HEALTH AND SAFETY MESSAGE

INCIDENT: NCFS Summer 24 Fire Support

DATE: 06/23/24 **OPERATIONAL PERIOD:** 0700-1900

Major Hazards and Risks:

THUNDERSTORMS

• The forecast has increased the potential for storms in the area starting today. All personnel should review the Thunderstorm Safety section at the bottom of this page that is from your IRPG. Know what to do in the event of a thunderstorm in your area.

- Remember that thunderstorms can bring with them gusty & erratic winds. Even if they are not directly overhead.
- All personnel will shelter in vehicles until the storm has safely passed by.

EXCESSIVE HEAT & HUMIDITY

- With Temperatures reaching the mid 90's and Relative Humidity's near the 50% range, hazardous conditions to fire fighters will exist in terms of heat related illness. Make sure to drink plenty of clear fluids. At a minimum, fire fighters should drink between 24 oz. and 32 oz. of water per hour. Limit the amount of sports drink intake & refrain from drinking soda as much as possible to avoid becoming dehydrated. Drink 3 bottles of water for every one bottle of sports drink.
- In addition to drinking plenty of fluids, fire fighters should take at least one 10-minute break every 2 hours at a minimum in a shaded or air-conditioned area. The hotter it gets, personnel should take longer and more frequent breaks to avoid heat related illness.
- Review the symptoms of heat stress with all personnel during morning briefings.

PERSONAL HYGIENE

• Remember to wash your hands with soap and water if able to do so prior to eating and drinking. Use hand sanitizer in the absence of soap and water. Add a cap full of bleach to coolers to prevent bacteria.

Conduct Tailgate Safety Briefings / Use Briefing Checklist Inside Back Cover of I.R.P.G.

Watch Out Situation

Watch Out Situation Number 15

Wind increases and/or changes direction.

- With the occasional gusty winds predicted, anticipate an increase in fire behavior associated with them.
- Thunderstorm activity in the area could affect the wind speed and direction on the fire that you are working on. Even if the storm is not right over you.
- Ensure that escape routes and safety zones are identified and communicated.

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situation Awareness: Sound waves move at different rates based on atmospheric conditions. Take the storm precautions below as soon as you hear thunder, not when the storm is upon you. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control:

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines, and other elevated conductive objects.
 Pick a place that is not subject to flooding.
- * If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lie on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- ground.
 Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle metal hand tools or flammable materials in open containers.
