29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Concerns related with potential impacts to coastal area tourism due to smoke and air quality across the Eastern portions of North Carolina. Concerns related to the continued safety of the Stumpy Point and Manns Harbor community. Difficulty with equipment operability when attempting direct attack. Sea breeze / local gradient winds that are difficult to forecast. Trees continue to fall due to burned out organic soil below the root base and the flooding of blocks. Heavy smoke problems along Hwy 264 and the NC Outerbanks. Trees leaning on, and falling on Power lines around interior of fire.

---	---

32: Today's observed fire behavior (leave blank for non-fire events):
Significant residual burning of organic soil and significant reburn within the fire perimeter. Including short runs and isolated torching.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Worked to control flare-ups and reburns to prevent them from crossing the controls lines. Continued preping contingency lines to the north. Continued pumping operations on Division Lima, November, and Echo. Scattered showers across fire area.

--	--------------------------------------	---------------------------	---------------------------

38: Actions planned for next operational period:
Continue to monitor and mop-up hot spots and ground fire along the fire perimeter. Continue high volume lift pumping operation according to the Water Handling plan. Continue preping contingency lines to the north with masticators and assess potential for pumping operations.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Extreme**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?
Unknown

41: Projected demobilization start date:

42: Remarks:
In addition to the resources listed below, 60 high volume lift pumps, 2 USFWS flex tracs, 2 NCDNR flex tracs, 1 front end loader, 1 long reach excavators, 1 marshmaster, 1 motorgrader and 3 dump trucks are being used to assist with suppression efforts. Smoke trajectory projections are being made daily and disseminated to impacted county and stakeholders. NIMO Team(Custer)currently assessing the Incident and will assume command in unified command with NCDNR on Sunday 6/19 @ 1800
