## HEALTH AND SAFETY MESSAGE

**SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

<b>INCIDENT:</b> Sauratown Mountain Fire	<b>DATE/SHIFT:</b> November 21, 2023
<b>Major Hazards and Risks:</b> Night Operations, Communications, Steep/Rocky Terrain and Snags	
<p><b>NIGHT OPERATIONS:</b> Maintain high visibility in work area. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp) Watch for signs of fatigue. Take breaks away from areas of known hazard.</p> <p><b>Communications:</b> Use the IAP to locate appropriate communication channels for your assignments. Over communicate while in operational briefings so all instructions are understood, and information is flowing freely between all personnel. When in doubt, <b>ask for clarification!</b></p> <p><b>Steep Rocky Terrain:</b> Many fires will have a lot of steep and rocky terrain. Make sure you have a good firm footing when walking in a steep area. Rocks and logs will become slippery when wet. Be deliberate when walking. Avoid stepping on wet rocks and logs. Look out for rolling debris from upslope and call out rolling debris to those who are below. Use Downhill Line Construction Checklist in IRPG (pg. 7) if constructing line downhill.</p> <p><b>Snags:</b> Maintain situational awareness and point out snags to others. Be aware of dead snags within past fire area. DO NOT cut hemlock snags (tops will break). Do not park vehicles under snags or trees with widow makers. Use flagging tape to keep others out of the area. <b>LOOK UP, DOWN, AND AROUND!</b></p> <p style="text-align: center;"><b>Thought for the Day “An ounce of Prevention is worth a pound of cure”</b></p>	
<p style="text-align: center;"><u><b>Planning for Medical Emergencies</b></u></p> <p>Ask and be able to answer these 3 questions...</p> <ol style="list-style-type: none"><li>1. What are we going to do if someone gets hurt?</li><li>2. How will we get them out of here?</li><li>3. How long will it take to get them to advanced medical care?</li></ol> <p>Take time this morning to review the Medical Plan, the Medical Incident Response form and Communications Plan.</p>	<p style="text-align: center;"><b>Driving in Wet Conditions</b></p> <ul style="list-style-type: none"><li>• Drive slow! You are much less likely to slide around if you are taking it easy. Try a lower gear to control your lead foot.</li><li>• Never stomp on the gas pedal! If you are losing traction, either take your foot off the gas pedal or keep it steady. Nothing gets you stuck quicker than gunning the engine.</li><li>• Drive so your tires ride the high areas of the road, not the ruts. Ruts are wetter, therefore muddier, slippery, etc.</li><li>• Do not stomp on the brake pedal to stop. Pump it slowly.</li><li>• If you start to slide, turn your wheels into the direction of the slide and start pumping the brakes. If you can't stop and are heading off the road, turn into the slide and turn the car as gently as possible away from the edge.</li><li>• If you get stuck in the mud, put it in park, calm down and get out of the car/van/truck. Survey the lay of the land and figure out the easiest way out of there</li></ul>
