out of area, essential fire line personnel only. Look at root system before working/ parking. Refer to IRPG Pg 20-21

**Complacency**- **Don't let your guard down or get complacent, stay alert and maintain your situational awareness.**

**Heavy Equipment**- Use situational awareness in working around Heavy Equipment. Know where you are in relation to where the equipment is working at all times. Also use the 3 points of contact in mounting and dismounting equipment.

**Thunderstorms**- Observe the 30/30 rule. If you see lightning and hear thunder follow in less than 30 secs, take storm precautions identified on page 19 of the IRPG.

**Explosive Munitions**:- If you see anything that appears to be munitions, do not attempt to remove or collect. Flag and report location to ICP.

Safety Officers Dwight Bryant, Tater Maines, Charles Stanton

# **Pains Bay Fire Information Section**

**Saturday June 11, 2011**

If you see unescorted media on the fire, please refer them to a Public Information Officer, so an escort can be provided. **PIO contact information:**

- **David Brown**      **Cell – (828) 273-0982** **Radio – Information Brown**
- **Brian Haines**      **Cell – (919) 218-9728** **Radio – Information Haines**

If the media asks you about the fire, use the talking points below:

- The fire was caused by a lightning strike on May 4 and was reported on May 5.
- The fire has burned 45,225 acres (increase in acres is a result of more accurate mapping) and is 75% contained. The fire perimeter is about 55 miles long, and has not expanded in the past five days.
- The southerly flow of warm, dry air will continue until Sunday. Winds will shift to the north on Monday with a frontal passage, but no significant rainfall is predicted.
- Firefighters are using high volume pumps to move water through canals to flood areas of ground fire near the fire perimeter. Brush trucks and helicopters are used to extinguish hot spots within the containment lines.
- An irrigation system has been installed on part of the fire perimeter where there are no roads. The sprinkler system runs 24 hours per day to keep organic soil wet and prevent the fire from crossing the containment line.
- A 100 ft. wide fuel break is being mowed on the Alligator River National Wildlife Refuge just north of Stumpy Point.
- The ground fire will continue until the fire consumes all the peat down to mineral soil, the fire burns down to a level of high moisture content, or the soil moisture level rises to the fire as a result of extended heavy rain or pumping operations.
- An aerial tanker with a 1,400 gallon capacity would have to make 233 drops to cover one acre with one foot of water. There are about 7,000 acres of ground fire.
- The ground fire could burn for weeks or even months if the dry weather trend continues. Smoke will linger in the area as long as there is ground fire.
- For safety reasons the public is restricted from using Refuge and Dare County Range roads in the fire area.
- The Alligator River National Wildlife Refuge and the Dare County Range are fire dependent ecosystems that require periodic fire to maintain the ecological balance.
- Wildlife species in the area are accustomed to living in a fire adapted ecosystem and will recover.

<b>8. Medical Emergency Procedures</b>											
<p><b>**FOR CRITICAL EMERGENCIES**</b> <b>Step 1.</b> Report all injuries and illnesses to the closest DIVS. DIVS will notify the Line EMT and ICP Communications, and include the extent of the injury and transportation needed. Do not use patient's name on the radio. A medical emergency should be declared over the radio immediately. All radio traffic will be kept to a minimum so emergency procedures can proceed uninhibited. <b>Step 2.</b> ICP Communications will notify Dare Central Dispatch (911) and MEDL. Safety will be notified. Dare County EMS will respond and determine the appropriate treatment, transportation and facility needed. If ground transportation is determined, assign personnel to meet the ambulance at a location that is easily accessible to lead them to the site of the injured. If patient is transported to meet EMS, a personnel needs to remain with patient until EMS has arrived. One Line EMT is staged in the Navy Shell &amp; Long Curve Rd. area and another in the Faircloth Rd. area to respond to injuries and stabilize patient until EMS personnel arrive. <b>**FOR MINOR EMERGENCIES**</b> <b>Step 1.</b> Patient - Will Advise Their Supervisor <b>Step 2.</b> Patient - Will Receive Care <b>Step 3.</b> Patient Supervisor/Patient - Will Advise Division Supervisor <b>Step 4.</b> Div. Sup/Patient Supervisor - Will Document Incident On 214 <b>Step5.</b> Div. Sup. /Patient's Supervisor - Will Advise The Medical Unit Leader At The End Of Each Shift Of ANY Illness or Injury And Of ANY Medical Care Given. <b>**If transportation is needed it will be arranged by MEDL**</b></p> <p><b>Nighttime Operations:</b> Communicate all emergency medical needs directly to Dare County Emergency Communications via 800mhz radio furnished by NCDFR Dare County Ranger, and contact Safety Officers Dwight Bryant 919-705-3324 or Tater Maines 828-499-0803 and Medical Unit Leader Randy Kearney 919-727-0954.</p> <p><u>ANY INJURY OR ILLNESS IN WHICH ANY TYPE OF CARE IS GIVEN WILL BE DOCUMENTED ON THE UNIT'S 214 AND THE MEDICAL UNIT LEADER WILL EITHER RECEIVE A COPY OF THE 214 OR BE ADVISED VERBALLY BY THE DIVISION SUPERVISOR, PATIENT'S SUPERVISOR OR PATIENT AT THE END OF EACH SHIFT.</u></p>
