<b>Comments /notes on tonight's mission and this interpretation:</b> No perimeter growth was mapped for the Highway 151 fire tonight. Scattered heat was mapped in pockets primarily in the southern portion of the fire area. A handful of isolated heat sources were mapped within the heat perimeter, and four were mapped adjacent to the heat perimeter, two of which occur along highway 151 in the southeastern portion of the fire, and the other two occur in a drainage on the southwestern edge of the fire.  No intense heat was detected in tonight's mapping mission.
