

Incident Status Summary (ICS-209)

1: Date 07/29/2011	2: Time 1700	3: Initial Update Final XX	4: Incident Number NC-NCS-11-009-049	5: Incident Name Simmons Road		
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)		7: Start Date Time 06/20/2011 1323	8: Cause Lightning	9: Incident Commander Dan Brandon	10: Incident Command Organization Type 2 Team	11: State- Unit NC- NCS
12: County Bladen	13: Latitude and Longitude Lat: 34° 50' 37" Long: 78° 43' 11" Ownership: NC-NCS		14: Short Location Description (in reference to nearest town): 14 miles SE of Fayetteville, NC			
15: Size/Area Involved 5,438 ACRES	16: % Contained or MMA 95 Percent	17: Expected Containment Date:	18: Line to Build	19: Estimated Costs to Date \$4,184,039	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period: 0	22: Injuries to Date: 1	23: Fatalities 0	24: Structure Information			
			Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- No evacuation(s) imminent -- Potential future threat ----- XX No likely threat -----			Residence	306	0	3
			Commercial Property			
			Outbuilding/Other	200	0	16
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: 24 hours: Spread is possible if fire escapes containment. 48 hours: 72 hours:						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: 24 hours: 306 homes, Wildlife Resources Commission peroperty, and Bushy Lake State Natural Area property will again be threatened if fire escapes containment. 48 hours: 72 hours:						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 24 hours: 48 hours: 72 hours:						
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Gusty and erratic winds are possible with thunderstorm activity. Poor trafficability for access to many sections of the fire due to deep sand and organic soil that becomes						

very slick with minimal rainfall. Extreme heat causing firefighter safety issues.

30: Observed Weather for Current Operational Period Peak Gusts (mph): 7 Max. Temperature: 100 Wind Direction: W Min. Relative Humidity: 35	31: Fuels/Materials Involved: 4 Chaparral (6 Feet) Bay fuels (Sweet Bay, Wax Myrtle, Loblolly Bay) and Sandridge. Fuel model 7 (Southern Rough) is also present.
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------

32: Today's observed fire behavior (leave blank for non-fire events):
Significant interior re-burn on isolated section of the fire interior was observed today. Interior smoldering and isolated spots of interior re-burn continue.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Preparation for transition from the Brandon IMT to District 8 are taking place.

34: Forecasted Weather for next Operational Period Wind Speed (mph): Lgt Temperature: 100 Wind Direction: Var Relative Humidity: 39	35: Estimated Control Date and Time:	36: Projected Final Size: 5,438	37: Estimated Final Cost:
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------	-------------------------------------------	---------------------------

38: Actions planned for next operational period:
A transition meeting is scheduled for 1100 hours tomorrow. Continue to mop-up hot spots near the fire perimeter. Continue rehabilitation. Continue to assess resource needs and adjust as needed.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?
When the fire receives sufficient rainfall to extinguish interior burning that could threaten containment.

41: Projected demobilization start date:

42: Remarks:
In addition to the resources listed below there is 1 fulltrack and 1 backhoe assigned to the fire.

43: Committed Resources (Supplemental Committed Resources follow the first block)

Agency	CRW1		CRW2		HEL1	HEL2	HEL3	ENGS		DOZR		WTDR	OVHD	Camp Crews	Total Personnel
