Date and Time Imagery Received by Interpreter: 11/26/2016 @ 0045hrs EST		Type of media for final product: Shapefiles, PDF Map, KMZ, IR Daily Log	
Date and Time Products Delivered to Incident: 11/26/2016 @ 0300hrs EST		Digital files sent to: NIFC FTP: http://ftp.nifc.gov/incident_specific_data/southern/North_Carolina/2016_Horton/IR/20161126/	
Comments /notes on tonight's mission and this interpretation: No perimeter growth was detected in tonight's mission. The heat perimeter remains the same as it was last night. Much of the detectable heat was located in the eastern and southern portions of the fire, with pockets of scattered heat mapped on both sides of Little Dugger Mountain and Dugger Mountain. Numerous isolated heat sources were also mapped interior to the heat perimeter, primarily in the eastern half of the fire area. No intense heat was detected in tonight's mapping.
