## Incident Status Summary (ICS-209)

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
12 hours: Strong winds could move the fire to the North, Northeast or Northwest.
24 hours:
48 hours:
72 hours:
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and
72 hour time frames:
12 hours: Natural resources including threatened and endangered species, Natural Heritage areas, and Department of Defense Land and infrastructure. If fire escapes on the east side, the community of Stumpy Point would be threatened. If the fire escapes on the north side, the community of Manns Harbor could be threatened.
24 hours:
48 hours:
72 hours:
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12,
24,48 , and 72 hour time frames):
12 hours:
24 hours:
48 hours:
72 hours:
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.)
Relate critical resources needs identified above to the Incident Action Plan.

Concerns related with potential impacts to coastal area tourism due to smoke and air quality across the Eastern portions of North Carolina. Concerns related to the continued safety of the Stumpy Point and Manns Harbor community. Difficulty with equipment operability when attempting direct attack. Sea breeze / local gradient winds that are difficult to forecast. Trees continue to fall due to burned out organic soil below the root base and the flooding of blocks. Heavy smoke problems along Hwy 264 and the NC Outerbanks. Trees leaning on, and falling on Power lines around interior of fire.

30: Observed Weather for
Current Operational Period
Peak Gusts (mph): 25 Max.
31: Fuels/Materials Involved: 4 Chaparral (6 Feet)
Temperature: 90
Wind Direction: SW Min.
Relative Humidity: 61
32: Today's observed fire behavior (leave blank for non-fire events):
Some active surface fire was observed today on Division Lima well interior of the control line. Smoldering creeping ground fire was the observed on othere portions of the fire. Ground fire continues to produce smoke emmissions.
33: Significant events today (closures, evacuations, significant progress made, etc.):
Rainbird irrigating systems were moved around the fire perimeter to wet hot spots along the line. Flooding operations with high volume lift pumps continued according to the Water Handling Plan. Work continued on the mulched contingency line to the north of Division N.

| 34: Forecasted Weather for next Operational Period |  |  |  |
| :---: | :---: | :---: | :---: |
| Wind Speed (mph): 12-17 |  | 36: Projected Final | 37: Estimated Final |
| G25 Temperature: $\mathbf{8 7}$ | Control <br> Date and Time: | Size: | Cost: |
| Wind Direction: SW Relative Humidity: 63 |  |  |  |

38: Actions planned for next operational period:
Pumping operations will continue along the fire perimeter to maintain control lines. These pumping operations will shift around the fire perimeter to address hot spots. Mulching operations will continue to the north of Division $\mathbf{N}$ to build contingency lines.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - Medium
2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?
41: Projected demobilization start date:
42: Remarks:
Currently, over 500 million gallons of water are being moved daily around the fire perimeter. There is an estimated 5,000 to 7,000 acres of ground fire within the current fire perimeter. In addition to the resources listed below there are 49 high volume list pumps, 2 USFWS flex tracs, 2 NCDFR flex tracs, 1 front end loader, 1 long reach
excavator, 1 marsh master, 1 motorgrader, 2 gyrotracs, and 2 dump trucks. Smoke trajectory projections are being made daily and disseminated to impacted counties and stakeholders.
